Ischemic and hemorrhagic strokes are common neurological emergencies. In recent years, endovascular intervention has become a standard of care in treating acute ischemic stroke, aneurysms and vascular malformations. As a result, noninvasive CT and MRI based techniques have been increasingly used in emergency settings. In this context, neurovascular imaging has become an essential part of the curriculum for training emergency radiologists, stroke neurologists and vascular neurosurgeons. This book provides a comprehensive review of the entire spectrum of emergent neurovascular imaging with the emphasis on noninvasive CT angiography, CTA, MR angiography, MRA and perfusion techniques. It is organized into 11 chapters. The first three chapters address the topics of acute stroke imaging including algorithms based on recent clinical trials and updated American Heart Association stroke guideline vascular territories and stroke mimics. These are followed by discussions of cerebrovenous thrombosis, vasculopathies, aneurysms and vascular malformations. Remaining chapters are devoted to the traumatic neurovascular injury as well as the relatively rare, albeit important topics of head and neck vascular emergencies and spinal vascular diseases. The book has an image rich format including more than 300 selected CT, MRI or digital subtraction angiography (DSA) images. **Atlas of Emergency Neurovascular Imaging** is an essential resource for physicians and related professionals, residents and fellows in emergency medicine, neuroradiology, emergency imaging, neurology and vascular neurosurgery and can successfully serve as a primary learning tool or a quick reference guide. **Emergency Radiology** Hani H. Abujudeh, 2016. **Emergency Radiology** presents a comprehensive review of emergency pathologies commonly encountered by practicing radiologists and residents in training. This book offers a guided approach to imaging diagnosis with examples of all imaging modalities complemented by the basics of interpretation and technique and the nuances necessary to arrive at the best diagnosis.
