Research Advances in Alcohol and Drug Problems Howard Cappel,2013-11-11 This the ninth volume in the series appears some 13 years after the first Like most of its predecessors Volume 9 is deliberately

eclectic covering a range of topics that the editors think worthy of inclusion Some of the chapters such as the review of the literature on benzodiazepines represent areas that have received relatively little attention in previous volumes largely because the literature has not previously been ripe for review Others represent literatures that have been reviewed in the past but which continue to advance in sufficient measure that their ripening never ceases Shepard Siegel's contribution represents a relative rarity in previous volumes a chapter not laden with a consideration of current empirical work but a reflective essay designed to stir thought with some provocative ideas The editors trust that readers will continue to find Research Advances to be an important repository of knowledge in the alcohol and drug fields The Editors Toronto IX
