Among African Apes Stories And Photos From The Field:

Among African Apes Martha M. Robbins, Christophe Boesch, 2011-06-13 These compelling stories and photographs take us to places like Bwindi Impenetrable National Park in Uganda Ivindo National Park in Gabon and the Ta National Park in Cote d'Ivoire for an intimate and revealing look at the lives of African wild apes and at the lives of the humans who study them In tales of adventure research and conservation veteran field researchers and conservationists describe exciting discoveries made over the past few decades about chimpanzees bonobos and gorillas The book features vivid descriptions of interactions among these highly intelligent creatures as they hunt socialize and play More difficult themes emerge as well including the threats apes face from poaching disease and deforestation In stories that are often moving and highly personal this book takes measure of how special the great apes are and discusses positive conservation efforts including ecotourism that can help bring these magnificent animals back from the brink of extinction *Among African Apes* Martha M.

Robbins, Christophe Boesch, 2011-06-13 *Among African Apes* is an exciting report fresh from the scientific frontlines a series of personal dramatic and yet superbly informative accounts of the latest research It also reminds us that our nearest relatives the African great apes are threatened as never before with the prospect of extinction Dale Peterson author of *Elephant Reflections* and *Eating Apes* This engaging and compelling book is an up close and personal glimpse into the lives of wild chimpanzees bonobos and gorillas In these narratives set in the lush tangled forests of tropical Africa scientific observation meets adventure story as the lives of individual animals are intertwined with the agonies and ecstasies of fieldwork Kelly Stewart co author of *Gorilla Society* and author of *Gorillas* Some of the most devoted primatologists offer a wonderful collection of first hand accounts and splendid photographs that make us feel like we're beside them watching our relatives in the forest Frans de Waal author of *Our Inner Ape* and *Chimpanzee Politics* *Chimpanzees, War, and History* R. Brian Ferguson, 2023 The question of whether men are predisposed to war runs hot in contemporary scholarship and online discussion Within this debate chimpanzee behavior is often cited to explain humans propensity for violence the claim is that male chimpanzees kill outsiders because they are evolutionarily inclined suggesting to some that people are too The longstanding critique that killing is instead due to human disturbance has been pronounced dead and buried In *Chimpanzees War and History* R. Brian Ferguson challenges this consensus Bringing readers on a journey through theoretical struggle and clashing ideas about chimpanzees bonobos and evolution Ferguson opens new ground on the age old question are men born to kill

Fuentes, 2017-04-24 The International Encyclopedia of Primatology represents the first comprehensive encyclopedic reference focusing on the behaviour biology ecology evolution genetics and taxonomy of human and non human primates Represents the first comprehensive encyclopedic reference relating to primatology Features more than 450 entries covering topics ranging from the taxonomy history behaviour ecology captive management and diseases of primates to their use in research cognition conservation and representations in literature Includes coverage of the basic scientific concepts that underlie each topic along with the latest advances in the field Highly accessible to undergraduate and graduate students in primatology anthropology and the medical biological and zoological sciences Essential reference for academics researchers and commercial and conservation organizations This work is also available as an online resource at www.encyclopediaofprimatology.com *Evolved Morality: The Biology and Philosophy of Human Conscience* Frans de

Waal, 2014-02-20 Morality is often defined in opposition to the natural instincts or as a tool to keep those instincts in check New findings in neuroscience social psychology animal behavior and anthropology have brought us back to the original Darwinian position that moral behavior is continuous with the social behavior of animals and most likely evolved to enhance the cooperativeness of society In this view morality is part of human nature rather than its opposite This interdisciplinary volume debates the origin and working of human morality within the context of science as well as religion and philosophy Experts from widely different backgrounds speculate how morality may have evolved how it develops in the child and what science can tell us about its working and origin They also discuss how to deal with the age old facts versus values debate also known as the naturalistic fallacy The implications of this exchange are enormous as they may transform cherished views on if and why we are the only moral species These articles are also published in *Behaviour* Volume 151 Nos 2 3 February 2014 Suitable for course adoption

Father Time Sarah Blaffer Hrdy, 2024-05-14 A sweeping account of male nurturing explaining how and why men are biologically transformed when they care for babies It has long seemed self evident that women care for babies and men do other things Hasn't it always been so When evolutionary science came along it rubber stamped this venerable division of labor mammalian males evolved to compete for status and mates while females were purpose built to gestate suckle and otherwise nurture the victors offspring But come the twenty first century increasing numbers of men are tending babies sometimes right from birth How can this be happening Puzzled and dazzled by the tender expertise of new fathers around the world several in her own family celebrated evolutionary anthropologist and primatologist Sarah Blaffer Hrdy set out to trace the deep history of male nurturing and explain a surprising departure from everything she had assumed to be normal In *Father Time* Hrdy draws on a wealth of research to argue that this ongoing transformation in men is not only cultural but profoundly biological Men in prolonged intimate contact with babies exhibit responses nearly

identical to those in the bodies and brains of mothers They develop caring potential few realized men possessed In her quest to explain how men came to nurture babies Hrdy travels back through millions of years of human primate and mammalian evolution then back further still to the earliest vertebrates all while taking into account recent economic and social trends and technological innovations and incorporating new findings from neuroscience genetics endocrinology and more The result is a masterful synthesis of evolutionary and historical perspectives that expands our understanding of what it means to be a man and what the implications might be for society and our species Ignoring Nature No More Marc Bekoff,2013-06-01 For far too long humans have been ignoring nature As the most dominant overproducing overconsuming big brained big footed arrogant and invasive species ever known we are wrecking the planet at an unprecedented rate And while science is important to our understanding of the impact we have on our environment it alone does not hold the answers to the current crisis nor does it get people to act In Ignoring Nature No More Marc Bekoff and a host of renowned contributors argue that we need a new mind set about nature one that centers on empathy compassion and being proactive This collection of diverse essays is the first book devoted to compassionate conservation a growing global movement that translates discussions and concerns about the well being of individuals species populations and ecosystems into action Written by leading scholars in a host of disciplines including biology psychology sociology social work economics political science and philosophy as well as by locals doing fieldwork in their own countries the essays combine the most creative aspects of the current science of animal conservation with analyses of important psychological and sociocultural issues that encourage or vex stewardship The contributors tackle topics including the costs and benefits of conservation behavioral biology media coverage of animal welfare conservation psychology and scales of conservation from the local to the global Taken together the essays make a strong case for why we must replace our habits of domination and exploitation with compassionate conservation if we are to make the world a better place for nonhuman and human animals alike Chimpanzees and Human Evolution Martin N. Muller,Richard W. Wrangham,David R. Pilbeam,2017-11-27 Knowledge of wild chimpanzees has expanded dramatically This volume edited by Martin Muller Richard Wrangham and David Pilbeam brings together scientists who are leading a revolution to discover and explain human uniqueness by studying our closest living relatives Their conclusions may transform our understanding of human evolution *Ethical Sense and Literary Significance* Donald R. Wehrs,2023-07-31 This study blends together ethical philosophy neurocognitive evolutionary studies and literary theory to explore how imaginative discourse addresses a distinctively human deep sociality and by doing so helps shape cultural and literary history Deep sociality arising from an improbable evolutionary history both entwines and leaves non reconciled what is felt to be significant for us and what ethical sense seems to call us to acknowledge as significant independent of ourselves *Ethical Sense and Literary Significance* connects literary and cultural history without reducing the literary to a mere expression of something else It argues that affective differences between non egocentric and egocentric registers of significance are

integral to the bioculturally evolved deep sociality that verbal art addresses often in unsettling and socially critical ways. Much imaginative discourse in early societies as well as recent ones brings ethical sense and literary significance together in ways that reveal their intricate but non-harmonized internal entwinement. Drawing on contemporary scholarship in the humanities and sciences, Donald R. Wehrs explores the implications of interdisciplinary approaches to topics central to a wide range of fields beyond literary studies, including neuroscience, anthropology, phenomenological philosophy, comparative history, and social psychology.

Personalities on the Plate Barbara J. King, 2017-03-07. In recent years, scientific advances in our understanding of animal minds have led to major changes in how we think about and treat animals in zoos and aquariums. The general public, it seems, is slowly coming to understand that animals like apes, elephants, and dolphins have not just brains but complicated inner and social lives, and that we need to act accordingly. Yet that realization hasn't yet made its presence felt to any great degree in our most intimate relationship with animals at the dinner table. Sure, there are vegetarians and vegans all over, but at the same time, meat consumption is up, and meat remains a central part of the culinary and dining experience for the majority of people in the developed world. With *Personalities on the Plate*, Barbara King asks us to think hard about our meat eating and how we might reduce it. But this isn't a polemic intended to convert readers to veganism. What she is interested in is why we've not drawn food animals into our concern and just what we do know about the minds and lives of chickens, cows, octopuses, fish, and more. Rooted in the latest science and built on a mix of firsthand experience, including entomophagy, which yes, is what you think it is, and close engagement with the work of scientists, farmers, vets, and chefs, *Personalities on the Plate* is an unforgettable journey through the world of animals we eat. Knowing what we know and what we may yet learn, what is the proper ethical stance toward eating meat? What are the consequences for the planet? How can we live an ethically and ecologically sound life through our food choices? We could have no better guide to these fascinatingly thorny questions than King, whose deep empathy embraces human and animal alike. Readers will be moved, provoked, and changed by this powerful book.

Orphaned (Ape Quartet #4) Eliot Schrefer, 2018-09-25. In National Book Award finalist. Endangered. Eliot Schrefer showed a human's first encounter with an ape. Now comes this astonishing story of a family of gorillas' first encounter with a human. Before humans and before human history, there were the apes. Snub is a young gorilla living in the heart of what will eventually be known as Africa. She is jealous of her mother's new baby and restless in her need to explore. When a natural disaster shakes up her family, Snub finds herself as the guardian of her young sibling and lost in a reshaped world. Snub may feel orphaned, but she is not alone. There are other creatures stalking through the woods, a new form of predator walking on two legs. One of their kind is also orphaned and is taken in by Snub. But the intersection of the human world and the gorilla world will bring both new connections and new battles. In his boldest work yet, two-time National Book Award finalist Eliot Schrefer shows us a riveting, heartbreaking early encounter between ape and man, told from the ape's point of view. It is a journey unlike any other in recent literature.

The Dialectical Primatologist

Nicholas Malone, 2021-10-24 The Dialectical Primatologist identifies the essential parameters vital for the continued coexistence of hominoids apes and humans synthesising primate research and conservation in order to develop culturally compelling conservation strategies required for the facilitation of hominoid coexistence As unsustainable human activities threaten many primate species with extinction effective conservation strategies for endangered primates will depend upon our understanding of behavioural response to human modified habitats This is especially true for the apes who are arguably our most powerful connection to the natural world Recognising the inseparability of the natural and the social the dialectical approach in this book highlights the heterogeneity and complexity of ecological relationships Malone stresses that ape conservation requires a synthesis of nature and culture that recognises their inseparability in ecological relationships that are both biophysically and socially formed and seeks to identify the pathways that lead to either hominoid coexistence or alternatively extinction This book will be of keen interest to academics in biological anthropology primatology environmental anthropology conservation and human animal studies The Open Access version of this book available at <http://www.taylorfrancis.com> has been made available under a Creative Commons Attribution Non Commercial No Derivatives CC BY NC ND 4.0 license
