these fantastic cars from the early prototypes built in Shelby's Los Angeles shop to today's Ford engineered high tech performers. Written by one of the world's foremost authorities on Shelby automobiles, critically acclaimed author Colin Comer and with a foreword by Lee Iacocca, the American automobile executive credited with the successful development of the Mustang, this is the definitive account of the Shelby. When Ford wanted to toughen up its super successful new Mustang, they approached Carroll Shelby to give it the performance image it so sorely lacked. Beginning with a 1965 K Code 289 cubic inch powered Mustang fastback, Shelby applied the same formula that had made his Cobra sports cars such devastating performers both on and off the track: more horsepower, less weight, balanced handling. The GT350 quickly established itself as a bonafide force in SCCA B Production racing, twisting back roads and boulevards alike, setting the course for future Shelby Mustangs like the big block GT500. Though those original Shelby Mustangs were done by 1970, Ford dusted off its Shelby relationship in 2006 and has been producing high performance Ford Mustang Shelybs ever since. This is a must have read for any fan of American performance cars, whether you're a muscle era original or a 21st century stormer.

WALNECK'S CLASSIC CYCLE TRADER, APRIL 1998. Causey Enterprises, LLC.

1968 Shelby Mustang GT350, GT500 and GT500KR. Greg Kolasa, 2017-01-16. There were Mustangs and then there were Mustangs. Ford wanted its new little Pony Car to appeal to the masses and in executing that plan, the Mustang could be had in anything from a plain Jane version with an economical 6 cylinder engine, often referred to as a secretary's car, all the way up to the sporty GT models with optional 271 hp V 8s. Unfortunately, although road going Mustangs were considered sporty, they were not officially sports cars at least according to the Sports Car Club of America (SCCA). And Lee Iacocca knew that on track performance led to showroom performance, so he needed to go racing. Enter Carroll Shelby. Shelby worked with the SCCA to modify the Mustang to meet the SCCA's requirements and enter the racing arena. The result

was the now legendary Shelby Mustang This volume of CarTech's In Detail series covers the 1968 Shelby GT350 GT500 and GT500KR In 1968 Ford sought to take over much of the process of producing Shelby Mustangs and increased that production dramatically to meet anticipated sales demand so it was a bit of a transition year In an effort to appeal to muscle car fans rather than race fans the cars were losing their edgy race car feel and were becoming more high end performance road cars with a long list of performance and comfort options including 428 Cobra Jet Engines automatic transmissions and air conditioning They may have no longer been sports cars but they were now fantastic muscle cars As in all In Detail Series books you get an introduction and historical overview an explanation of the design and concepts involved in creating the car a look at marketing and promotion and an in depth study of all hardware and available options as well as an examination of where the car is on the market today Also included is an appendix of paint and option codes VIN and build tag decoders as well as production numbers
