O'Sullivan,2013 This Handbook sets out the key issues and debates in the theory and practice of wetland archaeology which has played a crucial role in studies of our past Due to the high quantity of preserved organic materials found in humid environments the study of wetlands has allowed archaeologists to reconstruct people's everyday lives in great detail

*Ethnoarchaeology of the Kel Tadrart Tuareg* Stefano Biagetti,2014-07-19 This book focuses on the issues of resilience and variability of desert pastoralists explicitly challenging a set of traditional topics of the discourse around pastoralism in arid lands of the Old World Based on a field research carried out on the Kel Tadrart Tuareg in Libya various facets of a surprisingly successful adaptation to an extremely arid environment are investigated By means of an ethnoarchaeological approach explored are the Kel Tadrart interactions with natural resources the settlement patterns the campsite structures and the formation of the pastoral archaeological landscape focusing on variability and its causes The resilience of the Kel Tadrart is the key to understand the reasons of their choice to stay and live in the almost rainless Acacus Mountains in spite of strong pressure to sedentarize in the neighboring oases Through the collection of the interviews participant observation mapping of inhabited and abandoned campsites remote sensing and archival sources various and different Kel Tadrart strategies perceptions and material cultures are examined This book fills an important gap in the ethnoarchaeological research in central Sahara and in the study of desert pastoralism Desert lands are likely to increase over the next decades but our knowledge of human adaptations to these areas of the world is still patchy and generally biased by the idea that extremely arid lands are not suited for human occupation **Feast, Famine or Fighting?** Richard J. Mendoza,2017-01-20 The advent of social complexity has been a longstanding debate among social scientists Existing theories and approaches involving the origins of social complexity include environmental circumscription population growth technology transfers prestige based and interpersonal group competition organized conflict perennial wartime leadership wealth finance opportunistic leadership climatological change transport and trade monopolies resource circumscription surplus and redistribution ideological imperialism and the consideration of individual agency However recent approaches such as the inclusion of bioarchaeological perspectives prospection methods systematically investigated archaeological sites along with emerging technologies are necessarily transforming our understanding of socio cultural evolutionary processes In short many pre existing ways of explaining the origins and development of social complexity are being reassessed Ultimately the contributors to this edited volume challenge the status quo regarding how and why social complexity arose by providing revolutionary new understandings of social inequality and socio political evolution **Archaeology in Africa. **and perspectives on laboratory & fieldwork research** Savino di Lernia, Marina Gallinaro, 2019-09-24 Africa encompasses a multitude of environments and biomes that require specific scientific strategies from desktop studies to field research to laboratory analysis to tackle research questions that may range from the emergence of early humans to the ethnoarchaeological investigation. In several areas, turmoil, social instability and security constraints hamper or limit field activities and long-term funded programs. The kidnapping of German colleagues and the tragic death of two local collaborators in Nigeria urge to rethink our agenda and challenge our view of current research practice. This 1st Workshop on Archaeology in Africa, organized by Sapienza University of Rome, convened several researchers from Italy or Italy-based researchers. The aim was to present and discuss theoretical, methodological and financial problems for Africanist researchers today. In a global perspective, the synergy between research groups is crucial. The need to intensify the national and international cooperation is also an essential step. This book collects a selection of the different perspectives presented to the workshop, mostly focussing on North Africa and East Africa.

**International Handbook of Historical Archaeology** Teresita Majewski, David Gaimster, 2009-06-07 In studying the past, archaeologists have focused on the material remains of our ancestors. Prehistorians generally have only artifacts to study and rely on the diverse material record for their understanding of past societies and their behavior. Those involved in studying historically documented cultures not only have extensive material remains but also contemporary texts, images and a range of investigative technologies to enable them to build a broader and more reflexive picture of how past societies, communities and individuals operated and behaved. Increasingly, historical archaeology refers not to a particular period, place or a method but rather an approach that interrogates the tensions between artifacts and texts irrespective of context. In short, historical archaeology provides direct evidence for how humans have shaped the world we live in today.

Historical archaeology is a branch of global archaeology that has grown in the last 40 years from its North American base into an increasingly global community of archaeologists each studying their area of the world in a historical context Where historical archaeology started as part of the study of the post Columbian societies of the United States and Canada it has now expanded to interface with the post medieval archaeologies of Europe and the diverse post imperial experiences of Africa Latin America and Australasia The 36 essays in the International Handbook of Historical Archaeology have been specially commissioned from the leading researchers in their fields creating a wide ranging digest of the increasingly global field of historical archaeology The volume is divided into two sections the first reviewing the key themes issues and approaches of historical archaeology today and the second containing a series of case studies charting the development and current state of historical archaeological practice around the world This key reference work captures the energy and diversity of this global discipline today

**The Routledge Handbook of Archaeology and Globalization** Tamar Hodos, 2016-11-18 This unique collection applies globalization concepts to the discipline of archaeology using a wide range of global case studies from a group of international specialists The volume spans from as early as 10 000 cal BP to the modern era analysing the relationship between material culture complex connectivities between communities and groups and cultural change Each contributor considers globalization ideas explicitly to explore the socio cultural connectivities of the past In considering social practices shared between different historic groups and also the expression of their respective identities the papers in this volume illustrate the potential of globalization thinking to bridge the local and global in material culture analysis The Routledge Handbook of Archaeology and Globalization is the first such volume to take a world archaeology approach on a multi period basis in order to bring together the scope of evidence for the significance of material culture in the processes of globalization This work thus also provides a means to understand how material culture can be used to assess the impact of global engagement in our contemporary world As such it will appeal to archaeologists and historians as well as social science researchers interested in the origins of globalization

**The Archaeology of Slavery** Lydia Wilson Marshall, 2015 The Archaeology of Slavery grapples with both the benefits and complications of a comparative approach to the archaeology of slavery Contributors from different archaeological subfields including American African prehistoric and historical consider how to define slavery identify it in the archaeological record and study slavery as a diachronic process that covers enslavement to emancipation and beyond Themes include how to define slavery how to identify slavery archaeologically enslavement and emancipation and the politics and ethics of slavery related research

**The Archaeology of Southern Africa** Peter Mitchell, 2024-06-06 Some of humanity s earliest ancestors lived in southern Africa and evidence from sites there has inspired key debates on human origins and the emergence of complex cognition Building on its rich rock art heritage archaeologists have developed theoretical work that continues to influence rock art studies worldwide with the relationship between archaeological and anthropological data central to understanding past hunter gatherer pastoralist and

farmer communities alike New work on pre colonial states contests models that previously explained their emergence via external trade while the transformations wrought by European colonialism are being rewritten to emphasise Indigenous agency feeding into efforts to decolonise the discipline itself Inhabited by humans longer than almost anywhere else and with an unusually varied complex past southern Africa thus has much to contribute to archaeology worldwide In this revised and updated edition Peter Mitchell provides a comprehensive and extensively illustrated synthesis of its archaeology over more than three million years Contemporary Archaeology in Theory Robert W. Preucel, Stephen A. Mrozowski, 2011-10-04 The second edition of *Contemporary Archaeology in Theory* The New Pragmatism has been thoroughly updated and revised and features top scholars who redefine the theoretical and political agendas of the field and challenge the usual distinctions between time space processes and people Defines the relevance of archaeology and the social sciences more generally to the modern world Challenges the traditional boundaries between prehistoric and historical archaeologies Discusses how archaeology articulates such contemporary topics and issues as landscape and natures agency meaning and practice sexuality embodiment and personhood race class and ethnicity materiality memory and historical silence colonialism nationalism and empire heritage patrimony and social justice media museums and publics Examines the influence of American pragmatism on archaeology Offers 32 new chapters by leading archaeologists and cultural anthropologists
