Prologue to Violence Abby Stein, 2013-09-05 Despite mounting references to the transgenerational transmission of violence we still lack a compelling understanding of the linkage between the interpersonal violence of early life and the criminal violence of adulthood In *Prologue to Violence* Abby Stein draws on the gripping narratives of 65 incarcerated subjects and extensive material from law enforcement files to remedy this lacuna in both the forensic and psychodynamic literature In the process she calls into question prevailing beliefs about criminal character and motivation For Stein the early trauma to which adult criminals are subjected remains unformulated and as such unavailable for reflection Contrary to common belief these criminals especially sex murderers do not commit their crimes in a rational or fully conscious way They

are not driven by deviant fantasy their psychopathy is not inborn and they rarely commit acts of violence without conscience Stein's interdisciplinary analysis of her data infuses contemporary relational psychoanalysis with the insights of neuroscience traumatology criminology and cognitive and narrative psychology A powerful challenge to offender treatment programs to address the shaping impact of childhood trauma rather than merely to correct the cognitions of violent offenders Prologue to Violence will be equally compelling to researchers and academics investigating child abuse and adult violence Its mental health readership will be broad and deep ranging beyond clinicians who work with offender populations to all therapists who wrestle with experiences of dissociation and aggressive enactment in everyday life Impulsivity and Aggression Eric Hollander, Dan J. Stein, 1995-03-28 Impulsivity and aggression have undergone considerable research scrutiny in recent years and will comprise a major research topic in psychiatry over the next decade Violence is a public health issue of great concern and advances in our knowledge of the psychiatry of aggression and disorders of impulse control are therefore of tremendous importance Specifically addressing diagnostic epidemiologic evolutionary neurobiological neuropsychological and legal issues this timely text brings together a large array of diverse data to provide a unique comprehensive and up to date account of this subject Specific impulse control disorders personality disorders and related disorders such as self mutilation bulimia substance abuse and neurological trauma are discussed Treatment strategies particularly psychopharmacology new agents undergoing trials and psychological approaches are reviewed No single work has yet attempted to address systematically the phenomenology neurobiology and treatment of impulsivity aggression and disorders of impulse control Written by leading world authorities in their field this text will have a wide audience including researchers and clinicians in psychiatry psychology psychopharmacology and mental health care as well as those in the fields of social and health policy
