Atlas Of Chinese Tongue Diagnosis Vol 1:

Tongue Image Analysis David Zhang, Hongzhi Zhang, Bob Zhang, 2017-02-28 This is the first book offering a systematic description of tongue image analysis and processing technologies and their typical applications in computerized tongue diagnostic CTD systems. It features the most current research findings in all aspects of tongue image acquisition, preprocessing, classification, and diagnostic support methodologies from theoretical and algorithmic problems to prototype design and development of CTD systems. The book begins with a very in-depth description of CTD on a need-to-know basis which includes an overview of CTD systems and traditional Chinese medicine (TCM) in order to provide the information on the context and background of tongue image analysis. The core part then introduces algorithms as well as their implementation methods at a know-how level, including image segmentation methods, chromatic correction, and classification of tongue images. Some clinical applications based on these methods are presented for the show-how purpose in the CTD research field. Case studies highlight different techniques that have been adopted to assist the visual inspection of appendicitis, diabetes, and other common diseases. Experimental results under different challenging clinical circumstances have demonstrated the superior performance of these techniques. In this book, the principles of tongue image analysis are illustrated with plentiful graphs, tables, and practical experiments to provide insights into some of the problems. In this way, readers can easily find a quick and systematic way through the complicated theories, and they can later even extend their studies to special topics of interest. This book will be of benefit to researchers, professionals, and graduate students working in the field of computer vision, pattern recognition, clinical practice, and TCM, as well as those involved in interdisciplinary research. **The Art and**

Practice of Diagnosis in Chinese Medicine Nigel Ching, 2017-05-18 This textbook is a complete diagnostic manual for students of Chinese medicine. It covers how to collect and collate the relevant information needed to make a diagnosis and clearly describes the various diagnostic models in Chinese medicine. *Atlas of Chinese Tongue Diagnosis* Barbara

Kirschbaum, 2000 This second volume of *Atlas of Chinese Tongue Diagnosis* works seamlessly with the first to facilitate the connection between the theory of tongue diagnosis and the reality of practice in the clinic. As in the first volume, the case histories and related photographs are organized around the various disharmonies of the organs. Here, however, the tongue signs are evaluated in the broader context of the other symptoms and clinical findings, including the vitality and constitution of the patient, to reveal the actual process of diagnosis and formulation of a treatment strategy in each case. This provides a true picture of how tongue diagnosis is integrated into the whole of diagnosis and treatment. [Handbook Of Traditional](#)
