Western Hemisphere Dept.,2022-07-29 Selected Issues Sport Diver ,2007-04 Judging the Law of the Sea Natalie Klein,Kate Parlett,2022-11-10 The dispute settlement regime in the UN Convention on the Law of the Sea UNCLOS has been in operation for well over twenty years with a steadily increasing number of important cases This significant body of case law has meaningfully contributed to the development of the so called constitution of the oceans Judging the Law of the Sea focusses on how Judges interpret and apply UNCLOS and it explores how these cases are shaping the law of the sea The role of the Judge is central to this book s analysis The authors

consider the role of UNCLOS Judges by engaging in an intensive study of their decisions to date and assessing how those decisions have influenced and will continue to influence the law of the sea in the future. As the case law under UNCLOS is less extensive than some other areas of compulsory jurisdiction like trade and investment, the phenomenon of dispute settlement under UNCLOS is under studied by comparison. Cases have not only refined the parameters for the exercise of compulsory jurisdiction under the Convention but also contributed to the interpretation and application of substantive rights and obligations in the law of the sea. In relation to jurisdiction, there is important guidance on what disputes are likely to be subjected to binding third party dispute resolution, which is a critical consideration for a treaty attracting almost 170 parties. Judging the Law of the Sea brings together an analysis of all the case law to the present day while acknowledging the complex factors that are inherent to the judicial decision making process. It also engages with the diverse facets that continue to influence the process: who the Judges are, what they do, and what their roles might or should be. To capture the complex decision matrix, the authors explore the possible application of stakeholder identification theory to explain who and what counts in the decision making process. *Harvard Magazine*, 1985

International Law of Sharks Erika J. Techera, Natalie Klein, 2017-04-18. In *International Law of Sharks*, Erika J. Techera and Natalie Klein provide an in depth analysis of the current legal frameworks that relate to these important species. The authors offer ways in which to overcome obstacles that prevent existing laws from working better and identify best practice global governance options while highlighting opportunities for legal reform. Scientific evidence indicates that sharks play a critical role in maintaining marine ecosystem health, yet current governance regimes have not been effective and many shark species continue to diminish. In this context, effective laws are critical to improve sharks' conservation status. This volume also explores the broader relevance of oceans governance by identifying appropriate legal frameworks and regulatory mechanisms that balance conservation and utilisation of marine species in general. *The New*
