A Map of Metaphysics Zeta Myles Burnyeat, 2001 **Map of Metaphysics Zeta (print)** , 2025-01-28 **Oxford Studies in Ancient Philosophy** David Sedley, 2003-10-30 This volume of original articles covers diverse aspects of ancient philosophy including the work of Plato Aristotle and the stoics *Aristotle and the Rehabilitation of Homonymy* Marco Zingano, 2025-05-15 Aristotle argued that scientific investigation depends on well established genera from which are revealed fundamental properties However the core elements of his philosophy are based on non generic unities Being is not a genus it is divided into ten categories or supreme genera Being serves as the primary concept in metaphysics also known as first philosophy Motion on the other hand is categorized into four types and is the central concept in physics or second philosophy Similarly the concept of the good can be understood in multiple categories just like being and it forms the central idea of practical philosophy Aristotle must confront the issue of homonymy at the very foundation of his philosophy The stakes are high as he believes that it is things not words that are homonymous This study explores the intriguing route Aristotle takes to justify attributing homonymy to things **Oxford Studies in Ancient Philosophy, Volume 51** Victor Caston, 2017-01-21 Oxford Studies in Ancient Philosophy is a volume of original articles on all aspects of ancient philosophy The articles may be of substantial length and include critical notices of major books OSAP is now published twice yearly in both hardback and paperback **Continuants** David Wiggins, 2016 For this volume David Wiggins has selected and revised eleven of his essays in an area of metaphysics where his work has been particularly influential and he has added a substantial introduction and one new unpublished essay Among the subjects treated are substance identity persistence persons sortals and artefacts *Aristotle on Religion* Mor Segev, 2017-11-02 Provides a comprehensive account of the socio political role Aristotle attributes to traditional religion despite rejecting its content **Medieval Commentaries on Aristotle's Categories** Lloyd A. Newton, 2008 The contributors to this volume cover a wide range of philosophers from Simplicius to John Wyclif and philosophical problems including the harmony of Platonism and Aristotelianism the relationship between logic and metaphysics the number of categories and realism vs nominalism *Fractured Goodness* Christopher Shields, 2024-06-24 Aristotle offers a searing rejection of Plato's commitment to a Form of the Good core among his complaints is that goodness is not univocal that is that there is no single essence specifying account of goodness covering all the many varieties of goodness there are Aristotle's anti Platonic arguments have been variously received many of his readers regard them as wholly successful while many others maintain they are abject failures This volume reconstructs and assesses these arguments afresh and asks a simple question if they are sound what is left for Aristotle In particular what principles does he have to vouchsafe the commensurability of the good things he himself regards as commensurable *Aristotle: Topics Book VI* , 2023-10-18 This volume presents a new translation of Aristotle's Topics Book VI by Annamaria Schiaparelli accompanied by a detailed commentary and textual notes providing insight into the history of the transmission of

Sources of Desire James Oldfield, 2012-11-16 Though Aristotle is universally acknowledged as having a mighty influence on the history of philosophy large parts of his writings are often thought to be interesting to nobody except the historian This includes those treatises known as the theoretical works preeminently the Metaphysics Physics De Anima and Posterior Analytics However the contributions in this book show that these old treatises are still profound resources for philosophical inquiry Not only do they inform us about the origins of our ideas but equally they express insights that always stand in need of reinterpretation and thus challenge our understanding That challenge to understanding and ultimately the desire for self understanding the desire to know what stands at the source of thinking itself this was at the heart of the Greek ideal of philosophy and some would say that this is still the task of the discipline The essays included here cover a wide range of topics including Aristotle's treatment of non contradiction the tension between his conceptions of knowledge and being the complexity of the term potency and the relation between psychology and physics

original reflection on art paintings Aristotle's de Anima José Luis Bermúdez, Professor of Philosophy and Charles H Gregory '64 Chair in Arts & Sciences José Luis Bermúdez, 2025 Aristotle's De Anima is an extraordinarily influential text in the history of philosophy it is also one of the earliest works in what we now call psychology In this lively and accessible Oxford Guide which presupposes no knowledge of Greek Jos Luis Berm dez situates the De Anima in the context of ancient Greek philosophy and places it within Aristotle's corpus as a whole Each chapter is organized around focus readings from the De Anima and elsewhere in Aristotle's writings as well as from Plato's Phaedo and Theaetetus **The Cambridge Companion to Aristotle's Biology** Sophia M. Connell, 2021-05-27 Comprehensive overview of all the key issues in Aristotle's biological works and their place within his broader philosophy and theology **Reading Aristotle** William Wians, Ron Polansky, 2017-07-31 Reading Aristotle Argument and Exposition argues that Aristotle's treatises must be approached as progressive unfoldings of a unified position that may extend over a single book an entire treatise or across several works Contributors demonstrate that Aristotle relies on both explanatory and expository principles Explanatory principles include familiar doctrines such as the four causes actuality's priority over potentiality and nature's doing nothing in vain Expository principles are at least as important They pertain to proper sequence pedagogical method the role of reputable views and the opinions of predecessors the equivocity of key explanatory terms and the need to scrupulously observe distinctions between the different sciences A sensitivity to expository principles is crucial to understanding both particular arguments and entire treatises **Plato, Aristotle and the Transcendence Theory of Art** Christine Stefanie Kunkler, 2025-10-27 From a provocative reading of Plato and Aristotle the Transcendence Theory of Art challenges traditional notions concerning the autonomy of art essentialism and art as such As a methodological model it bridges theoretical analysis and art practice offering a fresh approach to key areas in philosophy Christine Stefanie Kunkler introduces original concepts like Index ART and the Aesthetic Syllogism while proposing the Force Field of Art as an alternative to Arthur Danto's Art World This study explores how a philosophical reflection on texts and images can deepen our understanding of meaning interpretation and misinformation in contemporary culture **Aristotle's Physics Book I** Diana Quarantotto, 2018-01-11 This book provides a comprehensive and in depth study of Physics I the first book of Aristotle's foundational treatise on natural philosophy While the text has inspired a rich scholarly literature this is the first volume devoted solely to it to have been published for many years and it includes a new translation of the Greek text Book I introduces Aristotle's approach to topics such as matter and form and discusses the fundamental problems of the study of natural science examining the theories of previous thinkers including Parmenides Leading experts provide fresh interpretations of key passages and raise new problems The volume will appeal to scholars and students of ancient philosophy as well as to specialists working in the fields of philosophy and the history of science
