

The background of the book cover is a detailed, classical architectural scene. It features a long, perspective-filled hallway with high vaulted ceilings and a series of arches receding into the distance. On either side of the central walkway are tall, dark pedestals or columns, each topped with a golden statue. The statues appear to be of various figures, possibly deities or historical figures, rendered in a classical style. The lighting is warm and dramatic, highlighting the textures of the stone and the golden hues of the statues. The overall atmosphere is one of grandeur and historical significance.

## **A History Of Western Musical Aesthetics:**

A History of Western Musical Aesthetics Edward A. Lippman, 1994-01-01 Among the fine arts music has always held a paramount position Musical training is a more potent instrument than any other because rhythm and harmony find their way into the inward places of the soul wrote Plato From the music of the spheres of Pythagoras to the Future Music of Wagner from churches courts cathedrals and concert halls to amateur recitals military marches and electronic records music has commanded the perpetual attention of every civilization in history This book follows through the centuries the debates about the place and function of music the perceived role of music as a good or bad influence on the development of character as a magical art or a domestic entertainment and as a gateway to transcendental truths Edward Lippman describes the beginnings of musical tradition in the myths and philosophies of antiquity He shows how music theory began to take on new dimensions and intensity in the seventeenth century how musical aesthetics was specifically defined and elaborated in the eighteenth century and how by the nineteenth century music became the standard by which other arts were judged The twentieth century added problems pressure and theories as music continued to diversify and as cultures viewed each other with more respect

Lippman, Laura Tunbridge, 1992 The Oxford Handbook of Western Music and Philosophy Tomás McAuley, Nanette Nielsen, Jerrold Levinson, Ariana Phillips-Hutton, 2021 The Oxford Handbook of Western Music and Philosophy celebrates the ways in which musicians have historically called upon philosophy as a source of inspiration and encouragement and scholars of music through the ages have turned to philosophy for insight into music and into the worlds that sustain it Oxford History of Western Music Richard Taruskin, 2009-07-27 The universally acclaimed and award winning Oxford History of Western Music by one of the most prominent and provocative musicologists of our time Richard Taruskin Now in paperback the set has been reconstructed to be available for the first time as individual books each one taking on a critical time period in the history of western music *The Oxford History of Western Music* Richard Taruskin, Christopher Howard Gibbs, 2019 Takes students beyond the who what and when exploring the how and why behind the story of Western Music Now in its second edition this text immerses students in the engaging story of the Western musical tradition By emphasizing the connections among works both within cultural eras and across time and place the text goes beyond a basic retelling of the music's history to build students ability to listen critically to key works The Oxford History of Western Music College Edition is a complete program for building students understanding and appreciation of the classical canon *Aesthetics of Music* Stephen Downes, 2014-06-27 Aesthetics of Music Musicological Approaches is an anthology of fourteen essays each addressing a single key concept or pair of terms in the aesthetics of music collectively serving as an authoritative work on musical aesthetics that remains as close to the music as possible Each essay includes musical examples from works in the 18th 19th and into the 20th century Topics have been selected from amongst widely recognised central issues in musical aesthetics as

well as those that have been somewhat neglected to create a collection that covers a distinctive range of ideas All essays cover historical origins sources and developments of the chosen idea survey important musicological approaches and offer new critical angles or musical case studies in interpretation

**Bach in Berlin** Celia Applegate, 2014-10-31 Bach's St Matthew Passion is universally acknowledged to be one of the world's supreme musical masterpieces yet in the years after Bach's death it was forgotten by all but a small number of his pupils and admirers The public rediscovered it in 1829 when Felix Mendelssohn conducted the work before a glittering audience of Berlin artists and intellectuals Prussian royals and civic notables The concert soon became the stuff of legend sparking a revival of interest in and performance of Bach that has continued to this day Mendelssohn's performance gave rise to the notion that recovering and performing Bach's music was somehow national work In 1865 Wagner would claim that Bach embodied the history of the German spirit's inmost life That the man most responsible for the revival of a masterwork of German Protestant culture was himself a converted Jew struck contemporaries as less remarkable than it does us today a statement that embraces both the great achievements and the disasters of 150 years of German history In this book Celia Applegate asks why this particular performance crystallized the hitherto inchoate notion that music was central to Germans' collective identity She begins with a wonderfully readable reconstruction of the performance itself and then moves back in time to pull apart the various cultural strands that would come together that afternoon in the Singakademie The author investigates the role played by intellectuals journalists and amateur musicians she is one herself in developing the notion that Germans were the people of music Applegate assesses the impact on music's cultural place of the renewal of German Protestantism historicism the mania for collecting and restoring and romanticism In her conclusion she looks at the subsequent careers of her protagonists and the lasting reverberations of the 1829 performance itself

***Representing Non-Western Music in Nineteenth-century Britain*** Bennett Zon, 2007 Explores the influence of anthropological theories travel literature psychology and other intellectual trends on the perception of non-Western music and elucidates the roots of today's field of ethnomusicology

**Poetry and the Romantic Musical Aesthetic** James H. Donelan, 2008-03-24 James H Donelan describes how two poets a philosopher and a

composer Herder, Wordsworth, Hegel, and Beethoven developed an idea of self-consciousness based on music at the turn of the nineteenth century. This idea became an enduring cultural belief: the understanding of music as an ideal representation of the autonomous creative mind. Against a background of political and cultural upheaval, these four major figures, all born in 1770, developed this idea in both metaphorical and actual musical structures, thereby establishing both the theory and the practice of asserting self-identity in music. Beethoven still carries the image of the heroic composer; today, this book describes how it originated in both his music and in how others responded to him. Bringing together the fields of philosophy, musicology, and literary criticism, Donelan shows how this development emerged from the complex changes in European cultural life taking place between 1795 and 1831.
