**1177 B.C.** Eric H. Cline, 2021-02-02 A bold reassessment of what caused the Late Bronze Age collapse In 1177 B C marauding groups known only as the Sea Peoples invaded Egypt The pharaoh s army and navy managed to defeat them but the victory so weakened Egypt that it soon slid into decline as did most of the surrounding civilizations After centuries of brilliance the civilized world of the Bronze Age came to an abrupt and cataclysmic end Kingdoms fell like dominoes over the course of just

a few decades No more Minoans or Mycenaeans No more Trojans Hittites or Babylonians The thriving economy and cultures of the late second millennium B C which had stretched from Greece to Egypt and Mesopotamia suddenly ceased to exist along with writing systems technology and monumental architecture But the Sea Peoples alone could not have caused such widespread breakdown How did it happen In this major new account of the causes of this First Dark Ages Eric Cline tells the gripping story of how the end was brought about by multiple interconnected failures ranging from invasion and revolt to earthquakes drought and the cutting of international trade routes Bringing to life the vibrant multicultural world of these great civilizations he draws a sweeping panorama of the empires and globalized peoples of the Late Bronze Age and shows that it was their very interdependence that hastened their dramatic collapse and ushered in a dark age that lasted centuries A compelling combination of narrative and the latest scholarship 1177 B C sheds new light on the complex ties that gave rise to and ultimately destroyed the flourishing civilizations of the Late Bronze Age and that set the stage for the emergence of classical Greece

**Mesopotamia and the Legends of Gilgamesh** Faruq Zamani, Mankind lived in Paradise for a long time God said to unnamed colleagues Is it possible that he may also take from the Tree of Life and live forever Having eaten the Fruit of Knowledge but forbidden from reaching for the Fruit of the Tree of Life Following Adam's eating of the Fruit of Knowledge Since then man has sought Immortality withheld by God Yet throughout the millennia it has gone unnoticed that while concerning Yahweh's Tree of Knowing Adam became a part of us after eating it no such statement has been made regarding From the fruit of the Tree of Life we can live forever Was it because the promise of Immortality made to Mankind as a distinctive attribute of the gods was nothing more than a grand illusion A king of Uruk Gilgamesh son of Ninsun and Lugalbanda was the first to try and find out While the tales of Enmerkar and Lugalbanda are enchanting and intriguing the post Diluvial Luga has to be one of the most compelling Gilgamesh was the demigod who ruled Uruk from 2750 to 2600 BCE and had the longest and most detailed records Throughout Gilgamesh's long Epic he searches

for Immortality believing that since two thirds of him are gods and one third are humans he should not peer over the wall as a mortal Genealogically he was more than just a demigod more than a fifty fifty god King Lugalbanda son of Lnanna and High Priest of Uruk possessed the divine determinative Gilgamesh was described as having the essence of Ninurta Enlil's foremost son because of his mother Nin Sun Lady Who Irrigates was the daughter of Ninurta and his spouse Batu Anu's youngest daughter Bau was of a noble family

**A History of Science in World Cultures** Scott L. Montgomery, Alok Kumar, 2015-06-12 To understand modern science it is essential to recognize that many of the most fundamental scientific principles are drawn from the knowledge of ancient civilizations Taking a global yet comprehensive approach to this complex topic A History of Science in World Cultures uses a broad range of case studies and examples to demonstrate that the scientific thought and method of the present day is deeply rooted in a pluricultural past Covering ancient Egypt Mesopotamia India Greece China Islam and the New World this volume discusses the scope of scientific and technological achievements in each civilization and how the knowledge it developed came to impact the European Renaissance Themes covered include the influence these scientific cultures had upon one another the power of writing and its technologies visions of mathematical order in the universe and how it can be represented and what elements of the distant scientific past we continue to depend upon today Topics often left unexamined in histories of science are treated in fascinating detail such as the chemistry of mummification and the Great Library in Alexandria in Egypt jewellery and urban planning of the Indus Valley hydraulic engineering and the compass in China the sustainable agriculture and dental surgery of the Mayas and algebra and optics in Islam This book shows that scientific thought has never been confined to any one era culture or geographic region Clearly presented and highly illustrated A History of Science in World Cultures is the perfect text for all students and others interested in the development of science throughout history

A History of European Literature Walter Cohen, 2017 Walter Cohen argues that the history of European literature and each of its standard periods can be illuminated by comparative consideration of the different literary languages within Europe and by the ties of European literature to world literature World literature is marked by recurrent systematic features outcomes of the way that language and literature are at once the products of major change and its agents Cohen tracks these features from ancient times to the present distinguishing five main overlapping stages Within that framework he shows that European literature's ongoing internal and external relationships are most visible at the level of form rather than of thematic statement or mimetic representation European literature emerges from world literature before the birth of Europe during antiquity whose Classical languages are the heirs to the complex heritage of Afro Eurasia This legacy is later transmitted by Latin to the various vernaculars The uniqueness of the process lies in the gradual displacement of the learned language by the vernacular long dominated by Romance literatures That development subsequently informs the second crucial differentiating dimension of European literature the multicontinental expansion of its languages and characteristic genres especially the novel beginning in the Renaissance This

expansion ultimately results in the reintegration of European literature into world literature and thus in the creation of today's global literary system. The distinctiveness of European literature is to be found in these interrelated trajectories.

**Hammurabi** Judith Levin, 2013. Almost 4,000 years ago a young king named Hammurabi inherited the small and unimportant city of Babylon in the region of Mesopotamia, now in present-day Iraq. **Harlot or Holy Woman?** Phyllis A. Bird, 2019-11-20. Harlot or Holy Woman presents an exhaustive study of *qedeh*, a Hebrew word meaning consecrated woman but rendered prostitute or sacred prostitute in Bible translations. Reexamining biblical and extrabiblical texts, Phyllis A. Bird questions how *qedeh* came to be associated with prostitution and offers an alternative explanation of the term, one that suggests a wider participation for women as religious specialists in Israel's early cultic practice. Bird's study reviews all the texts from classical antiquity cited as sources for an institution of sacred prostitution, alongside a comprehensive analysis of the cuneiform texts from Mesopotamia containing the cognate *qadi tu* and Ugaritic texts containing the masculine cognate *qd*. Through these texts, Bird presents a portrait of women dedicated to a deity engaged in a variety of activities from cultic ritual to wet nursing and sharing a common generic name with the *qedeh* of ancient Israel. In the final chapter, she returns to biblical texts, reexamining them in light of the new evidence from the ancient Near East. Considering alternative models for constructing women's religious roles in ancient Israel, this wholly original study offers new interpretations of key texts and raises questions about the nature of Israelite religion as practiced outside the royal cult and central sanctuary. **History of Ancient Israel** Christian Frevel, 2023-05-12. This English translation of the second edition of Christian Frevel's essential textbook *Geschichte Israels* (Kohlhammer, 2018) covers the history of Israel from its beginnings until the Bar Kokhba revolt (132-135 CE). Frevel draws on archaeological evidence, inscriptions, and monuments as well as the Bible to sketch a picture of the history of ancient Israel within the context of the southern Levant that is sometimes familiar but often fresh and unexpected. Frevel has updated the second German edition with the most recent research of archaeologists and biblical scholars, including those based in Europe. Tables of rulers, a glossary, a timeline of the ancient Near East, and resources arranged by subject make this book an accessible essential textbook for students and scholars alike. **Introducing the Old Testament** Rolf A. Jacobson, Michael J. Chan, 2023-03-14. This lively, engaging introduction to the Old Testament is critical and theological, lavishly illustrated, and accompanied by a variety of pedagogical aids. It serves as the Old Testament counterpart to Mark Allan Powell's successful *Introducing the New Testament* (over 105,000 copies sold). *Introducing the Old Testament* presents disputed and controversial issues fairly, neither dictating conclusions nor privileging skepticism over faith-based perspectives. The full-color interior is illustrated with photographs and fine art and includes sidebars, maps, a glossary, and further reading suggestions. A companion website through Baker Academic's Textbook eSources features a wealth of additional resources for students and instructors. Resources for students include chapter objectives, study questions, flash cards, and self-quizzes. Resources for professors include chapter objectives, discussion prompts, pedagogical suggestions,

PowerPoint slides and a test quiz bank      **From Mesopotamia to Iraq** Hans J. Nissen, Peter Heine, 2009-09-15 The recent reopening of Iraq's National Museum attracted worldwide attention underscoring the country's dual image as both the cradle of civilization and a contemporary geopolitical battleground A sweeping account of the rich history that has played out between these chronological poles *From Mesopotamia to Iraq* looks back through 10 000 years of the region's deeply significant yet increasingly overshadowed past Hans J Nissen and Peter Heine begin by explaining how ancient Mesopotamian inventions including urban society a system of writing and mathematical texts that anticipated Pythagoras profoundly influenced the course of human history These towering innovations they go on to reveal have sometimes obscured the major role Mesopotamia continued to play on the world stage Alexander the Great for example was fascinated by Babylon and eventually died there Seventh century Muslim armies made the region one of their first conquests outside the Arabian peninsula And the Arab caliphs who ruled for centuries after the invasion built the magnificent city of Baghdad attracting legions of artists and scientists Tracing the evolution of this vibrant country into a contested part of the Ottoman Empire a twentieth century British colony a republic ruled by Saddam Hussein and the democracy it has become Nissen and Heine repair the fragmented image of Iraq that has come to dominate our collective imagination In hardly any other continuously inhabited part of the globe can we chart such developments in politics economy and culture across so extended a period of time By doing just that the authors illuminate nothing less than the forces that have made the world what it is today

**Markets and Exchanges in Pre-Modern and Traditional Societies** Juan Carlos Moreno Garcia, 2021-06-30 Markets emerge in recent historical research as important spheres of economic interaction in ancient societies In the case of ancient Egypt traditional models imagined an all encompassing centralized bureaucratic economy that left practically no place for market transactions as many surviving documents only described the activities of the royal palace and of huge institutions mainly temples Yet scattered references in the sources reveal that markets and traders were crucial actors in the economic life of ancient Egypt In this perspective this volume aims to discuss the role of markets traders and economic interaction not necessarily organized through markets and the use of money metals valuable commodities in pre modern societies based on archaeological anthropological and historical evidence Furthermore it intends to integrate different perspectives about the social organization of transactions and exchanges and the different forms taken by markets from meeting places where exchanges operated under ritualized procedures and conventions to markets in which profit seeking activities were marginal in respect with other practices that stressed on the contrary community collaboration The book also deals with social forms of pre modern exchanges in which trust and ethnic solidarity guaranteed the validity of commercial operations in the absence of formal codes of laws or accepted authorities over long distances trade diasporas guilds etc Finally the volume analyzes a critical aspect of small scale trade and markets such as the commercialization of agricultural household production and its impact on the peasant economic strategies In all the book covers a diversity of topics in which recent research in the fields of

economic sociology archaeology anthropology economics and history proves invaluable in order to analyze the role of Egyptian trade in a broader perspective as well as to suggest new venues of comparative research theoretical reflection and dialogue between Egyptology and social sciences
