Media, Memory, and the First World War David Williams, 2009 Why does the Great War seem part of modern memory when its rituals of mourning and remembrance were traditional romantic even classical In this highly original history of memory David Williams shows how classic Great War literature including work by Remarque Owen Sassoon and Harrison was symptomatic of a cultural crisis brought on by the advent of cinema He argues that images from Geoffrey Malins hugely popular war film The Battle of the Somme 1916 collapsed social temporal and spatial boundaries giving film a new cultural legitimacy while the appearance of writings based on cinematic forms of remembering marked a crucial transition from a verbal to a visual culture By contrast today s digital media are laying the ground for a return to Homeric memory whether in History Television the digital Memory Project or the interactive war museum Of interest to historians classicists media and digital theorists literary scholars museologists and archivists Media Memory and the First World War is a comparative study that shows how the dominant mode of communication in a popular culture from oral traditions to digital media shapes the structure of memory within that culture

**Variations of the Hero's Journey in Contemporary British, French and Australian Picture Books about the Great War** Martin C. Kerby, Denise Burkhard, Alison Bedford, Marion Gymnich, Margaret M. Baguley, 2025-09-30 This book is grounded in the belief that every nation had its own Great War and that children s picture books are an important barometer of each country s national approach To explore the depiction of the Great War in modern Australian British and French children s picture books where this historical event is reimagined in different ways as a futile conflict as a painful victory and as part of one country s founding mythology this book uses the concept of the hero s journey as an underlying framework It claims that this monomythic pattern as developed by Joseph Campbell and modified by Christopher Vogler not only informs all picture books

selected for this project but can also be used to highlight the extent to which modern children's picture book authors and illustrators conform to their respective nation's cultural memory. It further maintains that the specific historical context of the Great War in these children's picture books can be used to identify a variant of the hero's journey: the ordinary soldier's journey. This analysis of children's picture books about the Great War through the lens of Campbell's hero's journey will be of interest to both students and researchers in the fields of children's literature, literary theory, history, cultural studies, and education.

**Michael Foreman's Christmas Treasury** Michael Foreman, 1999-10-12 Filled with favourite songs, poems and stories for Christmas.

**Historical Fiction for Children** Fiona M. Collins, Judith Graham, 2013-10-18 Historical fiction has a great deal to offer as its readers and devotees have always known. The time is ripe, however, for the historical novel and historical picture book to be promoted more emphatically so that many more are made aware of the delight and learning to be found in the genre. The editors of this book invited authors, academic writers and teachers to reflect on the nature, scope, range and richness of historical fiction for children. What is collected here provides an overview of the field, a consideration of significant writers of historical fiction from the nineteenth century onwards, a sense of the various historical eras commonly explored, Stone Age to World War 2, a discussion of commonly raised issues, themes and topics such as child labor, slavery and migration, and a forum for writers to reveal their insights into the writing of historical fiction. Julian Atterton, Berlie Doherty, Michael Foreman and Philip Pullman have made contributions. It provides evidence of children and students engaging creatively with historical fiction.

Developing Children's Critical Thinking through Picturebooks Mary Roche, 2014-07-25 This accessible text will show students and class teachers how they can enable their pupils to become critical thinkers through the medium of picturebooks. By introducing children to the notion of making meaning together through thinking and discussion, Roche focuses on carefully chosen picturebooks as a stimulus for discussion and shows how they can constitute an accessible multimodal resource for adding to literacy skills while at the same time developing in pupils a far wider range of literary understanding. By allowing time for thinking about and digesting the pictures as well as the text, and then engaging pupils in classroom discussion, this book highlights a powerful means of developing children's oral language ability, critical thinking and visual literacy while also acting as a rich resource for developing children's literary understanding. Throughout, Roche provides rich data and examples from real classroom practice. This book also provides an overview of recent international research on doing interactive read-alouds, on what critical literacy means, on what critical thinking means, and on picturebooks themselves. Lecturers on teacher education courses for early years or primary levels, classroom teachers, pre-service education students and all those interested in promoting critical engagement and dialogue about literature will find this an engaging and very insightful text.
