Paperbound Books in Print ,1991 Intellectual Disability and the Death Penalty Marc J. Tassé Ph.D.,John H. Blume JD, MAR,2017-12-01 Written by two nationally recognized experts this book provides a comprehensive review of the legal and clinical aspects of the death penalty as it relates to intellectual disability First the facts people with intellectual disability may falsely confess to a crime because they want to please the authorities and they are often less able than others to work with lawyers to prepare a defense In addition because of the stigma attached to intellectual disability affected individuals often become adept at hiding it even from their attorney not understanding the condition s importance to the outcome of their case Having explained such harsh realities and presented a comprehensive review of what intellectual disability is the book focuses on the 2002 U S Supreme Court Atkins v Virginia decision granting a death penalty exemption to individuals with intellectual disability It outlines best practice regarding the determination of intellectual disability and discusses qualifications needed for experts in such cases Related issues such as common misconceptions regarding people with intellectual disability race socioeconomic status and the status of foreign nationals as it relates to the death penalty and intellectual disability are discussed as well A must have resource for prosecutors defense lawyers and clinicians providing expert testimony in death penalty cases this book will also prove absorbing reading for anyone concerned about this troubling issue The Saccharine Disease T. L. Cleave,2013-10-22 The Saccharine Disease Conditions Caused by the Taking of Refined Carbohydrates such as Sugar and White Flour contends that the causation of these conditions has been obscured through confusing distinctions between unnatural refined carbohydrates and that of natural unrefined carbohydrates like

fruits and whole meal flour The author notes that all the foregoing conditions are really the manifestations of a single master disease that many of the major diseases of modern societies are caused by consuming unreasonable amounts of refined carbohydrate foods The author discusses that in the short time that man has changed his diet evolutionary adaptation is left behind He gives two rules to prevent and arrest all saccharine disease manifestations Do not eat any food unless you definitely want it and avoid eating white flour or white sugar These two rules will prevent gastric or duodenal ulcer diabetes coronary disease constipation complications of varicose veins hemorrhoids E coli infections obesity and some skin conditions As a retired Surgeon General of the Royal Navy the author bases his assumptions on evolutionary epidemiological and other scientific or historical work This book can give insights to dieticians food researchers nutritionists people on diet and general medicine practioners

Handbook of Positive Psychology in Schools Michael J. Furlong, Richard Gilman, E. Scott Huebner, 2009-03-04 National surveys consistently reveal that an inordinate number of students report high levels of boredom anger and stress in school which often leads to their disengagement from critical learning and social development If the ultimate goal of schools is to educate young people to become responsible and critically thinking citizens who can succeed in life understanding factors that stimulate them to become active agents in their own leaning is critical A new field labeled positive psychology is one lens that can be used to investigate factors that facilitate a student s sense of agency and active school engagement The purposes of this groundbreaking Handbook are to 1 describe ways that positive emotions traits and institutions promote school achievement and healthy social emotional development 2 describe how specific positive psychological constructs relate to students and schools and support the delivery of school based services and 3 describe the application of positive psychology to educational policy making By doing so the book provides a long needed centerpiece around which the field can continue to grow in an organized and interdisciplinary manner Key features include Comprehensive this book is the first to provide a comprehensive review of what is known about positive psychological constructs and the school experiences of children and youth Topical coverage ranges from conceptual foundations to assessment and intervention issues to service delivery models Intrapersonal factors e g hope life satisfaction and interpersonal factors e g positive peer and family relationships are examined as is classroom and school level influences e g student teacher and school community relations Interdisciplinary Focus this volume brings together the divergent perspectives methods and findings of a broad interdisciplinary community of scholars whose work often fails to reach those working in contiguous fields Chapter Structure to insure continuity flow and readability chapters are organized as follows overview research summary relationship to student development examples of real world applications and a summarizing table showing implications for future research and practice Methodologies chapters feature longitudinal studies person centered approaches experimental and quasi experimental designs and mixed methods
