Patman,2006-08-10 This volume highlights the gap between the new security environment and the notion of state centred national security favoured by Washington showing how a Cold War phenomenon known as the national security state in which defence and foreign policy interests essentially converge remains largely intact The conventional wisdom since the suicide attacks of 9 11 is that the world has been transformed and according to President Bush September 11 changed the strategic thinking of the US This book challenges these assumptions Indeed the Bush administration s National Security strategy of 2002 has reinvigorated and even extended the idea of national security Paradoxically the renewed emphasis on a distinctly state centred approach to security including the War on Terror has unfolded during an era of deepening globalization Drawing on the international expertise of fourteen specialists the book examines four inter related themes the impact of globalization on the concept of security the strategic outlook of the world s only superpower the US the new conflicts that have come to characterize the post Cold War era efforts to regulate the emerging patterns of conflict in the world Globalization and Conflict will be essential reading for students of strategic studies security studies and international relations *Beer* Paul S Hughes,E Denise Baxter,2007-10-31 For centuries beer has been a favourite drink throughout the world The art of brewing has more recently evolved into the science it is today as a result of the increased knowledge of both the ingredients and the process Considerations such as appearance taste and the nutritional value of beer are important topics for consumers and brewing scientists alike This book looks at the chemistry behind those aspects of beer that are of particular interest to beer drinkers namely flavour and nutritional aspects in combination with a discussion of maintenance of quality and safety the areas more relevant to the brewing scientist *Beer Quality Safety and Nutritional Aspects* brings the reader right up to date with current thinking and will be valued by both interested consumers and those employed in industries related to the brewing industry *Teaching Global History* Alan J. Singer,2012-04-27 *Teaching Global History* challenges prospective and beginning social studies teachers to formulate their own views about what is important to know in global history and why It explains how to organize the curriculum around broad social studies concepts and themes and student questions about humanity history and the contemporary world All chapters include lesson ideas a sample lesson plan with activity sheets primary source documents and helpful charts graphs photographs and maps High school students responses are woven in throughout Additional material corresponding to each chapter is posted online at <http://people.hofstra>

edu alan_j_singer The traditional curriculum tends to highlight the Western heritage and to race through epochs and regions leaving little time for an in depth exploration of concepts and historical themes for the evaluation of primary and secondary sources and for students to draw their own historical conclusions Offering an alternative to such pre packaged textbook outlines and materials this text is a powerful resource for promoting thoughtful reflection and debate about what the global history curriculum should be and how to teach it
