After Multiculturalism The Politics Of Race And The Dialectics Of Liberty:

After Multiculturalism John F. Welsh, 2007-12-12 *After Multiculturalism The Discourse on Race and the Dialectics of Liberty* provides a unique critique of multiculturalist thought in social theory and public policy from an individualist perspective Contemporary academic and policy discourse on race and racism in the United States is dominated by collectivist social theories that are founded on the idea that the only meaningful challenges to racism are those that foster collective social identities and seek to influence and direct the use of state power in the interest of particular racial and ethnic groups Multiculturalism is the prevailing incarnation of anti racist thought that informs and mediates political process and organizational life in the United States The multicultural discourse on race has become tribalist anti western anti market and statist *After Multiculturalism* challenges the notion that collectivist and statist ideologies own racism as an educational and public policy issue Welsh demonstrates that individualist philosophies entail critiques of racism that follow directly from their anti collectivist and anti statist foundations He argues that multiculturalism is unlikely to promote the types of social action and changes essential to overcoming racism and that the individualist and libertarian ideas discussed in the book make important contributions toward the realization of a world free of racial domination To this end the ideas of Ayn Rand Murray Rothbard Benjamin Benjamin Tucker Lysander Spooner Max Stirner and contemporary libertarian scholars are discussed to the lay the foundation for a critique of multiculturalism The book explores the concepts of post ethnicity and transracialism as individualist and libertarian expressions of a society after multiculturalism Welsh s discussions of transracialism and post ethnicity constitute unique and important contributions to social thought This book will hold great interest for scholars and students concerned with race ethnicity political theory or individualist thought as well as scholars and students of the history of ideas

Max Stirner's Dialectical Egoism John F. Welsh, 2010-01-01 Max Stirner 1806 1856 is recognized in the history of political thought because of his egoist classic *The Ego and Its Own* Stirner was a student of Hegel and a critic of the Young Hegelians and the emerging forms of socialist and communist thought in the 1840s Max Stirner s *Dialectical Egoism A New Interpretation* examines Stirner s thought as a critique of modernity by which he meant the domination of culture and politics by humanist ideology In Stirner s view humanity is the supreme being of modernity and humanism is the prevailing legitimization of social and political domination Welsh traces Stirner s thought from his early essays to *The Ego and Its Own* and Stirner s responses to his critics He also examines how Benjamin Tucker James L Walker and Dora Marsden applied Stirner s dialectical egoism to the analysis of a the transformations of capitalism b culture ethics and mass psychology and c feminism socialism and communism All three viewed Stirner as a champion of individuality against the collectivizing and homogenizing forces of the modern world Welsh also takes great care to dissociate Stirner s thought from that of the other great egoist critic of modernity Friedrich Nietzsche He argues that the similarities in the dissidence of Stirner and Nietzsche are superficial The book concludes with an interpretation of Stirner s thought as a form of dialectical egoism that includes a

multi tiered analysis of culture society and individuality b the basic principles of Stirner s view of the relationship between individuals and social organization and c the forms of critique he employs Stirner s critique of modernity is a significant contribution to the growing literature on libertarianism dialectical analysis and post modernism **Rethinking Social Studies** E. Wayne Ross,2017-03-01 Like the schools in which it is taught social studies is full of alluring contradictions It harbors possibilities for inquiry and social criticism liberation and emancipation Social studies could be a site that enables young people to analyze and understand social issues in a holistic way finding and tracing relations and interconnections both present and past in an effort to build meaningful understandings of a problem its context and history to envision a future where specific social problems are resolved and take action to bring that vision in to existence Social studies could be a place where students learn to speak for themselves in order to achieve or at least strive toward an equal degree of participation and better future Social studies could be like this but it is not Rethinking Social Studies examines why social studies has been and continues to be profoundly conversing in nature the engine room of illusion factories whose primary aim is reproduction of the existing social order where the ruling ideas exist to be memorized regurgitated internalized and lived by Rethinking social studies as a site where students can develop personally meaningful understandings of the world and recognize they have agency to act on the world and make change rests on the premises that social studies should not show life to students but bringing them to life and that the aim of social studies is getting students to speak for themselves to understand people make their own history even if they make it in already existing circumstances These principles are the foundation for a new social studies one that is not driven by standardized curriculum or examinations but by the perceived needs interests desires of students communities of shared interest and ourselves as educators Rethinking Social Studies challenges readers to reconsider conventional thought and practices that sustain the status quo in classrooms schools and society by critically engaging with questions and issues such as neutrality in the classroom how movement conservatism shapes the social studies curriculum how corporate driven education affects schools teachers and curriculum ways in which teachers can creatively disrupt everyday life in the social studies classroom going beyond language and inclusive content in social justice oriented teaching making critical pedagogy relevant to everyday life and classroom practice the invisibility of class in the social studies curriculum and how to make it a central organizing concept class war class consciousness and social studies in the age of empire what are your ideals as a social studies education and how do you keep them and still teach and what it means to be a critical social studies educator beyond the classroom Europe's 21st Century Challenge Didier Bigo,R.B.J. Walker,2016-07-22 This volume presents the final results of the CHALLENGE research project The Changing Landscape of European Liberty and Security a five year project funded by the Sixth Framework Programme of DG Research of the European Commission The book critically appraises the liberties of citizens and others within the EU and the different ways in which they are affected by the proliferation of discourses practices and norms of insecurity enacted in the

name of collective and individual safety It analyses from an interdisciplinary perspective the impacts of new techniques of surveillance and control on the liberty and security of the citizen The book studies illiberal practices of liberal regimes in the field of security and the relationship between the internal and external effects of these practices in an increasingly interconnected world as well as the effects in relation to the place of the EU in world politics Contemporary Social Studies William B. Russell, 2012-02-01 The field of social studies is unique and complex It is challenged by the differing perspectives related to the definition goals content and purpose of social studies Contemporary Social Studies An Essential Reader discusses the contemporary issues surrounding social studies education today Contemporary Social Studies An Essential Reader encourages and inspires readers to think The chapters included in this volume are written by prominent scholars in the field of social studies The collection inspires and provokes readers to reconsider and reexamine social studies and its contemporary state Readers will explore the various critical topics that encompass contemporary social studies This collection provides readers with rich chapters which are sure to be cited as key works Compelling and accessible this collection brings to light the critical topics relevant to contemporary social studies and is sure to serve as a cornerstone and seminal text for the future **Transcultural Cities** Jeffrey Hou, 2013 Transcultural Cities collects case studies of intercultural exchange and the urban transformations that have accompanied it Jeffrey Hou and a talented team of multidisciplinary scholars argue for a more critical and open view of cities urban places and placemaking as vehicles for cross cultural understanding **Colonial Frames, Nationalist Histories** Mrinalini Rajagopalan, 2024-12-15 In recent years there has been a growing debate on the various ways that architecture and urbanism have served the triad of colonialism nationalism and modernity Some have argued that newly decolonized nations sought to represent their modernity through the spaces and symbols of their new national capitals while other scholars have stressed that while the forms and processes of architectural modernization have no doubt served as aids to various nation building projects it is the specific role of individual agents such as planners architects an emerging twentieth century bourgeois citizen or colonial administrators in this national project that needs attention However many such explorations of this subject have so far taken the form of monographs that concentrate on one city thereby limiting the scope required to address the broader questions at hand By juxtaposing case studies from various colonial and postcolonial settings from around the world this edited volume provides a comprehensive and diachronic investigation of the ways in which architecture and urban space mediate the intersections of colonialism nationalism and modernity Examining such spaces as archaeological sites memorials new buildings or historic urban fabric the book questions certain established dichotomies such as that of the imperial center and the colonized periphery the colonial past and the postcolonial present or the isolation of the national or local from the global Besides offering unique historical perspectives on colonialism nationalism and modernity each case study also reassesses theories regarding memory and monumentalization the appropriation and deployment of tradition in the service of

nationalism and the institutions of modernity A common thread throughout the essays in this volume is a focus on new loci of power that emerge either in collision with colonial power structures or in collaboration with or those that emerge in the wake of decolonization While the authors recognize the presence of a larger structure of colonial hegemony they also investigate those centers of power that emerge in the interstices of crevices of colonial power Interdisciplinary and theoretically innovative this book offers a global perspective on colonial and national landscapes rewrites the master creator narrative examines national landscapes as sites of contestation and views the globalization of processes such as archaeology beyond the boundaries of the national

Education as Enforcement Kenneth Saltman, David A. Gabbard, 2010-09-13 The first volume to focus on the intersections of militarization corporations and education Education as Enforcement exposed the many ways schooling has become the means through which the expansion of global corporate power are enforced Since publication of the first edition these trends have increased to disturbing levels as a result of the extensive militarization of civil society the implosion of the neoconservative movement and the financial meltdown that radically called into question the basic assumptions undergirding neoliberal ideology An understanding of the enforcement of these corporate economic imperatives remains imperative to a critical discussion of related militarized trends in schools whether through accountability and standards school security or other discipline based reforms Education as Enforcement elaborates upon the central arguments of the first edition and updates readers on how recent events have reinforced their continued original relevance In addition to substantive updates to several original chapters this second edition includes a new foreword by Henry Giroux a new introduction and four new chapters that reveal the most contemporary expressions of the militarization and corporatization of education New topics covered in this collection include zero tolerance foreign and second language instruction in the post 9 11 context the rise of single sex classrooms and the intersection of the militarization and corporatization of schools under the Obama administration

The Dialectics of Liberty Chris Matthew Sciabarra, Edward W. Younkins, Roger E. Bissell, 2019-06-04 This collection of essays explores the ways in which the defense of liberty can be bolstered by use of a dialectical method that is a mode of analysis devoted to grasping the full context of philosophical cultural and social factors requisite to the sustenance of human freedom Its strength lies in the variety of disciplines and perspectives represented by contributors who apply explicitly dialectical tools to a classical liberal libertarian analysis of social and cultural issues In its conjoining of a dialectical method typically associated with the socialist left to a defense of individual liberty typically associated with the libertarian right this anthology challenges contemporary attitudes on both ends of the political spectrum Though this conjunction of dialectics and liberty has been explored before in several works including a trilogy of books written by one of our coeditors Chris Matthew Sciabarra this volume will be the first one of its kind to bring together accomplished scholars in political science economics philosophy aesthetics psychology law history education and rhetoric

Genuine Multiculturalism Cecil Foster, 2013-12-01 While many modern societies are noted for

their diversity the resulting challenge is to determine how citizens from different backgrounds and cultures can see themselves and each other as equals and be treated equally In *Genuine Multiculturalism* Cecil Foster shows that a society's failure to bridge these differences is the tragedy of modern living and that pretending it is possible to mechanically develop fraternity and solidarity among diverse groups is akin to seeking out comedy Arguing that genuine multiculturalism is the search for social justice by individuals who have been trapped by ascribed identities or newcomers who have been shut out of perceived ethnic homelands Foster details how this process in essence is the story of the Americas Reconceptualizing the terms of multiculturalism he offers an intervention into Canada's claim that its definition and practice are based on recognizing equality of citizenship Identifying genuine multiculturalism as an ongoing work in progress rather than a tightly defined policy position Foster challenges readers to imagine a greater and more harmonious ideal A necessary theoretical reconsideration of diversity within society *Genuine Multiculturalism* refocuses the debate about ideals and practices in modern societies

Diversity in Decline? Arjun Tremblay, 2018-12-28 In this book Arjun Tremblay considers the future of multiculturalism contextualised within an ideological and political shift to the right Is there any hope that multiculturalism will survive alongside the rise of the political right across democracies How can policy makers continue to recognize and to accommodate minorities in an increasingly inhospitable ideological environment Based on evidence from three case studies Tremblay develops a hypothesis of multicultural outcomes arguing that while the threat to multiculturalism is real there still is hope and that not only is the fate of minority rights in liberal democracies far from sealed but it may still be possible to further protect the rights of immigrant and other minority groups in years to come In order to do this proponents of diversity politics may need to reconceptualise multiculturalism and other minority rights along instrumental lines as a means to fulfil policy objectives above and beyond the recognition and accommodation of immigrant minorities This will be an important read for scholars interested in minority rights multiculturalism diversity politics comparative politics institutionalism right wing and far right studies and public policy

Il giudice antropologo. Costituzione e tecniche di composizione dei conflitti multiculturali Ilenia Ruggiu, 2013-01-09T00:00:00+01:00 1590 2 *Culture and the Judiciary* Ilenia Ruggiu, 2018-12-07 How can jurists resolve multicultural conflicts Which kind of questions should judges ask when culture enters the horizon of the law Are they then called to become anthropologists Through the analysis of hundreds of cases produced through decades of multicultural jurisprudence this book reconstructs the constitutional and anthropological narratives and the legal techniques used by Western judges to face the challenges posed by multiculturalism from Japanese parent child suicide to the burqa from Jewish circumcision to Roma begging from kissing a son on his genitals to the claim of indigenous people to fish salmon in natural parks the book brings the reader into a fascinating journey at the crux of the encounter between the relativism of anthropology and the endeavor toward a democratic coexistence pursued by the law After identifying the recurrent themes or topoi used by judges and lawyers this book critically analyzes them evaluates their persuasive power and suggests a

cultural test that gathers together the crucial questions to be answered when resolving a multicultural dispute The cultural test is a matrix that guides the judge lawyers and legislatures across the intricate paths of multiculturalism to assure a relational dialogue between the law and anthropology **Bibliographic Index** ,2010 **Book Review Index - 2009**
