African Cities Alternative Visions Of Urban Theory And Practice:

African Cities Professor Garth Myers, 2011-04-14 In this groundbreaking book Garth Myers uses African urban concepts and experiences to speak back to theoretical and practical concerns. He argues for a re-visioning, a seeing again and a revising of how cities in Africa are discussed and written about in both urban studies and African studies. Cities in Africa are still either ignored, banished to a different, other, lesser category of not quite cities, or held up as examples of all that can go wrong with urbanism in much of the mainstream and even critical urban literature. Myers instead encourages African studies and urban studies scholars across the world to engage with the vibrancy and complexity of African cities with fresh eyes. Touching on a diverse range of cities across Africa from Zanzibar to Nairobi, Cape Town to Mogadishu, Kinshasa to Dakar, the book uses the author's own research and a close reading of works by other scholars, writers and artists to help illuminate what is happening in and across the region's cities. *African Cities* Garth Andrew Myers, 2011 *African Cities and the Development Conundrum* Carole Ammann, Till Förster, 2018-10-16 This 10th thematic volume of International Development Policy presents a collection of articles exploring some of the complex development challenges associated with Africa's recent but extremely rapid pace of urbanisation that challenges still predominant but misleading images of Africa as a rural continent. Analysing urban settings through the diverse experiences and perspectives of inhabitants and stakeholders in cities across the continent, the authors consider the evolution of international development policy responses amidst the unique historical, social, economic and political contexts of Africa's urban development. Contributors include Carole Ammann, Claudia Baez Camargo, Claire Binit Gbaffou, Karen Bischer, Aba Obrumah, Crentsil Sascha, Delz Ton Dietz, Till Förster, Lucy Koechlin, Lalli Metsola, Garth Myers, George Owusu, Edgar Pieterse, Sebastian Prothmann, Warren Smit and Florian Stoll. Everyday Urban Practices in Africa Nadine Appelhans, Carmel Rawhani, Marie Huchzermeyer, Basirat Oyalowo, Mfaniseni Fana Sihlongonyane, 2024-08-14 This book disrupts the dominant underlying international norms informing urban development strategies across African cities. International policy frameworks have created a new universal agenda for developing cities. However, these frameworks have also imposed global paradigms and discourses that are often in conflict with local urbanisms. As we approach the deadline for achieving the Sustainable Development Goals, there is a need for reflection and deliberation on a post-2030 agenda. The authors identify powerful assumptions, norms and positionalities that obfuscate the efforts to achieve sustainable development in African cities as well as along the North-South divide. They argue that a disruptive critique of these normative concepts grounded in the lived African urban everyday opens up opportunities to dismantle their assumed neutrality. Through disruption, the authors critically re-interpret the meanings of policy and the praxis of local urbanism, ultimately challenging the logic of universalising concepts underpinning implementation in the current international policy system and asserting the need for contextualised urban policies. The book will be of interest to scholars and students of urban studies, development planning, urban governance, human settlements, development studies, urban

geography and African studies It will also be useful for practitioners including town and regional urban planners urban policy consultants and international development cooperation agencies The Open Access version of this book available at <http://www.taylorfrancis.com> has been made available under a Creative Commons Attribution Non Commercial No Derivatives CC BY NC ND 4.0 license

COVID-19 Lockdowns and the Urban Poor in Harare, Zimbabwe Johannes Itai Bhanye, Fortune Mangara, Abraham R. Matamanda, Lameck Kachena, 2023-12-09 This book focuses on the socio economic impacts of the COVID 19 pandemic and associated lockdowns on the welfare of the urban poor in the city of Harare Zimbabwe The authors look through the lenses of the urban health penalty the right to the city complexity theory and distributive justice theory These four theories help situate the COVID 19 pandemic and its impacts on the urban poor in the theoretical foundations that raise issues of how the poor are affected by disease health pandemics due to their living conditions Uniquely the authors use remote ethnography tools such as rich texts video diaries and photo uploads to provide evidence based stories of how COVID 19 mobility restrictions have affected poor urbanites in Harare The book concludes that the COVID 19 pandemic mandatory lockdowns have deepened social and spatial inequality among the urban poor threatening their right to the city The socio economic impacts can upsurge poverty increase unemployment and the risks of hunger and food insecurity reinforce existing inequalities and break social harmony in the cities even past the COVID 19 pandemic period These socioeconomic impacts must be considered to make just cities for all from a right to the city perspective The authors recommend that mandatory COVID 19 lockdowns should not only be treated as a law and order operation but as a medical intervention to stem the spread of the virus backed by measures to safeguard the livelihoods of the urban poor while also protecting the economy This means governments should provide social safety nets to informal sector operators whose income generating activities are affected the most during the time of emergencies like COVID 19 Planners and policymakers should re envision pandemic resilient cities that are just equitable resilient and sustainable [Africa's Urban Revolution](#)
