## **A Survey Of Ecological Economics Frontier Issues In Economic Thought:**

A Survey of Ecological Economics Rajaram Krishnan, Jonathan Harris, Neva R. Goodwin, 2013-04-22 The emergent discipline of ecological economics is based on the idea that the world's economies are a function of the earth's ecosystems and an idea that radically reverses the world view of neoclassical economics A Survey of Ecological Economics provides the first overview of this new field and a comprehensive and systematic survey of its critical literature The editors of the volume summarize ninety five seminal articles selected through an exhaustive survey that advance the field of ecological economics and represent the best thinking to date in the area Each two to three page summary is far more comprehensive than a typical abstract and presents both the topics covered in each paper and the most important arguments made about each topic Sections cover historical perspective definition scope and interdisciplinary issues theoretical frameworks and techniques energy and resource flow analysis accounting and evaluation North South international issues ethical social institutional issues Each section is preceded by an introductory essay that outlines the current state of knowledge in the field and proposes a research agenda for the future A Survey of Ecological Economics is the first volume in the Frontier Issues in Economic Thought series produced by the Global Development And Environment Institute at Tufts University

**A Survey of Sustainable Development** Jonathan Harris, Timothy Wise, Kevin Gallagher, Neva R. Goodwin, 2013-04-16 Perpetual economic growth is physically impossible on a planet with finite resources Many concerned with humanity's future have focused on the concept of sustainable development as an alternative as they seek means of achieving current economic and social goals without compromising the ability of future generations to meet their own goals Sustainable development brings together elements of economics public policy sociology ecology resource management and other related areas and while the term has become quite popular it is rarely defined and even less often is it understood A Survey of Sustainable Development addresses that problem by bringing together in a single volume the most important works on sustainable human and economic development It offers a broad overview of the subject and gives the reader a quick and thorough guide to this highly diffuse topic The volume offers ten sections on topics including economic and social dimensions of sustainable development the North South balance population and the demographic transition agriculture and renewable resources energy and materials use globalization and corporate responsibility local and national strategies Each section is introduced with an essay by one of the volume editors that provides an overview of the subject and a summary of the mainstream literature followed by two to three page abstracts of the most important articles or book chapters on the topic A Survey of Sustainable Development is the sixth and final volume in the Frontier Issues of Economic Thought series produced by the Global Development And Environment Institute at Tufts University Each book brings together the most important articles and book chapters in a frontier area of economics where important new work is being done but has not yet been incorporated into the mainstream of economic study The book is an essential reference for students and scholars concerned with

economics environmental studies public policy and administration international development and a broad range of related fields

**Ecological Economics** Peter Soderbaum, 2013-11-05 Ecological economics seeks to socially construct a political economics which will deal successfully with environmental problems and make the individual more visible in economic analysis The author describes the principles strategies and instruments of social change for key players governmental agencies business corporations environmental and religious organizations and universities and underlines their responsibilities in the market economy Peter Soderbaum emphasizes the need to articulate ideologies worldviews ethics and related scientific perspectives as part of economics and the importance of pluralism and democratic decision making His account of the theories and means that will bring us closer to a sustainable society consider tools such as environmental impact assessment EIA and describes success indicators such as environmental labelling and environmental management systems EMS It highlights strategies and policies that facilitate social change and sets out future agendas for the individual actors in political economics

**The Changing Nature of Work** Frank Ackerman, Neva R. Goodwin, Laurie Dougherty, Kevin Gallagher, 1998-10 Human impacts on the environment are largely driven by economic forces If a more ecologically sustainable world is to be achieved significant changes must be made to the current growth and consumption dependent economic system The Frontier Issues in Economic Thought series was designed to assist the growing number of economists and others who are responding to the need for new thinking about economics in the face of environmental and social forces that are reshaping the world The Changing Nature of Work examines the causes and effects of the rapid transformation of the world of work It provides concise summaries of the key writings on work and workplace issues extending the frontiers of labor economics to include the often overlooked social and psychological dimensions of work The book begins with a foreword by former Secretary of Labor Robert Reich that presents labor in contemporary perspective An introductory overview provides a brief history of the changing nature of work and situates current problems in the context of longer term developments Following that are eight topical sections that feature three to five page summaries for each of the ten to twelve most important articles or book chapters on a subject Sections cover new directions in labor economics social and psychological dimensions of work and unemployment globalization and labor new technologies and organizational change flexibility and internal labor markets new patterns of industrial relations family gender paid and unpaid work difference and diversity in the workplace The book provides a roadmap for scholars on the vast and diverse literature concerning labor issues and affords students a quick overview of that rapidly changing field It is an important contribution to the series and is a valuable book for anyone interested in labor as well as for students and scholars of labor economics industrial sociology industrial relations social psychology and their respective disciplines

**The Consumer Society** Neva R. Goodwin, Frank Ackerman, David Kiron, 2013-04-16 The developed countries particularly the United States consume a disproportionate share of the world's resources yet high and rising levels of consumption do not necessarily lead to greater satisfaction security or

well being even for affluent consumers The Consumer Society provides brief summaries of the most important and influential writings on the environmental moral and social implications of a consumer society and consumer lifestyles Each section consists of ten to twelve summaries of critical writings in a specific area with an introductory essay that outlines the state of knowledge in that area and indicates where further research is needed Sections cover Scope and Definition Consumption in the Affluent Society Family Gender and Socialization The History of Consumerism Foundations of Economic Theories of Consumption Critiques and Alternatives in Economic Theory Perpetuating Consumer Culture Media Advertising and Wants Creation Consumption and the Environment Globalization and Consumer Culture Visions of an Alternative This book is the second volume in the Frontier Issues in Economic Thought series which provides surveys of the most significant writings in emergent areas of economics an invaluable aid in fast growing fields where genuine new ground is being broken The series brings together economists sociologists psychologists and philosophers to develop analyses that challenge and enrich the dominant neoclassical paradigm The Consumer Society is an essential guide to and summary of the literature of consumption and will be of interest to anyone concerned with the deeper economic social and ethical implications of consumerism

Pertsova, 2007 This new book presents important research in the field of ecological economics which is a trans disciplinary field of academic research that addresses the dynamic and spatial interdependence between human economies and natural ecosystems Ecological economics brings together and connects different disciplines within the natural and social sciences but especially between these broad areas Ecological economics presents a more pluralistic approach to the study of environmental problems and policy solutions characterised by systems perspectives adequate physical and biological contexts and a focus on long term environmental sustainability

**Technology, Globalization, and Sustainable Development** Nicholas A Ashford, Ralph P Hall, 2018-08-06 Technology Globalization and Sustainable Development offers a unified transdisciplinary approach for transforming the industrial state in order to promote sustainable development The authors present a deep analysis of the ways that industrial states both developed and developing are currently unsustainable and how economic and social welfare are related to the environment to public health and safety and to earning capacity and meaningful and rewarding employment The authors offer multipurpose solutions to the sustainability challenge that integrate industrial development employment technology environment national and international law trade finance and public and worker health and safety The authors present a compelling wake up call that warns of the collision course set between the current paths of continued growth and inevitable unsustainability in the world today Offering clear examples and real solutions this textbook illustrates how the driving forces that are currently promoting unsustainability can be refocused and redesigned to reverse course and improve the state of the world This book is essential reading for those teaching and studying sustainable development and the critical roles of the economy employment and the environment

**Global Action for Biodiversity** Timothy Swanson, 2013-11-19 At the Rio Earth Summit in 1992 the nations of the world adopted the convention on Biological Diversity Since then over 160 countries have ratified the Convention three Conferences of the Parties have taken place and a permanent secretariat has been

established. Despite this, there remains a lot of uncertainty and even more controversy about what the Convention was intended to accomplish and how it was to do so. This book, published in association with the IUCN The World Conservation Union, sets out to answer some of these questions by recounting the history of the movements leading up to the Convention but especially by analysing the forces giving rise to the problem. It provides a specific set of policy prescriptions intended to facilitate the development of institutions and obligations within the international community which will give real effect to the aspirations of the Convention and ensure that it has some real effect at ground level. The author begins with an overview of the issues and then develops the basic nature of the problems within a bio-economic framework. He highlights the gaps in the Convention which remain to be filled, offers detailed explanations of the concepts involved and describes the nature of the solutions required. Thus he sets out a detailed plan for global action in support of an effective international convention for the conservation of biological diversity. The book is an excellent introduction to a very topical debate and a valuable reference point for conservationists, policy makers and students of development studies, environmental studies, environmental policy and conservation biology.

**Comparative Economic Theory** Masudul Alam Choudhury, 2013-03-14. *Comparative Economic Theory: Occidental and Islamic Perspectives* seeks first to elucidate the nature and methodology of Islamic political economy as a process-oriented social economy guided by its cardinal epistemology of Oneness of God/Divine Unity. From this premise is then derived the episteme of unification of knowledge upon which is developed the methodological content of an extremely interactive, integrative and revolutionary world view of political economy and a meta-theory of the socio-scientific order. Secondly, while laying out the building blocks of Islamic political economy and its much wider methodological implication for the socio-scientific order, this book offers a comparative study of Occidental thought in the same areas. Thirdly, topics of microeconomics and macroeconomic theory are covered. This book concludes with chapters on methodology and an analytical postscript to show how the interactive, integrative and evolutionary world view of knowledge induced systems described by the Islamic political economy presents new visions of scientific thinking.

**Globalisation, Economic Transition and the Environment** Phillip Lawn, 2013-09-30. This book focuses on three critical issues pertaining to the broader goal of sustainable development – namely the degenerative forces of globalisation, ecological sustainability requirements and how best to negotiate the economic transition process.

**Handbook of Alternative Theories of Political Economy** Stilwell, Frank, Primrose, David, Thornton, Tim B., 2022-05-13. This Research Handbook advances entrepreneurship theory in new ways by integrating and contributing to contemporary theories of practice. Leading theorists and entrepreneurship experts who are part of the growing Entrepreneurship as Practice (EaP) research community expertly propose methodologies, theories and empirical insights into the constitution and consequences of entrepreneuring practices.
