violent stellar explosions This Very Short Introduction takes us on a journey from the human scale of matter in the familiar everyday forms of solids liquids and gases to plasmas exotic forms of quantum matter and antimatter On the largest scales matter is sculpted by gravity into planets stars galaxies and vast clusters of galaxies All the matter that that we normally encounter however constitutes only 5% of the matter that exists The remaining 95% comes in two mysterious forms dark matter and dark energy Dark matter is necessary to stop the galaxies from flying apart and dark energy is needed to explain the observed acceleration of the expansion of the universe Geoff Cottrell explores the latest research into matter and shows that there is still a lot we don't know about the stuff our universe is made of
