Pretorius, Luciana Londero Brandli, Evangelos Manolas, Fatima Alves, Ulisses Azeiteiro, Judy Rogers, Chris Shiel, Arminda Do Paco, 2019-04-30 This book fills an important gap in the literature and presents contributions from scientists and researchers working in the field of

sustainable development who have engaged in dynamic approaches to implementing sustainability in higher education It is widely known that universities are key players in terms of the implementation and further development of sustainability with some having the potential of acting as living labs in this rapidly growing field Yet there are virtually no publications that explore the living labs concept as it relates to sustainability and in an integrated manner The aims of this book which is an outcome of the 4th World Symposium on Sustainable Development at Universities WSSD U 2018 held in Malaysia in 2018 are as follows i to document the experiences of universities from all around the world in curriculum innovation research activities and practical projects as they relate to sustainable development at the university level ii to disseminate information ideas and experiences acquired in the execution of projects including successful initiatives and good practice iii to introduce and discuss methodological approaches and projects that seek to integrate the topic of sustainable development in the curricula of universities and iv to promote the scalability of existing and future models from universities as living labs for sustainable development The papers are innovative cross cutting and many reflect practice based experiences some of which may be replicable elsewhere Also this book prepared by the Inter University Sustainable Development Research Programme IUSDRP and the World Sustainable Development Research and Transfer Centre WSD RTC reinforces the role played by universities as living labs for sustainable development Victorian Muslim Jamie Gilham, Ron Geaves, 2017 A timely reconsideration of the life and times of one of the West's most prominent Muslim converts Sustainable Rail Transport Marin Marinov, Janene Piip, 2019-07-24 This volume presents a collection of rail orientated research articles covering a variety of topics on rail operations research and management of rail systems as well as innovation particularly focusing on sustainability aspects The material consists of the most recent research work of the authors The authorship is international which makes it an interesting read for rail academics and professionals around the world Although the material has a rail research focus the material is also excellent for preparation and delivery of rail transport and logistics orientated courses and programmes The target audience primarily comprises research experts in transport research but the book may also be beneficial for graduate students alike From Broke To Brexit Michael Burton, 2021-09-30 Perhaps the most extraordinary period in modern British history the years between the Great Recession and Brexit have often been dubbed the lost decade because of the economic and political turmoil caused by those two great events Michael Burton outlines how the first led to the second assisted by a rare confluence of other often unrelated social and political factors that delivered the shock Leave verdict in the EU referendum of 2016 These included the longstanding grievances of voters in former industrial areas feeling left behind by globalism stagnant incomes after the recession austerity the rise of social media the refugee and Eurozone crisis in Europe the deep split in the Conservative and Labour parties over the EU and rising wealth inequalities. The author also charts the chaotic political landscape that ended in the final Brexit deal This book is ideal for the general reader as well as for students of politics history and economics needing a concise and well explained account of this turbulent period in British history

Proceedings of the International Conference Theory and Applications in the Knowledge Economy TAKE 2017
Blazenka Knezevic, Gaby Neumman, 2017-07-08 Foreword A famous Portuguese Poet once said around one hundred years
ago before I was born all the words that should save the Humanity had already been written the only thing that was missing
was to save Humanity Fast forward to the 21st century services led and knowledge based economy and we have myriads of
theoretical study about the decisive assets namely intangibles Those analysis are made in several perspectives namely
Human Resources Knowledge Management Intellectual Capital and also many sectorial perspectiveslike Trade Economics
Logistics Social Policy etc However today the question about the applicability of all these studies remains unsolved So it like
many of the words that will save the Knowledge Economy have already been written all we need is to save the Knowledge
Economy Or is it not The idea behind TAKE Conference was to provide a multidisciplinary forum in which those multiple
perspectives will come together We believe it is a fruitful operation and we intend to continue the exercise in the future The
problem of the relation between theory and practice in the knowledge economy is getting more important and not

lessimportant with the development of the BRICS and other nations TAKE main question will be one of the problems of the 21st century Following the promising start of TAKE 2016 in Aveiro Portugal TAKE 2017 was organized by the Faculty of Economics of Zagreb University around Prof Blazenka Knezevic I would like to thank her and her team for the massive effort in putting TAKE 2017 together It will be a very nice and memorable conference I would like also to thank the 5 keynotes the special sessions and workshop organizes the authors of the 60 papers and 5 posters the stream leaders the reviewers and the sponsors for the efforts And to the 90 participants from 20 countries Austria Bosnia Herzegovina Canada Croatia Germany Hong Kong Hungary Netherlands Mexico Portugal Poland Romania Russia South Africa Serbia Slovakia Spain Thailand United Kingdom United States A special word to Prof Gaby Neumann from Wildau who organized the Proceedings Let us make TAKE 2017 a great occasion and help save the knowledge economy a bit Eduardo Tom Conference Chair Zagreb July Theatre, Exhibition, and Curation Georgina Guy, 2016-04-20 Examining the artistic intellectual and social life of 2017 performance this book interrogates Theatre and Performance Studies through the lens of display and modern visual art Moving beyond the exhibition of immaterial art and its documents as well as re enactment in gallery contexts Guy s book articulates an emerging field of arts practice distinct from but related to increasing curatorial provision for live performance Drawing on a recent proliferation of object centric events of display that interconnect with theatre the book approaches artworks in terms of their curation together and re theorizes the exhibition as a dynamic context in which established traditions of display and performance interact By examining the current traffic of ideas and aesthetics moving between theatricality and curatorial practice the study reveals how the reception of a specific form is often mediated via the ontological expectations of another It asks how contemporary visual arts and exhibition practices display performance and what it means to generalize the theatrical as the optic or directive of a curatorial concept Proposing a symbiotic relation between theatricality and display Guy presents cases from international arts institutions which are both displayed and performed including the Tate Modern and the Guggenheim and assesses their significance to the enduring relation between theatre and the visual arts The book progresses from the conventional alignment of theatricality and ephemerality within performance research and teases out a new temporality for performance with which contemporary exhibitions implicitly experiment thereby identifying supplementary modes of performance which other discourses exclude This important study joins the fields of Theatre and Performance Studies with exciting new directions in curation aesthetics sociology of the arts visual arts the creative industries the digital humanities cultural heritage and reception and audience theories *Imagining* Latin America Nicola Jones, 2021 A new and innovative approach to Latin American Studies which makes an important contribution to contemporary debates about cultural appropriation and the integration of immigrant communities **ISIS** and the Pornography of Violence Simon Cottee, 2019-05-30 ISIS and the Pornography of Violence is a collection of iconoclastic essays on ISIS spanning the four year period from its ascendancy in late 2014 to its demise in early 2018 From a

trenchant critique of the infantilization of jihadists to a probing examination of the parallels between gonzo porn and ISIS beheading videos the pieces collected in this volume challenge conventional ways of thinking about ISIS and the roots of its appeal Simon Cottee s core argument is that Western ISIS recruits far from being brainwashed or vulnerable dupes actively responded to the group s promise of redemptive violence and self sacrifice to a total cause
