- Marine Mammal Interactions Andrew Butterworth, Mark P. Simmonds, 2017-08-15 Our relationships with marine mammals are complex We have used them as resources and in some places this remains the case viewed them as competitors and culled them again ongoing in some localities been so captivated and intrigued by them that we have taken them into captivity for our entertainment and developed a lucrative eco tourism activity focused on them in many nations When we first envisaged this special topic we had two overarching aims Firstly we hoped to generate critical evaluation of some of our relationships with these animals Secondly we hoped to attract knowledgeable commentators and experts who might not traditionally publish in the peer reviewed literature We were also asking ourselves a question about what responsibility mankind might have to marine mammals on our rapidly changing planet The answer to the question can or should humans have responsibility for the lives of marine mammals when they are affected by our activities is in our opinion yes and the logical progression from this question is to direct research and effort to understand and optimise the actions reactions and responses that mankind may be able to take We hope that the papers in this special issue bring some illumination to a small selection of topics under this much wider topic area and prove to be informative and stimulating **Bundok** Adrian De

Leon, 2023-11-09 From the late eighteenth century the hinterlands of Northern Luzon and its Indigenous people were in the crosshairs of imperial and capitalist extraction Combining the breadth of global history with the intimacy of biography Adrian De Leon follows the people of Northern Luzon across space and time advancing a new vision of the United States s Pacific empire that begins with the natives and migrants who were at the heart of colonialism and its everyday undoing From the emergence of Luzon s eighteenth century tobacco industry and the Hawaii Sugar Planters Association s documentation of

workers to the movement of people and ideas across the Suez Canal and the stories of Filipino farmworkers in the American West De Leon traces the Filipino as a racial category emerging from the labor subjugation archiving and resistance of native people De Leon s imaginatively constructed archive yields a sweeping history that promises to reshape our understanding of race making in the Pacific world *Humanizing work and work Environment (HWWE 2016)* Dr Lakhwinder Pal Singh, Dr Sarbjit Singh, Prof Arvind Bhardwaj, 2018-02-04 Proceedings of 14th International Conference on Humanizing work and work Environment

siloed and fixated on the short term By illustrating how key rural capitals are linked and integrated this book argues for a reset of the rural planning narrative and for the urgent disruption of established ways of working Using innovative case studies the chapters detail how planning for rural places must be guided by the pursuit of social value rather than protecting private interests This book is essential reading for undergraduate and graduate students in planning geography rural studies landscape studies and regional studies 21st Century Homestead: Nitrogen-Fixing Crops Stanley Bilello,2016-10-10 21st Century Homestead Nitrogen Fixing Crops contains everything you need to stay up to date on nitrogen fixing crops for your sustainable farm or garden **Computer Science and its Applications** James J. The ^APolitical Economy of Climate Finance Effectiveness in Developing Countries Mark Purdon,2024-01-01 In The Political Economy of Climate Finance Effectiveness in Developing Countries Mark Purdon contributes to broader debates on the international climate cooperation by evaluating how three different climate finance instruments have been undertaken in three countries Tanzania Uganda and Moldova and evaluates their effectiveness in actually reducing emissions He shows that the effectiveness of climate finance tools depends on the interaction between a nation s development policy paradigms and its interests in other sectors of their economies Purdon s findings further inform the design of international and

transnational efforts to engage developing countries on climate change mitigation by emphasizing the importance of domestic politics and the state
