The Emergence of Geophysics: A Journey into the Twentieth Century R.J. Howarth, 2024-12-02 How did geophysics begin Who were the pioneers of this new science What instruments did they devise to measure the Earth-related phenomena they were interested in This Memoir attempts to answer such questions in a well-illustrated and largely non-technical account The seventeenth century saw magnetism used as an aid to prospecting for iron ore in Sweden and Isaac Newton's derivation of the law of gravitational attraction A gradually increasing interest in physics of the Earth brought forth the new discipline of geophysics in the early nineteenth century and by the end of the following century airborne and satellite-based investigations had become routine The Emergence of Geophysics explores this evolution in several parallel strands terrestrial magnetism and electricity gravity seismicity heat geodynamics and radioactivity broadly reflecting the timing of their introduction as tools aiding geophysical studies Biographical information is included for many of its practitioners and the book should be of interest to both geophysicists and to anyone interested in the history of Earth science

A Journey in Other Worlds: A Romance of the Future John Jacob Astor IV, 2017-10-24 The book offers a fictional account of life in the year 2000 It contains abundant speculation about technological invention including descriptions of a worldwide telephone network solar power air travel space travel to the planets Saturn and Jupiter and terraforming engineering projects damming the Arctic Ocean and adjusting the Earth's axial tilt by the Terrestrial Axis Straightening Company In Astor's novel the future United States is a multi-continental superpower European nations have been taken over by socialist governments which have sold most of their African colonies to the U.S. and Canada Mexico and the countries of South America have requested annexation Race conflict is a thing of the past since the dark elements of the American hegemony have died out Space travel is achieved through apery an anti-gravitational energy force Jupiter proves to be a jungle world with flesh-eating plants vampire bats giant snakes and mastodons and flying lizards The Americans discover a wealth of exploitable resources iron silver gold lead copper coal and oil Saturn in contrast is an ancient world of

silent spirits The spirit beings provide the explorers with foresight of their own deaths Out beyond Neptune the voyagers discover the icy world Cassandra home to the souls of unworthy Earthlings Excerpt from Wikipedia **A Journey Into the Interior of the Earth** Jules Verne,2014-12-04 Instead of memorizing vocabulary words work your way through an actual well written novel Even novices can follow along as each individual English paragraph is paired with the corresponding French paragraph It won't be an easy project but you'll learn a lot **Contesting Earth's History in Transatlantic Literary Culture, 1860-1935** Richard Fallon,2025-02-14 By the mid nineteenth century geologists and palaeontologists had reconstructed an authoritative narrative of Earth's deep history from the planet's molten origins to the rise of humanity Many figures in transatlantic science across subsequent decades however had problems with this narrative it was too secular inhuman and evolutionary or controlled too exclusively by elite scientists Speaking from palaeoscience's unevenly professionalized and controversy racked borders Christian fundamentalists charismatic psychics and respected scholars alike voiced their objections Until now no study has brought their work together for detailed comparative analysis Spanning from the 1860s to the interwar decades *Contesting Earth's History* examines the fascinating stories of five significant examples of fringe or borderline palaeoscience old and young earth creationism hollow earth theory clairvoyant time travel and sunken continent catastrophism Innovatively combining methods from literary studies with the history of science this book attends not just to the conceptual content of these strange sciences but also to their proponents communication of truth claims through diverse genres ranging from the scientific textbook and the technical monograph to the lost world romance and the epic poem By paying close attention to the hitherto overlooked textual forms and literary strategies of these works of pseudoscience this volume throws into relief the variant conceptions of audience evidence and method that jostled and competed in wider scientific culture during this period It also demonstrates that for all their diversity authors of borderline palaeoscience shared the desire to shift the balance of power creating textual spaces where exclusive hierarchies of scientific expertise could be levelled away These conjurors of lost worlds often captivated wide audiences and many of their bizarre astonishing and iconoclastic ideas remain with us to this day Some even inspired early science fiction by the likes of H P Lovecraft and Edgar Rice Burroughs Hijacking geologists and palaeontologists longstanding effort at making the prehistoric past visible authors on the borderlines of palaeoscience asserted their right to scientific authority and encouraged readers to gaze into time's abyss with bold new eyes **The wild man at home: or, Pictures of life in savage lands** James Greenwood (journalist.),1878 **The Tourist's Picturesque Guide to London and Its Environs ...** A.
