Diouf, 2003-10-24 While most studies of the slave trade focus on the volume of captives and on their ethnic origins the question of how the Africans organized their familial and communal lives to resist and assail it has not received adequate attention But our picture of the slave trade is incomplete without an examination of the ways in which men and women responded to the threat and reality of enslavement and deportation Fighting the Slave Trade is the first book to explore in a systematic manner the strategies Africans used to protect and defend themselves and their communities from the onslaught of the Atlantic slave trade and how they assaulted it It challenges widely held myths of African passivity and general complicity in the trade and shows that resistance to enslavement and to involvement in the slave trade was much more pervasive than has been acknowledged by the orthodox interpretation of historical literature Focused on West Africa the essays collected here examine in detail the defensive protective and offensive strategies of individuals families communities and states In chapters discussing the manipulation of the environment resettlement the redemption of captives the transformation of social relations political centralization

Hargrove, 2015-12-09 This book

analyzes the Gold Coast and the Asante kingdom in the years following the abolition of the transatlantic slave trade and prior to the start of colonial rule The Asante state one of the largest in the Gold Coast and West Africa after the eighteenth century is the central focus of this work Studying their transition from a large scale supplier of captives to the transatlantic slave trade to traders in legitimate goods is a critical component that should be analyzed across West Africa This work highlights the political and economic relationships between the interior Asante state with surrounding African groups and Europeans chiefly British traders who entered the region in the eighteenth and nineteenth centuries      Trading Spaces Emma Hart, 2024-07-06 Looks at the shift from the marketplace as an actual place to a theoretical idea and how this shaped the early American economy When we talk about the economy the market is often just an abstraction While the exchange of goods was historically tied to a particular place capitalism has gradually eroded this connection to create our current global

trading systems In *Trading Spaces* Emma Hart argues that Britain's colonization of North America was a key moment in the market's shift from place to idea with major consequences for the character of the American economy Hart's book takes in the shops auction sites wharves taverns fairs and homes of seventeenth and eighteenth century America places where new mechanisms and conventions of trade arose as Europeans re-created or adapted continental methods to new surroundings Since those earlier conventions tended to rely on regulation more than their colonial offspring did what emerged in early America was a less fettered brand of capitalism By the nineteenth century this had evolved into a market economy that would not look too foreign to contemporary Americans To tell this complex transnational story of how our markets came to be Hart looks back farther than most historians of US capitalism rooting these markets in the norms of seventeenth and eighteenth century Britain Perhaps most important this is not a story of specific commodity markets over time but rather is a history of the trading spaces themselves the physical sites in which the grubby work of commerce occurred and where the market itself was born

 tourism even though it can be viewed as an intrinsic element of the social cultural experiences of tourism Liminality in  
 Tourism Spatial and Temporal Considerations aims to build upon the tradition of liminality as expounded in social and  
 anthropological disciplines elaborating on the theoretical principles and concepts found within certain aspects of the tourist  
 journey and tourist product The emergence of post modern society has impelled a change in the tourist gaze towards a more  
 experiential and adventuresome globalised experience An important aspect of the tourist phenomenon of liminality is where a  
 transformative experience is triggered by entering a liminoid tourist space leaving the tourist permanently psychologically

transformed before returning to normalised society The narrative provides a new perspective on the tourist experience with a provocative examination into the multidimensional aspects of tourism by exploring tourism within the spatial and temporal aspects of liminal landscapes Covid 19 has further changed the rubric of tourism Until the current pandemic tourism has basically been a fun experience In a post pandemic world however the tourist is now facing an unknown future which will almost certainly affect tourism liminality This book presents the reader with a wealth of examples and case studies closely illustrating the association between tourism and liminal experiences The geographical perspectives explore the more subconscious outcomes of destination and tourist product consumption The book should be a useful reader to tourism geography where the theory of liminality can be synthesized into tourist experiences The chapters in this book were originally published as a special issue of the journal Tourism Geographies
