Dubey, Archi, Kumar Reddy, C. Kishor, Doss, Srinath, Hanafiah, Marlia Mohd, 2024-07-18 The healthcare industry is increasingly complex demanding personalized treatments and efficient operational processes Traditional research methods need help to keep pace with these demands often leading to inefficiencies and suboptimal outcomes Integrating digital twin technology presents a promising solution to these challenges offering a virtual platform for modeling and simulating complex healthcare scenarios However the full potential of digital twins still needs to be explored mainly due to a lack of comprehensive guidance and practical insights for researchers and practitioners Exploring the Advancements and Future Directions of Digital Twins in Healthcare 6.0 is not just a theoretical exploration It is a practical guide that bridges the gap between theory and practice offering real world case studies best practices and insights into personalized medicine real time patient monitoring and healthcare process optimization By equipping you with the knowledge and tools needed to effectively integrate digital twins into your healthcare research and operations this book is a valuable resource for researchers academicians medical practitioners scientists and students Emerging Drug Delivery and Biomedical Engineering Technologies

Dimitrios Lamprou, 2023-04-06 This book details the advances in drug discovery and delivery and the present need for emerging technologies Throughout the text new micro and nanofabrication techniques are described including methods such as electrohydrodynamic processes additive manufacturing and microfluidics which have the potential to produce drug delivery systems that were not possible a few years ago This book is of great use to both entry level and experienced researchers in the field of emerging technologies for the manufacturing of drug delivery devices Features Describes technologies that are significantly enhancing the delivery of drugs and biologics Presents new data on mobile and wearable point of care testing systems Features hot topics such as electrospinning 3D printing and micro needles Focuses on additive manufacturing AM which can be used to provide customized treatment for patients Will appeal to experienced

researchers and those considering entering the field of emerging technologies for the manufacturing of drug delivery devices

Data Analytics in System Engineering Radek Silhavy, Petr Silhavy, 2024-02-23 These proceedings offer an insightful exploration of integrating data analytics in system engineering This book highlights the essential role of data in driving innovation optimizing processes and solving complex challenges in the field Targeted at industry professionals researchers and enthusiasts this book serves as a comprehensive resource providing actionable insights and showcasing transformative applications of data in engineering It is a must read for anyone keen on understanding and participating in the ongoing evolution of system engineering in our data centric world

Industry 6.0 C Kishor Kumar Reddy, Srinath Doss, Lavanya Pamulaparty, Kari Lippert, Ruchi Doshi, 2024-10-16 What are the means to create a paradigm shift from conventional to intelligent companies Industry 6.0 Technology Practices Challenges and Applications shows how integrating Industry 6.0 technology with data creates a framework for that shift The book discusses the limitations pitfalls and open research questions in Industry 6.0 as well as the most recent advances architectures frameworks applications and novel practices methods and techniques These are vital for resolving intelligent Internet of Things issues There is a special focus on sustainable growth humanization and environmentally friendly intelligent system applications and an emphasis on the latest innovations in intelligent systems in classical machine learning deep learning Internet of Things IoT Industrial Internet of Things IIoT blockchain knowledge representation knowledge management big data and natural language processing NLP Features Presents the latest trends in the fields of intelligent systems machine intelligence deep learning and Industrial Internet of Things for smart environments Discusses securing the mobile ad hoc network MANET by detecting the intrusions using CSO and XGBoost model Highlights the methods of smart things in collaborative autonomous fleets and platforms for integrating applications across different business and industry domains Focuses on intelligent process manufacturing automation using robotics development of robotic appliances and smart manufacturing Covers data driven agriculture crop disease prediction drip irrigation systems pesticide and fertilizer sprinkling using the Industrial Internet of Things and water estimation systems With many contemporary articles from both scientists and practitioners working in many fields where intelligent systems and the IIoT can break new ground the text is assembled to aim at a readership that includes researchers statisticians practitioners scientists and developers

Historical Dictionary of Lesotho John Aerni-Flessner,Charles Fogelman,Nthabiseng Mokoena-Mokhali,2023-11-30 Lesotho s history has long been defined by its enclave status within South Africa but it is a hard fought and hard won status that helps unite Basotho through the shared history of struggle against colonial rule in the region Since the end of apartheid in 1994 Lesotho s status as a separate entity has been called into question though the fierce national pride built through centuries of resistance to outside rule has mitigated against any serious discussions of incorporating Lesotho into South Africa Still the political instability and lack of a flourishing domestic economy have made life difficult for the majority of Basotho and could call into question the viability and legitimacy of the state in the eyes of its citizens if it cannot enact significant reforms in the coming decades Historical Dictionary of Lesotho Third Edition contains a chronology an introduction and an extensive bibliography The dictionary section has more than 500 cross referenced entries on important personalities as well as aspects of the country s politics economy foreign relations religion and culture This book is an excellent resource for students researchers and anyone wanting to know more about Lesotho

Ubuntu Philosophy and Disabilities in Sub-Saharan Africa Oliver Mutanga,2023-11-03 This book uses Ubuntu philosophy to illuminate the voices of people with disabilities from Sub Saharan Africa Disability literature is largely dominated by scholars and studies from the Global North and these studies are largely informed by Global North theories and concepts Although disability literature in the Global South is now fast growing most studies continue to utilise conceptual theoretical and philosophical frameworks that are framed within Global North contexts This presents two major challenges Firstly the voices of people with disabilities in the Global South remain on the fringes of disability discourses Secondly when their voices are heard their realities are distorted This edited book consisting of 11 chapters provides case studies from Botswana Ghana Lesotho Uganda and South Africa explores disability in various fields

Inclusive education higher education environment Open Distance Learning and Technical and Vocational Education and Technical Colleges The book contributes to the ways in which disability is understood and experienced in the Global South thereby challenging the Western hegemonic discourses on disability This collection of contributions will be of interest to all scholars and students of disability studies development studies medical sociology and African studies *AF Press Clips*,1974 Environmental Entanglements Kirk B. Sides,2025-10-22 Environmental Entanglements African Literature s Ecological Imaginary traces a long history of ecological thought in African literature Reading African literatures as environmental literatures Environmental Entanglements offers an interventional step back beyond the mid twentieth century moment of political independence Thinking about entanglement to represent relations ecologically the book explores a form which it argues is an ecological imaginary animating many African literary and cultural repertoires This ecological form gives story to experiences of transversal of colonial and apartheid boundaries the movement of peoples and the cultural and social relations enacted upon land Focusing on literary and filmic texts from the writers such as Thomas Mofolo and Sol Plaatje in the early twentieth century to contemporary science and speculative fiction producers like Nnedi Okorafor and Wanuri Kahiu Environmental Entanglements argues that cultural archives from the African continent display a history of ecological awareness that predates the moment of mid twentieth century decolonization The book is premised on the idea that imagining ecologically as a form of representing relations is not a belated preoccupation in African literatures but rather these early ecological imaginaries present an opportunity to delink notions such as environmentalism ecology and ecocriticism from postcoloniality Reading ecology as an animating organizing trope in African literatures from at least the start of the twentieth century the book offers a genealogy of the present in which the increasingly popular forms of ecologically oriented African futurism and speculative fiction are part of a history of thinking the future through ecological form in African literatures Comparative Education for Global Citizenship, Peace and Shared Living through uBuntu,2022-06-08 There is a dire need today to create spaces in which people can make meaning of their existence in the world abiding by cultural frameworks and practices that acknowledge and validate a meaningful existence for all People are not just isolated individuals but are connected in diverse ways with other persons within our natural and social environment which is part of the whole universe The African philosophy of uBuntu or humaneness is re emerging for its timely relevance and potential as indispensable in our quest for global citizenship peace and mutual understanding in securing sustainable human development in the broader ecosystem Comparative educationists have the challenge to devise theoretical frameworks epistemological and pedagogical constructs as well as pragmatic useful and effective ways of promoting the virtues of compassion and recognition of our common humanity in eliminating the ills of domination and control that are guided by greed hatred jealousy and intolerance Comparative Education for Global Citizenship Peace and Shared Living through Ubuntu paves the way for a better understanding of the critical importance of the collective search and endeavor

towards achieving the virtues of nonviolence peace shared values of living together global citizenship improved quality of life for all and a better appreciation of the positive implications of interdependence

Re-invigorating ubuntu through water: A human right to water under the Namibian Constitution Ndjodi Ndeunyema, 2021-10-01 This book argues for the existence of a court enforceable human right to water that is implied from the right to life in Article 6 of the Namibian Constitution The book builds this argument by using tools of constitutional interpretation and with the aid of comparative materials As such the African value of ubuntu is invoked Ubuntu which is legally developed through its four key principles of community interdependence dignity and solidarity is anchored in a novel approach to Namibian constitutional interpretation that is conceptualised as re invigorative constitutionalism The book advances the AQUA adequacy quality accessibility content of water and articulates the correlative duties within the context of the respect protect fulfil trilogy which are duties imposed upon the Namibian state as the primary duty bearer for a right to water These duties include irreducible essential content duties that are argued to be immediate when compared to general obligations In giving substance to duties that flow from a right to water international law interpretative resources are also relied upon including General Comment No 15 by the United Nations Committee on Social Economic and Cultural Rights the African Commission s Principles and Guidelines on Social and Economic Rights and the World Health Organisation s Drinking water Quality Guidelines Moreover the book addresses various justiciability concerns that may arise arguing that Namibian courts are institutionally competent and legitimate in enforcing right to water claims through the application of the bounded deliberation model Additionally because the Principles of State Policy in Article 95 of the Namibian Constitution are rendered court unenforceable by Article 101 the argument is made that this does not undermine the claim that a right to water anchored in the right to life can be enforced through the courts Dr Ndjodi Ndeunyema Modern Law Review Early Career Research Fellow University of Oxford The Palgrave Handbook of Africa and the Changing Global Order Samuel Ojo Oloruntoba, Toyin Falola, 2021-11-22 This handbook fills a large gap in the current knowledge about the critical role of Africa in the changing global order By connecting the past present and future in a continuum that shows the paradox of existence for over one billion people the book underlines the centrality of the African continent to global knowledge production the global economy global security and global creativity Bringing together perspectives from top Africa scholars it actively dispels myths of the continent as just a passive recipient of external influences presenting instead an image of an active global agent that astutely projects soft power Unlike previous handbooks this book offers an eclectic mix of historical contemporary and interdisciplinary approaches that allow for a more holistic view of the many aspects of Africa s relations with the world Ubuntu Marietjie Oelofsen, Upenyu Majee, Bongani Mgiijima, Jamie Monson, 2024-08-20 Ubuntu Interdisciplinary Conversations Across Continents is a collection of work by 17 scholars emerging from the Ubuntu Dialogues Seminar Exchange Fellowship hosted by Stellenbosch University in South Africa and Michigan State University in the US between 2019 and 2022 This collaborative work brings new voices and new

ways of interrogating a concept that holds possibilities for living together differently The contributions problematise the concept in provocative and surprising ways and disrupt narrow and superficial interpretations of Ubuntu The contributors to this book foreground critical issues which are fundamental towards a deeper understanding of the notion of ubuntu Dr Sithembele Marawu University of Fort Hare This book features next generation rising stars from places such as South Africa Zimbabwe Malawi Burundi and the US writing about ubuntu the indigenous southern African term often used to capture African philosophy especially its moral dimensions A fresh kaleidoscopic engagement with ubuntu Professor Thaddeus Metz University of Pretoria *Constitutional Adjudication in Africa* Charles Manga Fombad, 2017 Providing the first comparative analysis of African attempts to promote respect for rule of law and constitutional justice this book examines the diverse and distinctive approaches to constitutional adjudication taken It captures positive and negative developments and future prospects for the different models of constitutional review
