New Media and the Mediatization of Religion Gabriel Faimau, William O. Lesitaokana, 2018-10-01 New media including digital and social media play a central role in producing and reproducing socio cultural and religious practices. Its presence has not only resulted in changes to the ways in which religious beliefs are practiced but has also altered the way religious meanings are expressed. How has new media technology informed and influenced religious engagement and participation? In what ways has new media technology enabled religious groups to practice and preach their religious beliefs to a broader audience? To what extent has the emergence of social media and social networking sites shaped religious discourses and religious practices? This volume offers a unique Africa centred perspective in response to these questions. While presenting new scholarly developments in the fields of media, religion and culture in Africa, this book also provides empirical and theoretical insights into the intersection between new media and religion.

Globalization, Mass Education and Technical and Vocational Education and Training Miriam Preckler Galguera, 2018-06-05 This book assesses the influence of the international organization UNESCO on the development of national Technical and Vocational Education and Training (TVET) systems in the Southern African Community Region (SADC), focusing particularly on Botswana and Namibia. Designed around UNESCO's Better Education for Africa's Rise (BEAR) project, the study is an excellent example of applied policy research. Analysis is from the perspective of key stakeholders including UNESCO headquarters and field offices, Ministries of Education and of Labor, employers and employees, education and training institutions, international partners and more. Both qualitative and quantitative evidence are used to provide a comparative overview and the author also reveals the current state of data on skills. Readers will discover common goals and challenges across the nations but also a common lack of action to measure the impact and influence that UNESCO's

programs have had at a national level prior to this study Were the newly implemented educational policies successful or not If the public policies failed why was that These chapters shed light on such questions and how UNESCO s contribution influenced the national development processes in the context of globalization processes and trends of global mass education The book has much to offer for both scholars and those working in UN agencies or national governments who seek to develop education systems and better link them to the world of work **Botswana** ,2001 Developing and Supporting Multiculturalism and Leadership Development Enakshi Sengupta,Patrick Blessinger,Mandla Makhanya,2020-09-23 The modern notion of humanism centres on the core qualities in all humans agency dignity and development primarily concerned with addressing contemporary human needs concerns and problems This book has an interdisciplinary focus on the development of human capacity at all levels with the view that higher education is well suited for all
