A History of Italian Fertility During the Last Two Centuries Massimo Livi Bacci, 2015-03-08 Profound changes have occurred in the demography and sociology of Italian fertility since Napoleonic times Using the statistical system instituted in 1861 with national unification Massimo Livi Bacci provides a systematic and detailed analysis of fertility trends in Italy in the nineteenth and twentieth centuries He brings to light the main features of the secular decline its rapid occurrence in the northern and central areas the widening urban rural gap the shaping of social and economic differences and the late slow downward trend in the South Multivariate statistical analysis enables the author to measure the changing relationship between fertility and social or economic phenomena Historical evidence illustrates the effect on fertility of mass emigration and Fascist policy as well as of social changes such as those in agrarian structure mobility and communications An altered attitude toward procreation is evident in some parts of Italy in the early nineteenth century. The decline becomes apparent in certain northern and central regions in the 1870s and 1880s and it appears at the aggregate national level in the 1890s Originally published in 1977 The Princeton Legacy Library uses the latest print on demand technology to again make available previously out of print books from the distinguished backlist of Princeton University Press These editions preserve the original texts of these important books while presenting them in durable paperback and hardcover editions The goal of the Princeton Legacy Library is to vastly increase access to the rich scholarly heritage found in the thousands of books published by Princeton University Press since its founding in 1905 **Health and Disease in Human History** Robert I. Ross, 2006 Bringing together essays by twenty one distinguished scholars who have helped shape the field of family sociology in the last decade this interdisciplinary anthology examines variation within family experience especially as it has evolved across racial ethnic social gender and generational lines The essays place historical and institutional frameworks at the center of the discussion In depth chapter introductions along with critical questions to spark class discussion make this an ideal text for courses focusing on family composition trends and controversies in the United States **New Approaches to Death in Cities** during the Health Transition Diego Ramiro Fariñas, Michel Oris, 2016-11-14 This book presents recent efforts and new approaches to improve our understanding of the evolution of health and mortality in urban environments in the long run looking at transformation and adaptations during the process of rapid population growth In a world characterized by large and rapidly evolving urban environments the past and present challenges cities face is one of the key topics in our society Cities are a world of differences and consequently of inequalities At the same time cities remain above all the spaces of interactions among a variety of social groups the places where poor middle class and wealthy people as well as elites have coexisted in harmony or tension Urban areas also form specific epidemiological environments since they are characterized by population concentration and density and a high variety of social spaces from wealthy neighborhoods to slums Inversely and coherently cities develop answers in terms of sanitary policies and health infrastructures This balance between risk and protective factors is however not at all constant across time and space and is especially endangered in periods of massive demographic growth particularly periods of urbanization mainly led by immigration flows that transform both the socioeconomic and demographic composition of urban populations and the morphological nature of urban environments Therefore this book is an unique contribution in which present day and past socio demographic and health challenges confronted by big urban environments are combined Workshop to Office Miriam Cohen, 1993 Cohen examines shifting

She tracks the appearance of virility in two of the sources of fascist rhetoric Gabriele D Annunzio and F T Marinetti in the writings of the futurist Valentine de Saint Point and the fascist feminist Teresa Labriola and in the speeches of Mussolini A critical and timely contribution to the current reappraisal of fascist ideology this book will interest anyone concerned with the relations between gender sexuality and fascist discourse **If Eight Hours Seem Too Few** Elda Gentili Zappi,1991-01-01 This book is the first to present a vivid and accurate picture of the thousands of women who worked weeding the rice fields in northern Italy during the early part of the nineteenth century It explores a wide range of issues including the political economic and social history of Italy labor legislation the role of the judicial system the sexual division of labor family structure class conflict between the rural proletariat and the politically influential capitalist farmers work related diseases internal migration of labor and child labor The author provides penetrating insights into the Socialist Party's efforts to wrest women workers from the influence of the Catholic Church the history of Italian feminism and the campaign for the vote and finally the workers opposition to Italy s entrance into World War I She analyzes the weeders relations with labor organizers their desire to preserve their autonomy and their decisions regarding labor actions and she highlights similarities between the weeders experiences and those of other women workers and labor organizers in Europe and the U S Catalog of Copyright Entries. Last, 2014-06-10 Look around you and think for a minute Is America too crowded For years we have been warned about the looming danger of overpopulation people jostling for space on a planet that s busting at the seams and running out of oil and food and land and everything else It s all bunk The population bomb never exploded Instead statistics from around the world make clear that since the 1970s we ve been facing exactly the opposite problem people are having too few babies Population growth has been slowing for two generations The world's population will peak and then begin shrinking within the next fifty years In some countries it s already started Japan for instance will be half its current size by the end of the century In Italy there are already more deaths than births every year China's One Child Policy has left that country without enough women to marry its men not enough young people to support the country's elderly and an impending population contraction that has the ruling class terrified And all of this is coming to America too In fact it's already here Middle class Americans have their own informal one child policy these days And an alarming number of upscale professionals don t even go that far they have dogs not kids In fact if it weren t for the wave of immigration we experienced over the last thirty years the United States would be on the verge of shrinking too What happened Everything about modern life from Bugaboo strollers to insane college tuition to government regulations has pushed Americans in a single direction making it harder to have children And making the people who do still want to have children feel like second class citizens What to Expect When No One's Expecting explains why the population implosion happened and how it is remaking culture the economy and politics

both at home and around the world Because if America wants to continue to lead the world we need to have more babies The Making of Urban Europe, 1000-1994 Paul M. HOHENBERG, Lynn Hollen Lees, Paul M Hohenberg, 2009-06-30 Europe became a land of cities during the last millennium The story told in this book begins with North Sea and Mediterranean traders sailing away from Dorestad and Amalfi and with warrior kings building castles to fortify their conquests It tells of the dynamism of textile towns in Flanders and Ireland While London and Hamburg flourished by reaching out to the world and once vibrant Spanish cities slid into somnlence a Russian urban network slowly grew to rival that of the West Later as the tide of industrialization swept over Europe the most intense urban striving and then settled back into the merchant cities and baroque capitals of an earlier era By tracing the large scale precesses of social economic and political change within cities as well as the evolving relationships between town and country and between city and city the authors present an original synthsis of European urbanization within a global context They divide their study into three time periods making the early modern era much more than a mere transition from preindustrial to industrial economies Through both general analyzes and incisive case studies Hohenberg and Lees show how cities originated and what conditioned their early development and later growth How did urban activity respond to demographic and techological changes Did the social consequences of urban life begin degradation or inspire integration and cultural renewal New analytical tools suggested by a systems view of urban relations yield a vivid dual picture of cities both as elements in a regional and national heirarchy of central places and also as junctions in a transnational network for the exchange of goods information and influence A lucid text is supplemented by numerous maps illustrations figures and tables and by substantial bibliography Both a general and a scholarly audience will find this book engrossing reading Table of Contents Introduction Urdanization in Perspective PART I The Preindustrial Age eleventh to Fourteenth Centuries 1 Structure and Functions of Medieval Towns 2 Systems of Early Cities 3 The Demography of Preindustrial Cities PART II The Industrial Age Fourteenth to Eighteenth Centuries 4 Cities in the Early Modern European Economy 5 Beyond Baroque Urbanism PART III The Industrial Age Eighteenth to Twentieth Centuries 6 Industrial and the Cities 7 Urban Growth and Urban Systems 8 The Human Consequences of Industrial Urbanization 9 The Evolution and Control of Urban Space 10 Europe's Cities in the Twentieth Century Appendix A A Cyclical Model of an Economy Appendix B Size Distributions and the Ranks Size Rule Notes Bibliography Index Reviews of this book A readable and ambitious introduction to the long history of European urbanization Economic History Review Reviews of this book A trailblazing history of the transformation of Europe John Barkham Reviews Reviews of this book A marvelously compendious account of a millennium of urban development which accomplishes that most difficult of assignments to design a work that will safely introduce the newcomer to the subject and at the same time stimulate professional colleagues to review positions Urban Studies **Crossings** Walter Nugent, 1992-12-22 During the period 1870 1914 the Atlantic was a broad highway for migration Unchecked by government restrictions wars or economic depressions and aided by the new technologies of

steamships and railroads millions of people uprooted their lives and set off for new lands Americans understand this story as a great saga of immigrants and assimilation of people drawn to the United States as to the promised land of opportunity But what lay behind this great migration And how unique was the American experience To answer these questions Walter Nugent looks at this massive movement of people from both sides of the Atlantic Tracing the migrations of more than a dozen national groups from Europe to the four major New World receiving countries Argentina Brazil Canada and the United States Nugent discovers a complex story of crossings and recrossings of tens of millions of human experiences and decisions Nugent follows the migrants who left rural Europe for American mines and factories but he also compares the experiences of Europeans on the very different frontiers of settlement at the far reaches of the four receiving countries And he discusses the migration of women not only wives and mothers within migrating families but also individuals seeking a new life on their own Nugent asks important questions about American uniqueness in the context of transatlantic migration history and about the validity of widely held theories of development He finds that the history of the great migrations is more complex and subtle than these theories His superb synthesis broadens the scope and clarifies the details of a fascinating story of enormous social and demographic change Women, Gender and Transnational Lives Donna R. Gabaccia, Franca Iacovetta, 2002-01-01 In this transnational analysis of women and gender in Italy s world wide migration Franca Iacovetta and Donna Gabaccia challenge the stereotype of the Italian immigrant woman as silent and submissive a woman who stays in the shadows
