

The background image shows a clipboard with a math problem. The problem is about a family's weekly budget and a quadratic function. The text on the clipboard is as follows:

From: _____

Quantitative Functions at the Family Cinema, Inc.

Goal:

Your family recently bought a home in a new neighborhood. The kids are excited because they said to Dad's dad that they will never have to go to the movies and never. Mom says she's excited at the thought of the time to relax and read.

The point at the start of the year is given by the function $y = -0.002x^2 + 2.4x$, where x is the number of weeks since the start of the year. To ensure that your family has a fun time, you decide to go to the movies every week. What is the maximum height (in feet) of the cliff?
