Burkhard Reis,2006-07-20 There is now a renewed concern for moral psychology among moral philosophers Moreover contemporary philosophers interested in virtue moral responsibility and moral progress regularly refer to Plato and Aristotle the two founding fathers of ancient ethics The book contains eleven chapters by distinguished scholars which showcase current research in Greek ethics Four deal with Plato focusing on the Protagoras Euthydemus Symposium and Republic and

discussing matters of literary presentation alongside the philosophical content The four chapters on Aristotle address problems such as the doctrine of the mean the status of rules equity and the tension between altruism and egoism in Aristotelian eudaimonism A contrast to classical Greek ethics is presented by two chapters reconstructing Epicurus views on the emotions and moral responsibility as well as on moral development The final chapter on personal identity in Empedocles shows that the concern for moral progress is already palpable in Presocratic philosophy

Platonic Conversations Mary Margaret McCabe,2015 M M McCabe presents a selection of her essays which explore the ways in which the Platonic method of conversation may inform how we understand both the Platonic dialogues and the work of his predecessors and his successors The centrality of conversation to philosophical method is taken here to account both for how we should read the ancients and for the connections between argument knowledge and virtue in the texts in question The book argues that we should attend consequently to the reflective dimension of reading and thought and that this reflection explains both how we should think about the conditions for perception and knowledge and how those conditions in turn inform the theories of value of both Plato and Aristotle
