The Disruptors Dennis R. Shelden, 2020-06-08 Technology driven disruption and entrepreneurial response have become profound drivers of change in modern culture Wholly new organisations have rapidly emerged in many fields including retail print media and transportation often dramatically altering both the products and processes that define these industries Architecture has until now been minimally impacted by this technologically driven upheaval But there are many signs that this period of tranquillity is ending Startups are proliferating targeting diverse innovations from environmental performance to large scale 3D printing Traditional architecture and engineering firms are creating incubators and spin offs to capitalise on their innovations Large and innovative organisations from outside the professions are becoming interested in the built environment as the next platform for technological and economic disruption These new directions for the discipline will potentially create radically new types of practice new building typologies and new ways for both design professionals and societies to engage with the built environment It is crucial that architectural discourse addresses these possibilities and begins to embrace technology driven entrepreneurship as a central theme for the future of architectural practice Contributors Sandeep Ahuja Ben van Berkel Phil Bernstein Helen Castle James Cramer and Scott Simpson Craig Curtis David Fano and Daniel Davis Greg Lynn Jessica Rosenkrantz and Jesse Louis Rosenberg Brad Samuels Marc Simmons Jared Della Valle and Philip F Yuan and Chao Yan Featured architects Archi Union Ayre Chamberlain Gaunt Bryden Wood Gehry Partners Front Greg Lynn FORM Millar Howard Workshop Nervous System SITU and UNStudio

The New Ecology of Leadership David K. Hurst,2014-10-07 David Hurst has a unique knowledge of organizations their function and their failure both in theory and in practice He has spent twenty five years as an operating manager often in crises and turnaround conditions and is also a widely experienced consultant teacher and writer on business This book is his innovative integration of management practice and theory using a systems perspective and analogies drawn from nature to illustrate groundbreaking ideas and their practical application It is designed for readers unfamiliar with sophisticated management concepts and for active practitioners seeking to advance their management and leadership skills Hurst s objective is to help readers make meaning from their own management experience and education and to encourage improvement in their practical judgment and wisdom His approach takes an expansive view of organizations connecting their development to humankind s evolutionary heritage and cultural history It locates the origins of organizations in communities of trust and follows their development and maturation He also crucially tracks the decline of organizations as they age and shows how their strengths become weaknesses in changing circumstances Hurst s core argument is that the human mind is rational in an ecological rather than a logical sense In other words it has evolved to extract cues to action from the specific situations in which it finds itself Therefore contexts matter and Hurst shows how passion reason and power can be used to change and sustain organizations for good and ill The result is an inspirational synthesis of management theory and practice that will resonate with every reader s experience **Design Strategy** Nancy C. Roberts,2023-11-14 A new approach to

addressing the contemporary world s most difficult challenges such as climate change and poverty Conflicts over the problem and the solution plague the modern world and land problem solvers in what has been called wicked problem territory a social space with high levels of conflict over problems and solutions In Design Strategy Nancy C Roberts proposes design as a strategy of problem solving to close the gap between an existing state and a desired state Utilizing this approach designers and change agents are better able to minimize self defeating conflicts over problems and solutions break the logjam of opposition and avoid the traps that lock problem solvers into a never ending cycle of conflict Design as a field

continues to grow and evolve but Design Strategy focuses on three levels of design where wicked problems tend to lurk strategic design of private and public organizations systemic design of networked and overlapping economic technical political and social subsystems and regenerative design of life giving realignment between humanity and nature Within this framework Roberts presents refreshingly interdisciplinary case studies that integrate theory and practice across diverse fields to guide professionals in any domain from business and nonprofit organizations to educational and healthcare systems and finally offers hope that humanity can tackle the existential challenges we face in the twenty first century **Designing for the Climate Emergency** Sofie Pelsmakers,Aidan Hoggard,Urszula Kozminska,Elizabeth Donovan,2022-07-01 We are in a climate emergency Architects must be part of the radical change needed This book guides architecture student to create truly sustainable designs Demonstrating holistic design approaches through 10 key themes it guides students through the different stages of the design process in five illustrated chapters Reflecting the years of study it provides step changes towards eventual architecture practice Unique features include key checklists case studies student examples and an extensive glossary **Whitaker's Book List** ,1991
