Between Dream Houses and "God's Own Junkyard": Architecture and the Built Environment in American Suburban Fiction Stefanie Strebel,2021-06-28 The American suburb is a space dominated by architectural mass production sprawl as well as a monotonous aesthetic eclecticism and many critics argue that it has developed from a postwar utopia into a disorienting environment with which it is difficult to identify The typical suburb has come to display characteristics of an atopia that is a space without borders or even a non place a generic space of transience Dealing with the representation of architecture and the built environment in suburban literature and film from the 1920s until present this study demonstrates that in its fictional representations too suburbia has largely turned into a place of non architecture A lack of architectural ethos and an abundance of Junkspace define suburban narratives causing an increasing sense of disorientation and entropy in fictional characters **Smithsonian Asian Pacific American History, Art, and Culture in 101 Objects** Theodore S. Journal     The Genesis of Israel and Egypt Emmet Sweeney, 2023-10-01 The Genesis of Israel and Egypt examines the earliest phase of historical consciousness in the ancient Near East looking in particular at the mysterious origins of Egypt's civilization and its links with Mesopotamia and the early Hebrews The book takes a radically alternative view of the rise of high civilization in the Near East and the forces which propelled it The author Emmet Sweeney finds that the early civilizations developed amidst a background of massive and repeated natural catastrophes events which had a profound effect upon the ancient peoples and left its mark upon their myths legends customs and religions Ideas found in all corners of the globe concepts such as dragon worship pyramid building and human sacrifice are shown by Sweeney to have a common origin in the cataclysmic events of the period termed the eruptive age by legendary English explorer Percy Fawcett Terrified and traumatized by the forces of nature people all over the world began to keep an obsessive watch on the heavens and to offer blood sacrifices to the angry sky gods These events which are fundamental to any understanding of the first literate cultures have nonetheless been completely effaced from the history books and an official history of mankind which is little more than an elaborate fiction now graces the bookshelves of the world's great libraries Starting with clues unearthed by history sleuth Immanuel Velikovsky and others Emmet Sweeney takes the investigation further While the Near Eastern civilizations are generally considered to have taken shape around 3300 BC about 2 000 years before those of China and the New World Ages in Alignment demonstrates that they had no 2 000 year head start All the ancient civilizations arose simultaneously around 1300 BC in the wake of a terrible natural catastrophe recalled in legend as the Flood or Deluge Sweeney points out that the presently accepted chronology of Egypt is not based on science but on venerated literary tradition This chronology had already been established in its present form by the third century BC when Jewish historians utilizing the History of Egypt by the Hellenistic author Manetho sought to tie in Egypt's history with that of the Bible Apparent gaps and weird repetitions resulted Improbable feats like the construction of major cut stone engineering projects before the advent of steel tools or Pythagorean geometry point to the weaknesses of the traditional view Taking a more rigorous approach and pointing to solid evidence Emmet Sweeney shows where names overlap and where one and the same group is mistaken for different peoples in different times Volume 1 The Genesis of Israel and Egypt looks at the archaeological evidence for the Flood evidence now misinterpreted and ignored This volume examines the rise of the first literate cultures in the wake of the catastrophe and goes on to trace the story of the great migration which led groups of early Mesopotamians westward toward Egypt where they helped to establish Egyptian civilization This migration recalled in the biblical story of Abraham provides the first link between Egyptian and Hebrew histories The next link comes a few generations later with Imhotep the great seer who solved the crisis of a seven year famine by interpreting pharaoh Djoser's dream Imhotep is shown to be the same person as Joseph son of Jacob     **The Ark, and Odd Fellows' Western Magazine**, 1850     **Manhattan Phoenix** Daniel S. Levy, 2022 Shows vividly how the Great Fire of 1835 which nearly leveled

Manhattan also created the ashes from which the city was reborn In 1835 a merchant named Gabriel Disosway marveled at a great fire enveloping New York commenting on how it spread more and more vividly from the fiery arena rendering every object far and wide minutely discernible the lower bay and its Islands with the shores of Long Island and New Jersey The fire Disosway witnessed devastated a large swath of lower Manhattan clearing roughly the same number of acres as the World Trade Center bombing Manhattan Phoenix explores the emergence of modern New York after it emerged from the devastating fire of 1835 a catastrophe that revealed how truly unprepared and haphazardly organized it was to become a world class city merely a quarter of a century later The one led to other New York effectively had to start over Daniel Levy s book charts Manhattan s almost miraculous growth while interweaving the lives of various New Yorkers who took part in the city s transformation Some are well known such as the land baron John Jacob Astor and Mayor Fernando Wood Others less so as with the African American oysterman Thomas Downing and the Bowery Theatre impresario Thomas Hamblin The book celebrates Fire Chief James Gulick who battled the blaze and celebrates the work of the architect Alexander Jackson Davis who built marble palaces for the rich It chronicles the career of the merchant Alexander Stewart who constructed the first department store follows the struggles of the abolitionist Arthur Tappan and records of the efforts of the engineer John Bloomfield Jervis who brought clean water into homes And this resurgence owed so much to the visionaries such as Frederick Law Olmsted and Calvert Vaux who designed Central Park creating a refuge that it remains to this day Manhattan Phoenix reveals a city first in flames and then in flux but resolute in its determination to emerge as one of the world s greatest metropolises

*Remembering Women* Christine Lehnert, 2025-06-19 Women do have a history of their own All we need to do is remember it In this illuminating new investigation Christine Lehnert looks back at our collective memory to explore the myriad ways that women in the past have enjoyed a more egalitarian life Due to advances in bioarchaeological methods scientists have discovered that one out of three women in Ancient Scythia was an active warrior buried with her weapons Far from being confined to their homes these women rode out to hunt travelled to distance places or used weapons to fend off their enemies These warriors were no exceptions to the rule with women enjoying a significantly higher degree of equality than their Greek contemporaries *Remembering Women* argues that there is a historical precedent for a fairer society From reappraisals of well known objects such as the earliest human bone calendars from the Stone Age to revelatory findings of innovative bioarchaeological methods used on human remains from Ancient Scythia evidence is accumulating that there were places in the past where all women were allowed to thrive Interweaving new findings from archaeology with the stories of her mother and grandmothers as well as her everyday experiences as a woman living today Lehnert explores our collective memory of women and argues that it needs to change if we are to create an egalitarian society *Remembering Women* follows the traces

left in the material literary and archaeological record by our foremothers and their heirlooms artwork and stories to take a fresh look at our life in the present

**Inhabitable Infrastructures** CJ Lim, 2017-05-25 *Inhabitable Infrastructures* Science fiction or urban future the follow up to *Food City* and *Smartcities* and *Eco Warriors* from one of the world's leading urban design and architectural thinkers explores the potential of climate change related multi use infrastructures that address the fundamental human requirements to protect to provide and to participate The stimulus for the infrastructures derives from postulated scenarios and processes gleaned from science fiction and futurology as well as the current body of scientific knowledge regarding changing environmental impacts on cities Science fiction is interdisciplinary by nature aggregates the past and present and evaluates both lay opinions and professional strategies in an attempt to develop foresight and to map possible futures The research culminates in the creation of innovative multi use infrastructures and integrated self sustaining support systems that meet the challenges posed through climate change and overpopulation and the reciprocal benefits of simultaneously addressing the threat and the shaping of cities J G Ballard has written that the psychological realm of science fiction is most valuable in its predictive function and in projecting emotions into the future The knowledge from the book is widely transferable constituting both solutions and speculative visions of future urban environments The book is indispensable reading for professionals and students in the fields of urban design architecture engineering and environmental socio politics

**Lock, Stock, and Barrel** Clayton E. Cramer, 2018-02-21 This provocative book debunks the myth that American gun culture was intentionally created by gun makers and demonstrates that gun ownership and use have been a core part of American society since our colonial origins Revisionist historians argue that American gun culture and manufacturing are relatively recent developments They further claim that widespread gun violence was largely absent from early American history because guns of all types and especially handguns were rare before 1848 According to these revisionists American gun culture was the creation of the first mass production gun manufacturers who used clever marketing to sell guns to people who neither wanted nor needed them However as proven in this first scholarly history of gun culture in early America gun ownership and use have in fact been central to American society from its very beginnings **Lock Stock and Barrel** The Origins of American Gun Culture shows that gunsmithing and gun manufacturing were important parts of the economies of the colonies and the early republic and explains how the American gun industry helped to create our modern world of precision mass production and high wages for workers
