International Studies in Educational Inequality, Theory and Policy Richard Teese, Stephen Lamb, Marie Duru-Bellat, 2007-05-18 Inequality is a marked and persistent feature of education systems both in the developed and the developing worlds Major gaps in opportunity and in outcomes have become more critical than in the past thanks to the knowledge economy and globalization The pursuit of equity as a goal of public policy is examined in this book through a series of national case studies The book covers many different global contexts from the wealthiest to some of the poorest nations on earth It therefore offers a broad range of different theoretical and methodological approaches and brings together

extensive international experience in equity policy      Data Analysis Using Regression and Multilevel/Hierarchical Models  
Andrew Gelman, Jennifer Hill, 2007 This book first published in 2007 is for the applied researcher performing data analysis  
using linear and nonlinear regression and multilevel models      *Advanced Techniques for Modelling Maternal and Child  
Health in Africa* Ngianga-Bakwin Kandala, Gebrenegus Ghilagaber, 2013-09-06 This book presents both theoretical  
contributions and empirical applications of advanced statistical techniques including geo additive models that link individual  
measures with area variables to account for spatial correlation multilevel models that address the issue of clustering within  
family and household multi process models that account for interdependencies over life course events and non random  
utilization of health services and flexible parametric alternatives to existing intensity models These analytical techniques are  
illustrated mainly through modeling maternal and child health in the African context using data from demographic and health  
surveys In the past the estimation of levels trends and differentials in demographic and health outcomes in developing  
countries was heavily reliant on indirect methods that were devised to suit limited or deficient data In recent decades world  
wide surveys like the World Fertility Survey and its successor the Demographic and Health Survey have played an important  
role in filling the gap in survey data from developing countries Such modern demographic and health surveys enable  
investigators to make in depth analyses that guide policy intervention strategies and such analyses require the modern and  
advanced statistical techniques covered in this book The text is ideally suited for academics professionals and decision  
makers in the social and health sciences as well as others with an interest in statistical modelling demographic and health  
surveys Scientists and students in applied statistics epidemiology medicine social and behavioural sciences will find it of  
value
