Hummel,1973 [Forthcoming Books](#) Rose Army,2004 **Computer-Assisted Career Decision Making** Martin R. Katz,2013-10-23 Discussing career decision making CDM career guidance a computerized system of career guidance and the interplay among them this book describes the way people sort themselves or are sorted into educational and occupational options The options represent the content of this book

and the sorting represents the process The sequence of decisions may extend over a lifetime but several crucial choice points tend to occur at predictable stages in a career Career guidance is a professional intervention in CDM professional implies that practitioners conform to a standard of ethics knowledge and competence beyond what may be offered by other intervenors Guidance is partly an art but it is also partly a science at least an application of science based on a synthesis of logic and evidence derived from research The computerized System of Interactive Guidance and Information SIGI is a designated guidance treatment clearly defined and specified It was developed according to an explicit model derived from a particular rationale for guidance using modern technology to amplify the practice of career guidance The current version called SIGI PLUS TM is being used at more than a thousand colleges and universities as well as secondary schools libraries corporations community based organizations and counseling agencies These three interdependent topics are treated in a progression from a theory of CDM to a rationale and a model for guidance to the design and development of a system This book weaves together theory principles propositions rationales and models research and development The product of that development SIGI helps to define theory to exemplify it and to test it
