Implementing Security for ATM Networks Thomas D. Tarman,Edward L. Witzke,2002 This book is a must read for professionals who have the responsibility of enforcing security policies within their ATM networks ATM security devices or simply need to better understand the mechanisms defined in the ATM Forum Security Specification 1 1 332 pp *ATM User-network Interface, Version 3.1 (UNI) Specification* ATM Forum,1994 *Network Consultants Handbook* Matthew Castelli,2002 A complete resource for assessing auditing analyzing and evaluating any network environment With *Network Consultants Handbook* you will Learn from network audit and evaluation guidelines that aid in data gathering and analysis of network environments Work with tables and calculations that help provide near real time answers to internetworking issues and challenges Learn network diagramming tips that aid consultants and engineers in preparing consistent drawings for in house documentation Discover how specific internetworking technologies fit into a design to create a networking solution for your customer Network consultants and engineers in today's industry continually face the challenge of assessing auditing and reviewing existing networks Documenting reviewing and analyzing these changes in a customer's network is more challenging today than in the past partly because of the explosive growth of converged applications and the Internet

Consultants and engineers often reinvent the wheel to gather and analyze relevant network information particularly when examining a client's network while having little or no background information. *Network Consultants Handbook* is a complete resource for assessing, auditing, analyzing, and evaluating any network environment. Intended for anyone who designs, manages, sells, administers, or desires to understand various internetworking technologies, *Network Consultants Handbook* demonstrates where and how to gather relevant information and how to analyze and document this information. Technology overviews peel away each layer of the network to provide a complete assessment. This book prepares you with form templates to complete during a network audit, necessary device commands to aid in obtaining necessary information, and consistent forms to aid in documentation. Networks are like snowflakes; no two are alike. This is the challenge that network consultants, engineers, managers, designers, and anyone else involved with networks must face every day. *Network Consultants Handbook* provides the resources you need to evaluate and design networks either as a desktop reference resource or in the field where the tables and calculations help provide near real-time answers to internetworking issues and challenges. Companion Web Site: The companion Web site for the book contains fully downloadable versions of the data gathering and analysis templates. These templates offer an easy-to-complete solution to gathering the data you need to complete your analysis of network environments. This book is part of the Cisco Press Networking Technologies Series, which offers networking professionals valuable information for constructing efficient networks, understanding new technologies, and building successful careers.

NETWORKING 2000. Broadband Communications, High Performance Networking, and Performance of Communication Networks Guy Pujolle, Harry Perros, Serge Fdida, Ulf Körner, Ioannis Stavrakakis, 2003-06-29. This was the first conference jointly organized by the IFIP Working Groups 6.2, 6.3, and 6.4. Each of these three Working Groups has its own established series of conferences. Working Group 6.2 sponsors the Broadband Communications series of conferences: Paris 1995, Montreal 1996, Lisboa 1997, Stuttgart 1998, and Hong Kong 1999. Working Group 6.3 sponsors the Performance of Communication Systems series of conferences: Paris 1981, Zurich 1984, Rio de Janeiro 1987, Barcelona 1990, Raleigh 1993, Istanbul 1995, and Lund 1998. Working Group 6.4 sponsors the High Performance Networking series of conferences: Aachen 1987, Liège 1988, Berlin 1990, Liège 1992, Grenoble 1994, Palma 1995, New York 1997, Vienna 1998. It is expected that this new joint conference will take place every two years. In view of the three sponsoring Working Groups, there were three separate tracks, one per Working Group. Each track was handled by a different co-chairman. Specifically, the track of Working Group 6.2 was handled by Ulf Körner, the track of Working Group 6.3 was handled by Ioannis Stavrakakis, and the track of Working Group 6.4 was handled by Serge Fdida. The overall program committee chairman was Harry Perros, and the general conference chairman was Guy Pujolle. A total of 209 papers were submitted to the conference, of which 82 were accepted. Each paper was submitted to one of the three tracks.
