**PREFACE** THE Author of this very practical treatise on Scotch Loch Fishing desires clearly that it may be of use to all who had it He does not pretend to have written anything new but to have attempted to put what he has to say in as readable a form as possible Everything in the way of the history and habits of fish has been studiously avoided and technicalities have been used as sparingly as possible The writing of this book has afforded him pleasure in his leisure moments and that pleasure would be much increased if he knew that the perusal of it would create any bond of sympathy between himself and the angling community in general This section is interleaved with blank sheets for the readers notes The Author need hardly say that any suggestions addressed to the case of the publishers will meet with consideration in a future edition We do not pretend to write or enlarge upon a new subject Much has been said and written and well said and written too on the art of fishing but loch fishing has been rather looked upon as a second rate performance and to dispel this idea is one of the objects for which this present treatise has been written Far be it from us to say anything against fishing lawfully practised in any form but many pent up in our large towns will bear us out when we say that on the whole a days loch fishing is the most convenient One great matter is that the loch fisher is dependent on nothing but enough wind to curl the water and on a large loch it is very seldom that a dead calm prevails all day and can make his arrangements for a day weeks beforehand whereas the stream fisher is dependent for a good take on the state of the water and however pleasant and easy it may be for one living near the banks of a good trout stream or river it is quite another matter to arrange for a days river fishing if one is looking forward to a holiday at a date some weeks ahead Providence may favour the expectant angler with a good day and the water in order but experience has taught most of us that the good days are in the minority and that as is the case with our rapid running streams such as many of our northern streams are the water is either too large or too small unless as previously remarked you live near at hand and can catch it at its best A common belief in regard to loch fishing is that the tyro and the experienced angler have nearly the same chance in fishing the one from the stern and the other from the bow of the same boat Of all the absurd beliefs as to loch fishing this is one of the most absurd Try it Give the tyro either end of the boat he likes give him a cast of all flies he may fancy or even a cast similar to those which a crack may be using and if he catches one for every three the other has he may consider himself very lucky Of course there are lochs where the fish are not abundant and a beginner may come across as many as an older fisher but we speak of lochs where there are fish to be caught and where each has a fair chance Again it is said that the boatman has as much to do with catching trout in a loch as the angler Well we dont deny that In an untried loch it is necessary to have the guidance of a good boatman but the same argument holds good as to stream fishing

Mathematics With Hints on Methods of Teaching The education of the child must accord both in mode and arrangement with the education of mankind as considered historically or in other words the genesis of knowledge in the individual must follow the same course as the genesis of knowledge in the race To M Comte we believe society owes the enunciation of this doctrine a doctrine which we may accept without committing ourselves to his theory of the genesis of knowledge either in its causes or its order If this principle held also by Pestalozzi and Froebel be correct then it would seem as if the knowledge of the history of a science must be an effectual aid in teaching that science Be this doctrine true or false certainly the experience of many instructors establishes the importance of mathematical history in teaching With the hope of being of some assistance to my fellow teachers I have prepared this book and have interlined my narrative with occasional remarks and suggestions on methods of teaching About the Publisher Forgotten Books publishes hundreds of thousands of rare and classic books Find more at [www.forgottenbooks.com](http://www.forgottenbooks.com) This book is a reproduction of an important historical work Forgotten Books uses state of the art technology to digitally reconstruct the work preserving the original format whilst repairing imperfections present in the aged copy In rare cases an imperfection in the original such as a blemish or missing page may be replicated in our edition We do however repair the vast majority of imperfections successfully any imperfections that remain are intentionally left to preserve the state of such historical works

1898 edition Excerpt MODERN EUROPE We find it convenient to choose the time of the capture of Constantinople by the Turks as the date at which the Middle Ages ended and Modern Times began In 1453 the Turks battered the walls of this celebrated metropolis with cannon and finally captured the city the Byzantine Empire fell to rise no more Calamitous as was this event to the East it acted favourably upon the progress of learning in the West A great number of learned Greeks fled into Italy bringing with them precious manuscripts of Greek literature This contributed vastly to the reviving of classic learning Up to this time Greek masters were known only through the often very corrupt Arabic manuscripts but now they began to be studied from original sources and in their own language The first English translation of Euclid was made in 1570 from the Greek by Sir Henry Billingsley assisted by John Dee

About the middle of the fifteenth century printing was invented books became cheap and plentiful the printing press transformed Europe into an audience room Near the close of

the fifteenth century America was discovered and soon after the earth was circumnavigated The pulse and pace of the world began to quicken Men s minds became less servile they became clearer and stronger The indistinctness of thought which was the characteristic feature of mediaeval learning began to be remedied chiefly by the steady cultivation of Pure Mathematics and Astronomy Dogmatism was attacked there arose a long struggle with the authority of the Church and the established schools of philosophy The Copernican System was set up in opposition to the time honoured Ptolemaic System The long and eager contest between the two culminated in a crisis at the
