

Speedometer

The speedometer shows indicated vehicle speed in miles per hour and kilometers per hour.

Odometer

The amount of figures in the speedometer face, which indicate the accumulated mileage in miles.

Tamper-Resistant Odometer

Forced or tampered with odometer readings are illegal. To protect the odometer on this vehicle is designed with tamper-resistant features to indicate tampering. If a vehicle with a tamper-resistant odometer is replaced, it is likely that the odometer has been tampered with or replaced. The odometer should be replaced.

When a new odometer is installed and cannot be set to the same mileage registered on the prior odometer, the law requires the owner to obtain a title on the vehicle's title frame to show the previous odometer reading and the date of replacement. The replacement odometer must then be set to zero. To determine the actual vehicle mileage, add the mileage shown on the title to the current odometer reading. If the replacement odometer can be set up to the same mileage as the prior odometer, no title frame later is needed.

Trip Odometer

The optional trip odometer may be used to store by turning down to the right. This instrument may be used to more accurately record trip mileage to customers.

Fuel Gauge

The fuel gauge will register the APPROXIMATE fuel level in the tank, when the ignition is in the RUN position.

When the gauge registers EMPTY, some fuel is still available as a reserve. When the gauge registers FULL, some fuel can still be added to the tank.

The following conditions may be considered normal:

- Fuel station pumps may shut off before fuel gauge indicates FULL.
- Amount of fuel required for fill-up may not exactly correspond to gauge reading.
- Needle may not move away from FULL until some time after fill-up.
- Needle may move during turns, stops and accelerations.
- When the ignition switch is turned to the OFF position, the needle will not necessarily return all the way to the EMPTY mark.

Oil/Choke Indicator Light

This light will come on to provide a "bulb check" when the ignition is turned on, but should go out after the engine is started. If light fails to come on with the ignition turned on, it could indicate a burned-out bulb, or a blown instrument lamp fuse or a defective electric choke heater circuit. Have the system repaired if light does not come on during check.
