Animals In The Anthropocene Critical Perspectives On Non Human Futures Animal Publics:

Animals in the Anthropocene Edited by the Human Animal Research Network Editorial Collective, 2015-06-16 Much of the discussion on the Anthropocene has centred upon anthropogenic global warming and climate change and the urgency of political and social responses to this problem *Animals in the Anthropocene critical perspectives on non human futures* shows that assessing the effects of human activity on the planet requires more than just the quantification of ecological impacts towards the categorisation of geological eras It requires recognising and evaluating a wide range of territories and terrains full of non human agents and interests and meanings exposed to the profound forces of change that give their name to the Anthropocene It is from the perspective of the animal question asking how best to think and live with animals that *Animals in the Anthropocene* seeks to interrogate the Anthropocene as a concept discourse and state of affairs The term Anthropocene is a useful device for drawing attention to the devastations wreaked by anthropocentrism and advancing a relational model for human and non human life The effects on animals of human political and economic systems continue to expand and intensify in numerous domains and in ways that not only cause suffering and loss but that also produce new forms of life and alter the very nature of species As anthropogenic change affects the more than human world in innumerable ways we must accept responsibility for the damage we have caused and the debt we owe to non human species **Animals in the**

Anthropocene Human Animal Research Network Editorial Collective, 2015 The term Anthropocene is a useful device for drawing attention to the devastations wreaked by anthropocentrism and for advancing a relational model for human and non human life As anthropogenic change affects the more than human world we must accept responsibility for the damage we have caused and the debt we owe to non human species *Anthropocene Encounters: New Directions in Green Political*

Thinking Frank Biermann, Eva Löwbrand, 2019-02-07 Explores the significance of the Anthropocene for environmental politics analysing political concepts in view of contemporary environmental challenges **The Oxford Handbook of Animal**

Organization Studies Linda Tallberg, Lindsay Hamilton, 2022 This interdisciplinary book lays out the contours of a new academic discipline Animal Organization Studies thus answering timely calls for more attention to nonhuman life in traditionally human centred fields in social science *Ethnography after Humanism* Lindsay Hamilton, Nik

Taylor, 2017-06-19 This book argues that qualitative methods ethnography included have tended to focus on the human at the cost of understanding humans and animals in relation and that ethnography should evolve to account for the relationships between humans and other species Intellectual recognition of this has arrived within the field of human animal studies and in the philosophical development of posthumanism but there are few practical guidelines for research Taking this problem as a starting point the authors draw on a wide array of examples from visual methods ethnodrama poetry and movement studies to consider the political philosophical and practical consequences of posthuman methods They outline the possibilities for creative new forms of ethnography that eschew simplistic binaries between humans and animals *Ethnography after*

Humanism suggests how researchers could conduct different forms of fieldwork and writing to include animals more fruitfully and will be of interest to students and scholars across a range of disciplines including human animal studies sociology criminology animal geography anthropology social theory and natural resources Decolonising Animals Dr Rick De Vos, 2023-04-01 The lives of non human animals their ways of being and seeing their experiences and knowledge and their relationships with each other continue to be ignored discounted written over and destroyed by anthropocentric practices and endeavours Within the vestiges of colonialism this silence and occlusion co opts and consumes animals physically and culturally into the servitude of human interests and selective narratives of history and progress Decolonising Animals brings together critical interrogations case studies and creative explorations that identify and examine how non human animals are affected by and respond to colonial structures and processes This collection includes the perspectives of Indigenous and non Indigenous scholars artists and activists detailing the ways in which they question colonial ways of knowing engaging with and representing animals Importantly the book offers suggestions for how we might decolonise our relationships with non human animals and with each other Assembling Moral Mobilities Nicholas A. Scott, 2020-02-01 In the years since the new mobilities paradigm burst onto the social scientific scene scholars from various disciplines have analyzed the social cultural and political underpinnings of transport contesting its long dominant understandings as defined by engineering and economics Still the vast majority of mobility studies and even key works that mention the good life and its dependence on the car fail to consider mobilities in connection with moral theories of the common good In Assembling Moral Mobilities Nicholas A Scott presents novel ways of understanding how cycling and driving animate urban space place and society and investigates how cycling can learn from the ways in which driving has become invested with moral value By jointly analyzing how driving and cycling reassembled the good city between 1901 and 2017 with a focus on various cities in Canada in Detroit and in Oulu Finland Scott confronts the popular notion that cycling and driving are merely antagonistic systems and challenges social scientific research that elides morality and the common good Instead of pitting bikes against cars Assembling Moral Mobilities looks at five moral values based on canonical political philosophies of the common good and argues that both cycling and driving figure into larger more important moral assemblages of mobility finally concluding that the deeper meta lesson that proponents of cycling ought to take from driving is to focus on ecological responsibility equality and home at the expense of neoliberal capitalism Scott offers a fresh perspective of mobilities and the city through a multifaceted investigation of cycling informed by historical lessons of automobility *Planet Work* Ryan Hediger, 2022-12-09 Labor and labor norms orient much of contemporary life organizing our days and years and driving planetary environmental change Yet labor as a foundational set of values and practices has not been sufficiently interrogated in the context of the environmental humanities for its profound role in climate change and other crises This collection of essays demonstrates the urgent need to rethink models and customs of labor and leisure in the Anthropocene Recognizing the grave traumas and

hazards plaguing planet Earth contributors expose fundamental flaws in ideas of work and search for ways to redirect cultures toward more sustainable modes of life These essays evaluate Anthropocene frames of interpretation dramatize problems and potentials in regimes of labor and explore leisure practices such as walking and storytelling as modes of recasting life while a coda advocates reviving notions of work as craft *The Cambridge Companion to Literature and Climate* Adeline Johns-Putra, Kelly Sultzbach, 2022-04-07 This volume unfolds the complex relationship between literature and climate by uniquely illuminating historical complexity diverse viewpoints and emerging issues **Enter the Animal** Teya Brooks Pribac, 2021-02-01 Historically grief and spirituality have been jealously guarded as uniquely human experiences Although non human animal grief has been acknowledged in recent times its potency has not been recognised as equal to human grief Anthropocentric philosophical questions still underpin both academic and popular discussions In *Enter the Animal* Teya Brooks Pribac examines what we do and don't know about grief and spirituality She explores the growing body of knowledge about attachment and loss and how they shape the lives of both human and non human animals A valuable addition to the vibrant interdisciplinary conversation about animal subjectivity *Enter the Animal* identifies conceptual and methodological approaches that have contributed to the prejudice against nonhuman animals It offers a compelling theoretical base for the consideration of grief and spirituality across species and highlights important ethical implications for how humans treat other animals **Posthumanism and Public Health** Simon Cohn, Rebecca Lynch, 2018-12-07 The intellectual and moral imperatives that underscore public health have sustained the idea that its fundamental scope is the study of human health illness and suffering and that these are self evidently attributable to individuals and groups of people This edited collection explores to what extent a shift towards more posthuman perspectives where the status of the human as the obvious focus for our attention is destabilised might catalyse complimentary or alternative accounts of common topics in public health The collection argues that through this posthuman approach standard categories such as health illness and even the body might be reconceived as interactions between different entities between people other living things material objects and the environment rather than as inherently human properties By taking into greater account non humans and relationships between humans and non humans this approach offers a recasting of traditional topics in public health and opens new opportunities for examining these In so doing the book raises key questions about researching health about considering the extent to which it may be productive to think about health as it interests not only human lives and what happens to our moral and ethical commitments if we no longer put humans first This book was originally published as a special issue of *Critical Public Health* **Animal Dreams** David Brooks, 2021-04-01 *Animal Dreams* collects David Brooks thought provoking essays about how humans think dream and write about other species Brooks examines how animals have featured in Australian and international literature and culture from *The Man from Snowy River* to Rainer Maria Rilke and *The Turin Horse* to live animal exports veganism and the culling of native and non native species In his piercing elegant widely

celebrated style he considers how private and public conversations about animals reflect older and deeper attitudes to our own and other species and what questions we must ask to move these conversations forward in what he calls the immense work of undoing For readers interested in animal welfare conservation and the relationship between humans and other species *Animal Dreams* will be an essential richly rewarding companion Praise for *Animal Dreams* one of Australia's most skilled unusual and versatile writers Peter Pierce *The Sydney Morning Herald* No one writes about animals like David Brooks Jeffrey Moussaieff Masson author of *The Assault on Truth When Elephants Weep* and *Lost Companions* Beautifully written and emotionally and intellectually enthralling The best book I have ever read on relations between humans and animals and the redress we owe them It makes you angry it makes you weep it makes you determined to rethink and to act Helen Tiffin FAHA co author of *The Empire Writes Back* and *Wild Man from Borneo A Cultural History of the Orangutan* *Livestock and Literature* Liza B. Bauer, 2024-08-08 This book explores the past and current traces that cows pigs chickens and other animals used by humans have left in Anglophone literary fiction In times of accelerated global warming an acute pandemic and breakthroughs in bioengineering practices discussions on how to rethink the relationships to these animals have become as heated as perhaps never before *Livestock and Literature* examines what literature has to contribute to these debates In particular it draws on counter narratives to so called livestock animals commodification in selected science and speculative fiction SF works from the twenty first century These texts imagine what if scenarios where livestock practice resistance transform into biotechnologically modified postanimal beings or live in close companionship to humans Via these three points of access the study delineates the formal and thematic strategies SF authors apply to challenge anthropocentric and speciesist thought patterns The aim is to shed light on how these alternative storyworlds expand readers understanding of the lives of farmed animals seeking insight into how literature shapes human animal relationships beyond the page

Animaladies Lori Gruen, Fiona Probyn-Rapsey, 2018-11-29 Do depictions of crazy cat ladies obscure more sinister structural violence against animals hoarded in factory farms Highlighting the frequent pathologization of animal lovers and animal rights activists this book examines how the madness of our relationships with animals intersects with the madness of taking animals seriously The essays collected in this volume argue that animaladies are expressive of political and psychological discontent and the characterization of animal advocacy as mad or crazy distracts attention from broader social unease regarding human exploitation of animal life While allusions to madness are both subtle and overt they are also very often gendered thought to be overly sentimental with an added sense that emotions are being directed at the wrong species Animaladies are obstacles for the political uptake of interest in animal issues as the intersections between this volume and established feminist scholarship show the fear of being labeled unreasonable or mad still has political currency *Animal Welfare in China* Peter J. Li, 2021-03-01 Peter J Li's pathbreaking new book *Animal Welfare in China* is timely and valuable ANTHROZO S The plight of animals in China has attracted intense interest in recent times Since the outbreak of COVID 19

speculation about the origins of the virus have sparked global curiosity Speculation about the origins of COVID 19 has sparked curiosity about how animals are treated traded and consumed in China today In *Animal Welfare in China* Peter Li explores the key animal welfare challenges facing China now including animal agriculture bear farming and the trade and consumption of exotic wildlife dog meat and other controversial products He considers how Chinese policymakers have approached these issues and speaks with activists from China s growing animal rights movement Li also offers an overview of the history of animal welfare in China from ancient times through the enormous changes of the 20th and 21st centuries Some practices that are today described as traditional he argues are in fact quite recent developments reflecting the contemporary pursuit of economic growth rather than long standing cultural traditions Based on years of fieldwork and analysis *Animal Welfare in China* makes a compelling case for a more nuanced and evidence based approach to these complex issues

Obaysch Simons, John, 2019-02-01 In 1850 a baby hippopotamus arrived in England thought to be the first in Europe since the Roman Empire and almost certainly the first in Britain since prehistoric times Captured near an island in the White Nile Obaysch was donated by the viceroy of Egypt in exchange for greyhounds and deerhounds His arrival in London was greeted with a wave of hippomania doubling the number of visitors to the Zoological Gardens almost overnight Delving into the circumstances of Obaysch s capture and exhibition John Simons investigates the phenomenon of star animals in Victorian Britain against the backdrop of an expanding British Empire He shows how the entangled aims of scientific exploration commercial ambition and imperial expansion shaped the treatment of exotic animals throughout the nineteenth and early twentieth centuries Along the way he uncovers the strange and moving stories of Obaysch and the other hippos who joined him in Europe as the trade in zoo animals grew

Meatsplaining Jason Hannan, 2020-10-01 The animal agriculture industry like other profit driven industries aggressively seeks to shield itself from public scrutiny To that end it uses a distinct set of rhetorical strategies to deflect criticism These tactics are fundamental to modern animal agriculture but have long evaded critical analysis In this collection academic and activist contributors investigate the many forms of denialism perpetuated by the animal agriculture industry What strategies does the industry use to avoid questions about its inhumane treatment of animals and its impact on the environment and public health What narratives myths and fantasies does it promote to sustain its image in the public imagination powerful timely and essential David Nibert author of *Animal Oppression and Human Violence* *Domesecration Capitalism and Global Conflict* *Meatsplaining* equips us to identify the lies at the heart of animal agriculture It s an excellent and timely compilation on an exceedingly vexing problem Carol J Adams author of *The Sexual Politics of Meat* and *Burger* *Meatsplaining* is the first book to give an apt name to the animal agriculture industry s relentless campaign of disinformation and denialism Written in a clear lively and accessible style *Meatsplaining* will surely educate the public about the horrors of animal agriculture Marc Bekoff author of *The Animals Agenda* *Freedom Compassion and Coexistence in the Human Age* Cruelty thrives in secrecy and the meat industry is highly skilled at

concealing the routine abuse and misery that flourishes on modern farms Meatsplaining cuts through the spin and exposes the meat industry's massive PR machine It explores how Big Meat uses language obfuscation and denial to misdirect the public's attention away from its commodification of sentient animals environmental devastation and the looming health crisis caused by eating animals This book is a must read for animal advocates and anyone else who no longer wants to be lied to Camille Labchuk Executive Director Animal Justice This book provides a necessary corrective to the fantasy world created by meat industry propaganda As we grapple with a global zoonotic pandemic and biodiversity crisis it is urgent for us to start thinking clearly about who and what is on our plates John Sorenson Brock University **Australian Animal Law** Elizabeth Ellis, 2022-07-01 Australian Animal Law Context and Critique provides comprehensive information about the legal and regulatory framework governing the interaction between humans and animals By relating specific content areas to the discipline's broader characteristics and themes researcher Elizabeth Ellis exposes the systemic nature of current problems and the consequent need for significant change This book also illustrates the role of official animal protection narratives in legitimising the existing system despite the many factual flaws they contain Ellis covers the major areas of animal law in detail incorporating accessible contextual material and allowing readers to consolidate their understanding and build upon their knowledge Key areas include the concept of unnecessary animal suffering the effective exemption of most animals from the operation of cruelty laws regulatory conflicts of interest the hidden nature of animal use and the lack of transparency in animal law Australian Animal Law is an essential resource inviting reflection on the way the law helps to construct the relationship between human and non human animals including through its silences and omissions Human-Animal Interactions in Anthropocene Asia Victor Teo, 2023-03-03 This book examines the theme of human animal interactions contextualized against the idea of the Anthropocene Focused on China and its immediate Asian borderlands this interdisciplinary collection provides a powerful and insightful analysis of the ecological challenges that mankind's traditional activities have created Through in depth case studies each focusing on a particular human animal dynamic the book contextualizes and advances the understanding of existing environmental and ecological problems faced by local communities in Asia In particular the book hopes to transcend the duality of the nature versus culture debate by locating animal ecological problems in the behavior of human institutions beliefs and practices which are often affected by prevailing cultural proclivities political ideologies economic interests and scientific agendas Through interrogation of theoretical concepts of Anthropocene and human animal binary the volume highlights the controversial debates that follow their usage as well as their empirical utility understanding human animal interactions historically thereby engaging a broader interdisciplinary conversation increasingly links these two fields together Providing a platform for discussion and dialogue for a wide audience this book will appeal to students and scholars of environmental history and politics anthropology political science and policy studies China studies and Asian studies more generally **Indigenous Creatures, Native Knowledges,**

and the Arts Wendy Woodward, Susan McHugh, 2017-10-17 This volume illuminates how creative representations remain sites of ongoing struggles to engage with animals in indigenous epistemologies Traditionally imagined in relation to spiritual realms and the occult animals have always been more than primitive symbols of human relations Whether as animist gods familiars conduits to ancestors totems talismans or co creators of multispecies cosmologies animals act as vital players in the lives of cultures From early days in colonial contact zones through contemporary expressions in art film and literature the volume s unique emphasis on Southern Africa and North America historical loci of the greatest ranges of species and linguistic diversity help to situate how indigenous knowledges of human animal relations are being adapted to modern conditions of life shared across species lines
