About Canada: Health and Illness, 2nd ed. Dennis Raphael,2017-01-13T00:00:00Z Most Canadians believe that their experiences of health and illness are shaped by genetics medical care and lifestyle choices Governments the media and disease associations reinforce this perception by pointing to medical research and a healthy lifestyle as the keys to health About Canada Health and Illness tells a different story In this new updated edition Dennis Raphael shows that living and working conditions income employment and quality of education as well as access to food housing and social services the social determinants of health are what dictate the health of Canadians And these social determinants are shaped by the public policy decisions of Canadian governments Whether you stay healthy or become ill has more to do with policies laws and regulations than genetics or lifestyle Over the past thirty years policymakers operating under the influence of neoliberalism have threatened health by allowing the growth of corporate power which has led to growing inequality in these social determinants of health This book is a wake up call to Canadians Public pressure needs to be put on elected representatives to create policies that are in the interest of the majority of Canadians not just the wealthy

New Directions in the Sociology of Aging National Research Council,Division of Behavioral and Social Sciences and Education,Committee on Population,Panel on New Directions in Social

Demography, Social Epidemiology, and the Sociology of Aging, 2013-12-26 The aging of the population of the United States is occurring at a time of major economic and social changes. These economic changes include consideration of increases in the age of eligibility for Social Security and Medicare and possible changes in benefit levels. Furthermore, changes in the social context in which older individuals and families function may well affect the nature of key social relationships and institutions that define the environment for older persons. Sociology offers a knowledge base, a number of useful analytic approaches and tools, and unique theoretical perspectives that can facilitate understanding of these demographic, economic, and social changes and, to the extent possible, their causes, consequences, and implications. *New Directions in the Sociology of Aging* evaluates the recent contributions of social demography, social epidemiology, and sociology to the study of aging and identifies promising new research directions in these subfields. Included in this study are nine papers prepared by experts in sociology, demography, social genomics, public health, and other fields that highlight the broad array of tools and perspectives that can provide the basis for further advancing the understanding of aging processes in ways that can inform policy. This report discusses the role of sociology in what is a wide-ranging and diverse field of study, a proposed three-dimensional conceptual model for studying social processes in aging over the life cycle, a review of existing databases, data needs, and opportunities, primarily in the area of measurement of interhousehold and intergenerational transmission of resources, biomarkers, and biosocial interactions, and a summary of roadblocks and bridges to transdisciplinary research that will affect the future directions of the field of sociology of aging.

Adolescents' Reproductive Health in Rural Bangladesh Aukje Mellinda Bosch, 2005

Allocating Public and Private Resources across Generations Anne H. Gauthier, C.Y. Cyrus Chu, Shripad Tuljapurkar, 2006-09-25 This book explores how demographic changes affect intergenerational transfers of time, money, goods, and services—all things that play a role in the well-being of individuals and families. It details the nature and measurement of transfers, their motives and mechanisms, and their macro-level dimensions, especially in the context of demographic transitions. Coverage includes original empirical analyses of datasets from some twenty countries and extends the traditional analysis of intergenerational transfers by examining different types of transfers.
