Multiple Regression and Beyond Timothy Z. Keith, 2019-01-14 Companion Website materials <https://tzkeith.com>
Multiple Regression and Beyond offers a conceptually oriented introduction to multiple regression MR analysis and structural equation modeling SEM along with analyses that flow naturally from those methods By focusing on the concepts and purposes of MR and related methods rather than the derivation and calculation of formulae this book introduces material to students more clearly and in a less threatening way In addition to illuminating content necessary for coursework the accessibility of this approach means students are more likely to be able to conduct research using MR or SEM and more likely to use the methods wisely This book Covers both MR and SEM while explaining their relevance to one another Includes path analysis confirmatory factor analysis and latent growth modeling Makes extensive use of real world research examples in the chapters and in the end of chapter exercises Extensive use of figures and tables providing examples and illustrating key concepts and techniques New to this edition New chapter on mediation moderation and common cause New chapter on the analysis of interactions with latent variables and multilevel SEM Expanded coverage of advanced SEM techniques in chapters 18 through 22 International case studies and examples Updated instructor and student online resources

Conditional Process Analysis in Two-instance Repeated-measures Designs Amanda Kay Montoya, 2018 In this dissertation I propose a path analytic approach to assessing moderated mediation models for two instance repeated measures designs In Chapter 1 I review the development of conditional process analysis in between subjects designs In Chapter 2 I review existing methods for mediation and moderation in two instance repeated measures designs In Chapter 3 I provide a general framework for estimating conditional process models for two instance repeated measures designs with one moderator and one mediator I describe how simplifications of this general model correspond to more commonly used conditional process models such as first stage conditional process models and second stage conditional process models In Chapter 4 I provide examples of the models described in Chapter 3 using data sets from a variety of areas of psychology These examples show how to implement conditional process analysis and how to interpret the results of such an analysis
