British Tradition Unit 2:

Encyclopaedia of Scientific Units, Weights and Measures François Cardarelli, 2012-12-06 Mankind has a fascination with measurement. Down the centuries we have produced a plethora of incompatible and duplicatory systems for measuring everything from the width of an Egyptian pyramid to the concentration of radioactivity near a nuclear reactor and the value of the fine structure constant. With the introduction first of the metric system and of its successor the Système International d'Unités SI, the scientific community has established a standard method of measurement based on only seven core units. The *Encyclopaedia of Scientific Units, Weights and Measures* converts the huge variety of units from all over the world in every period of recorded history into units of the SI. Featuring an A-Z of conversion tables for over 10 000 units of measurements, tables of the fundamental constants of nature with their units, listings of professional societies and national standardization bodies for easy reference, an extensive bibliography detailing further reading on the multifarious aspects of measurement and its units. This huge work is simply a must have for any reference library frequented by scientists of any discipline or by those with historical interests in units of measurement such as archaeologists.

History of Policing, Crime, Disorder, Punishment Peter Joyce, Wendy Laverick, 2023-07-19 This engaging textbook provides a broad and unique coverage of the key historical events that shaped ideas in criminology, criminal justice and policing from the late seventeenth century to the early twenty-first century in England and Wales. It vividly illustrates the multi-disciplinary nature of criminology and penology by providing important insights into the social and political issues that shaped the development and operations of the criminal justice system and its responses to both crime and disorder. Using key text boxes, this book highlights key people, theorists, foundational principles and events throughout. Part One discusses the nature of crime and forms of punishment between 1689 and 1750 and the penological concerns regarding the aims of punishment. Part Two focuses on crime and disorder between 1750 and 1850, examining the impact of urbanization on criminal activity and it considers the background and state responses to key episodes of public disorder. Part Three covers the development of policing 1689-1856 and the contribution to policing made by reformers and the implementation of police reform. Part Four deals with a number of issues affecting crime and punishment between 1850 and 1920, including episodes such as Irish Home Rule within the context of high policing. It evaluates changes to the nature and role of prisons that occurred in this period. This student-friendly book contains end-of-chapter questions which summarise and enable further discussion.
