Integrated Broadband Networks Byeong Gi Lee, Woojune Kim, 2002 Explanations of the technologies are provided within

the concepts of architecture and layering models multiplexing and switching methods routing algorithms and protocols network control traffic management methods and QoS support The book also offers one of the first overviews of the IP over WDM field Cover High Performance Networking VII A. Tantawy,2013-06-05 It is always confusing and perhaps inconvenient at times using generic terms that will mean something to everyone but different things to different people High Performance is one of those terms High Performance can be viewed as synonymous to High Speed or Low Latency or a number of other characteristics The interesting thing is that such ambiguity can sometimes be useful in a world where focus shifts quite easily from one issue to another as times and needs evolve Many things have changed since the first HPN conference held in Aachen Germany in 1987 The focus then was mainly on Media Access Control MAC protocols that allow users to share the high bandwidth of optical fiber FDDI Fiber Distributed Data Interface was making its debut with its amazing 100 Mbps speed ATM Asynchronous Transfer Mode and SONET the Synchronous Optical Network were beginning to capture our imagination What could users possibly do with such high performance Share it After realizing that the real problems had gradually shifted away from the network media to the periphery of the network focus also began to shift Adapter design protocol implementation and communication systems architecture began to attract our interest Networking not Networks became the hot issue **High-Performance Backbone Network Technology** Naoaki Yamanaka,2020-04-01 Compiling the most influential papers from the IEICE Transactions in Communications High Performance Backbone Network Technology examines critical breakthroughs in the design and provision of effective public service networks in areas including traffic control telephone service real time video transfer voice and image transmission for a content delivery network CDN and Internet access The contributors explore system structures experimental prototypes and field trials that herald the development of new IP networks that offer quality of service QoS as well as enhanced security reliability and function Offers many hints and guidelines for future research in IP and photonic backbone network technologies
