ATMOSPHERE, CLIMATE, AND CHANGE

THOMAS E. GRAEDEL
PAUL J. CRUTZEN

Over the last century, human activity has changed the composition of the atmosphere in ways both significant and dangerous. As these changes have altered the global environment, the world of nature, and the human world, the need to understand the causes, effects, and possible solutions to these changes has become increasingly urgent. This book is a comprehensive and accessible introduction to the science of climate change, covering the physical, chemical, and biological processes that govern the Earth's climate system. It also discusses the human impact on the climate system and the potential consequences of climate change. The book is written for a general audience and is suitable for use as a textbook or a reference work.
