JAMES DAVID FAHN

A Land On Fire The Environmental Consequences Of The Southeast Asian Boom

Philip Hirsch

A Land On Fire The Environmental Consequences Of The Southeast Asian Boom:

A Land on Fire James Fahn, 2008-03-31 The future of Earth's environment will be decided in Asia home to 60 percent of the world's population and some of the world's fastest growing economies As an award winning investigative journalist based in Bangkok James Fahn spent a decade grappling with the challenges facing the region's mega cities tropical forests coastlines and societies dashing toward modernity In A Land on Fire he shares his findings the profound implications for global issues such as climate change the loss of biodiversity and the greening of world trade He explores Southeast Asia's environmental battles through the eyes of the people fighting them and recounts his many adventures while covering them Whether chasing down log smugglers along the Thai-Burmese border exposing the dumping of toxic mercury into the Gulf of Thailand by multinational oil corporations or covering the controversy surrounding the filming of the movie *The Beach* Fahn provides unique insight into the relationship between sustainable development and democracy the crippling impact of corruption and the environmental challenges facing us all

A Land on Fire James David Fahn, 2004 **The Age of Interconnection** Jonathan Sperber, 2023 A monumental and accessible global history of the second half of the twentieth century from the end of World War Two to the terrorist attack on the Twin Towers offering readers the most complete portrait of the age available

Routledge Handbook of the Environment in Southeast Asia Philip Hirsch, 2016-09-13 The environment is one of the defining issues of our times and it is closely linked to questions and dilemmas surrounding economic development Southeast Asia is one of the world's most economically and demographically dynamic regions and it is also one in which a host of environmental issues raise themselves The Routledge Handbook of the Environment in Southeast Asia is a collection of 30 chapters dealing with the most significant scholarly debates in this rapidly growing field of study Structured in four main parts it gives a comprehensive regional overview of and insight into the environment in Southeast Asia Wide ranging and balanced this handbook promotes scholarly understanding of how environmental issues are dealt with from diverse theoretical perspectives It offers a detailed empirical understanding of the myriad environmental problems and challenges faced in Southeast Asia This is the first publication of its kind in this field a helpful companion for a global audience and for scholars of Southeast Asian studies from a variety of disciplines

Urbanization in Southeast Asia Yap Kioe Sheng, Moe Thuzar, 2012 Urbanization occurs in tandem with development Countries in Southeast Asia need to build individually and collectively the capacity of their cities and towns to promote economic growth and development to make urban development more sustainable to mitigate and adapt to climate change and to ensure that all groups in society share in the development This book is a result of a series of regional discussions by experts and practitioners involved in the urban and planning of their countries It highlights urbanization issues that have implications for regional including ASEAN cooperation and provides practical recommendations for policymakers It is a first step towards assisting governments in the region to take advantage of existing collaborative partnerships to address the urban transformation that Southeast Asia is experiencing

today *International Environmental Law and Policy for the 21st Century* Ved Nanda, George (Rock) Pring, 2012-10-12 A significant contribution to the field and a welcome addition to the growing literature on international environmental law and an important reference for every scholar lawyer and layperson interested in the field **The Law and Politics of Sustainability** Klaus Bosselmann, Daniel S. Fogel, J.B. Ruhl, Patricia Wouters, 2010-11-30 The Law and Politics of Sustainability explores efforts made to address pressing environmental concerns through legislation conventions directives treaties and protocols Articles explain the mechanics of environmental law the concepts that shape sustainable development case studies and rulings that have set precedents approaches to sustainable development taken by legal systems around the world and more Experts and scholars in the field raise provocative questions about the effectiveness of international law versus national law in protecting the environment and about the effect of current laws on future generations They analyze the successes and shortcomings of present legal instruments corporate and public policies social movements and conceptual strategies offering readers a preview of the steps necessary to develop laws and policies that will promote genuine sustainability **ENVIRONMENTAL LAWS & WATER POLLUTION: HISTORICAL PERSPECTIVE** Dr. Rohini Gote , 2021-04-21 Role of Nature in Human Life The progress of man from the Stone Age to the computer age is astonishing At times one may be misled and consider this as man's victory over nature But it is not true Our forefathers modestly believed that Life is a glorious gift from God Human being is the epitome of the infinite prowess of the divine creator Nature plays a dominant role in the lives of all creations Natural objects like rivers mountains forests etc enjoyed a high position in the life of all societies Rivers were considered as goddesses having not only purifying capacity but also self purifying ability Pollution of the water of a river was considered as sin and it attracted punishments of different kinds 1 Today these ancient scripts appear to be far more relevant **The Environmental Humanities** Robert S. Emmett, David E. Nye, 2017-10-06 A concise overview of this multidisciplinary field presenting key concepts central issues and current research along with concrete examples and case studies The emergence of the environmental humanities as an academic discipline early in the twenty first century reflects the growing conviction that environmental problems cannot be solved by science and technology alone This book offers a concise overview of this new multidisciplinary field presenting concepts issues current research concrete examples and case studies Robert Emmett and David Nye show how humanists by offering constructive knowledge as well as negative critique can improve our understanding of such environmental problems as global warming species extinction and over consumption of the earth's resources They trace the genealogy of environmental humanities from European Australian and American initiatives also showing its cross pollination by postcolonial and feminist theories Emmett and Nye consider a concept of place not synonymous with localism the risks of ecotourism and the cultivation of wild areas They discuss the decoupling of energy use and progress and point to OECD countries for examples of sustainable development They explain the potential for science to do both good and harm examine dark visions of planetary collapse and describe more positive

possibilities alternative practices including localization and degrowth Finally they examine the theoretical impact of new materialism feminism postcolonial criticism animal studies and queer ecology on the environmental humanities

Biodiversity Conservation in Southeast Asia Serge Morand, Claire Lajaunie, Rojchai Satrawaha, 2017-07-28 Southeast Asia is highly diversified in terms of socio ecosystems and biodiversity but is undergoing dramatic environmental and social changes These changes characterize the recent period and can be illustrated by the effects of the Green Revolution in the late 1960s and 1970s to the globalization of trade and increasing agronomic intensification over the past decade Biodiversity Conservation in Southeast Asia provides theoretical overviews and challenges for applied research in living resource management conservation ecology health ecology and conservation planning in Southeast Asia Five key themes are addressed origin and evolution of Southeast Asian biodiversity challenges in conservation biology ecosystem services and biodiversity managing biodiversity and living resources policy economics and governance of biodiversity Detailed case studies are included from Thailand and the Lower Mekong Basin while other chapters address cross cutting themes applicable to the whole Southeast Asia region This is a valuable resource for academics and students in the areas of ecology conservation environmental policy and management Southeast Asian studies and sustainable development *International Relations in Southeast Asia* Donald E. Weatherbee, 2014-11-25 This fully revised and updated edition of Donald E Weatherbee s widely praised text offers a clear and comprehensive introduction to international relations in contemporary Southeast Asia The author analyzes the efforts of the Southeast Asian states to adapt collectively through the ASEAN Community building process to the challenges of traditional intraregional security issues the requirements of the international economy and the political demands of nontraditional issues such as democracy human rights and environmental degradation Weatherbee warns that autonomy expressed in the claim to the ASEAN Community s centrality to Asia could be threatened by the strategic impact of China s rise and America s recommitment to regional strategic balance An invaluable guide to the region this thoughtful and lucid work will be an essential text for courses on Southeast Asia and on the international relations of the Asia Pacific *Environmental Challenges and Governance* Sacchidananda Mukherjee, Debashis Chakraborty, 2015-03-02 The economies located in East South and Southeast Asia have witnessed an interesting growth sustainability trade off over the last decades While growth considerations have paved ways for deepened ties with growing trade investment waves and increasing population pressure necessitated exploitation of hitherto unutilized natural resources focus on environmental sustainability has been a recent consideration The growth impetus still playing a key role in these economies it becomes imperative that the countries effectively address the key sustainability concerns e g air and water pollution land degradation loss of biodiversity climate change issues like CO2 emissions etc But how prepared is the governance mechanism of these countries covering not only the legislative and administrative framework but also involvement of the judiciary presence of spirited civil society and active engagement of stakeholders in policy framing dialogues to rise up to these challenges The

book seeks an answer to this question through the environmental governance mechanism and natural resource conservation policies in three vibrant regions within Asia A holistic development dimension of sustainable development path emerges through discussion of policies adopted by developed Japan South Korea upper middle China Malaysia developing India Indonesia Philippines Sri Lanka Thailand and least developed countries Bangladesh Myanmar Nepal *Energy, Governance and Security in Thailand and Myanmar (Burma)* Adam Simpson,2016-04-29 Across the world states are seeking out new and secure supplies of energy but this search is manifesting itself most visibly in Asia where rapid industrialisation in states such as China and India is fomenting a frantic scramble for energy resources Due to entrenched societal inequities and widespread authoritarian governance however the pursuit of national energy security through transnational energy projects has resulted in devastating impacts on the human and environmental security of local populations These effects are particularly evident in both Thailand and Myanmar Burma which located at the crossroads of Asia are increasingly engaged in the cross border energy trade Based on extensive fieldwork and theoretical analysis this ground breaking book proposes a new critical approach to energy and environmental security and explores the important role that both local and transnational environmental movements are playing in the absence of effective and democratic governments in providing activist environmental governance for energy projects throughout the region By comparing the nature of this activism under two very different political regimes it delivers crucial theoretical insights with both academic and policy implications for the sustainable and equitable development of the South s natural resources Global Change and Integrated Coastal Management Nick Harvey,2007-05-31 Most of the world s population lives close to the coast and is highly dependent on coastal resources which are being exploited at unsustainable rates These resources are being subject to further pressures associated with population increase and the globalization of coastal resource demand This is particularly so for the Asia Pacific region which contains almost two thirds of the world s population and most of the world s coastal megacities The region has globally important atmospheric and oceanic phenomena which affect world climate such as the Asian Monsoon and the El Ni o Southern Oscillation phenomena The Asia Pacific region also has highly significant marine diversity but over the last few decades coastal resources such as mangroves coral reefs and fisheries have experienced large scale depletion The need to find appropriate management solutions to these and other coastal issues is made more complex by the need to take account of international scientific predictions for global climate change and sea level rise which will further impact on these coasts The idea for this book arose from a meeting of coastal scientists in Kobe Japan in May 2003 The meeting was organized by the Asia Pacific Network for Global Change Research APN an inter governmental network comprising 21 member countries for the promotion of global change research and links between science and policy making in the region

The Sultan and the Mermaid Queen Paul Spencer Sochaczewski,2008 The Sultan and the Mermaid Queen is a collection of essays and articles which describe rarely written about Asian people places and events **Routledge**

Handbook of Environment and Society in Asia Paul G. Harris, Graeme Lang, 2014-09-19 Nowhere is the connection between society and the environment more evident and potentially more harmful for the future of the world than in Asia. In recent decades rapid development of Asian countries with very large populations has led to an unprecedented increase in environmental problems such as air and water pollution, solid and hazardous wastes, deforestation, depletion of natural resources, and extinction of native species. This handbook provides a comprehensive survey of the cultural, social, and policy contexts of environmental change across East Asia. The team of international experts critically examines a wide range of environmental problems related to energy, climate change, air, land, water, fisheries, forests, and wildlife. The editors conclude that with nearly half of the human population of the planet and several rapidly growing economies, most notably China, Asian societies will determine much of the future of human impacts on the regional and global environments. As climate change-related threats to society increase, the book strongly argues for increased environmental consciousness and action in Asian societies. This handbook is a very valuable companion for students, scholars, policy makers, and researchers working on environmental issues in Asia.

Environmental Health Perspectives, 1993 **Historical Dictionary of Environmentalism** Peter Dauvergne, 2016-09-09 To capture the diversity within environmentalism, this dictionary takes a global tack with a focus on ideas, events, institutions, initiatives, and green movements since the 1960s. It strives to avoid a common error in many histories of environmentalism: to exaggerate the input of the wealthy countries of Europe and North America and understate the influence of Africa, Asia, South and Central America, and the Polar Regions. It aims as well for a more comprehensive analysis than most histories of the modern environmental movement, understanding environmentalism as emerging not only from grassroots and formal nongovernmental associations but also from corporate, governmental, and intergovernmental organizations and initiatives. This assumes the ideas and energy infusing environmentalism with political purpose arise from hundreds of thousands of sources, from corporate boardrooms to bureaucratic policies to international negotiations to activists. Thus environmentalists are not only indigenous people blocking a logging road, Greenpeace activists protesting a seal hunt, or green candidates contesting an election; an equal or larger number of environmentalists are working within the Japanese bureaucracy to implement environmental policies, within the World Bank to assess the environmental impacts of loans, within Wal-Mart to green its purchasing practices, or within intergovernmental forums to negotiate international environmental agreements. This second edition of *Historical Dictionary of Environmentalism* contains a chronology, an introduction, and an extensive bibliography. The dictionary section has over 300 cross-referenced entries on important events, issues, organizations, ideas, and people shaping the direction of environmentalism worldwide. This book is an excellent access point for students, researchers, and anyone wanting to know more about environmentalism.

Cosmopolitical Ecologies Across Asia Riemsara Kuyakanon, Hildegard Diemberger, David Sneath, 2021-11-25 *Cosmopolitical Ecologies Across Asia* offers a unique insight into the non-human and spiritual dimensions of environmental

management in a changing world This volume presents a comparative place based exploration of landscapes across Asia and the entities practices and knowledges that inhabit them Rather than treating sacred mountains terrains and water sources as self contained esoteric religious phenomena the authors consider them within critical cosmopolitical ecologies framings in which non human entities are engaged as actors in the socio political arena The chapters include case studies of healing springs recognized by governments and sacred mountains that are addressed by heads of states and Communist Party cadres or that speak to the faithful through spirit mediums in a politics of re enchantment Contributors explore the diverse ways in which non human entities such as forest spirits reindeer mountains and Buddhist Masters of the Land are engaged by humans to navigate environmental change and address a range of ecological threats from large scale mining to climate change Cosmopolitical ecologies approaches encompass the healing power of topography as well as transformative intimacies with other than human beings such as sparrows within an Islamic eco theological poetic setting In this light the book observes dynamic and creative processes of cosmological innovation including the repurposing of ritual to address challenges such as the Covid 19 epidemic This book will be of great interest to students and scholars of environment and society across disciplinary perspectives in general and to anthropologists human geographers political ecologists indigenous studies area studies environmental sciences and environmental humanities scholars in particular The Introduction to this book is freely available as a downloadable Open Access PDF at <http://www.taylorfrancis.com> under a Creative Commons Attribution Non Commercial No Derivatives CC BY NC ND 4 0 license

Historical Dictionary of Thailand Gerald W. Fry, Gayla S. Nieminen, Harold E. Smith, 2013-08-08 Throughout its history Thailand has shown remarkable resiliency adaptability and creativity in responding to serious threats and crises and this since much earlier times when it was known as Siam This book while focusing on the modern period does reach back to ancient kingdoms but also shows the impressive rise to a modern democracy although still endowed with a king and even more impressively an economic tiger Moreover it has become a prime tourist destination and is thus known to vast numbers of foreigners as a sort of instant Asia The Historical Dictionary of Thailand now in its third edition covers this amazing story in various ways First the chronology traces the most significant events from year to year The introduction then provides a good overview of the land and people the history and traditions and where it now seems to be heading The dictionary which by now has hundreds of detailed and cross referenced entries looks more closely at important persons places institutions and events as well as more generally its politics economy society culture and religion So this is an excellent reference work not only for scholars but many others who have visited the country and were fascinated by it

Whispering the Strategies of Language: An Emotional Quest through **A Land On Fire The Environmental Consequences Of The Southeast Asian Boom**

In a digitally-driven earth where screens reign supreme and immediate communication drowns out the subtleties of language, the profound secrets and mental subtleties concealed within phrases usually get unheard. Yet, situated within the pages of **A Land On Fire The Environmental Consequences Of The Southeast Asian Boom** a fascinating fictional prize blinking with organic emotions, lies an extraordinary journey waiting to be undertaken. Written by a skilled wordsmith, that marvelous opus attracts visitors on an introspective journey, delicately unraveling the veiled truths and profound influence resonating within ab muscles cloth of each and every word. Within the psychological depths with this poignant review, we will embark upon a sincere exploration of the book is key themes, dissect their charming writing design, and succumb to the powerful resonance it evokes strong within the recesses of readers hearts.
