National Parks Beyond the Nation Adrian Howkins, Jared Orsi, Mark Fiege, 2016-03-31 The idea of a national park was an American invention of historic consequences marking the beginning of a worldwide movement the U S National Park Service asserts in its 2006 Management Policies *National Parks beyond the Nation* brings together the work of fifteen scholars and writers to reveal the tremendous diversity of the global national park experience an experience sometimes influencing sometimes influenced by and sometimes with no reference whatever to the United States Writer and historian Wallace Stegner once called national parks America s best idea The contributors to this volume use that exceptionalist claim as a starting point for thinking about an international history of national parks They explore the historical interactions and influences intellectual political and material within and between national park systems in Canada New Zealand South Africa Indonesia Antarctica Brazil and other countries What is the role of science in the history of these preserves Of politics What purposes do they serve Conservation Education Reverence toward nature Tourist pleasure People have thought differently about national parks at different times and in different places and neat physical boundaries have been disrupted by

wandering animals human movements the spread of disease and climate change Viewing parks around the world at various scales and across national frontiers these essays offer a panoptic view of the common and contrasting cultural and environmental features of national parks worldwide If national parks are as Stegner said absolutely American they are no less part of the world at large National Parks beyond the Nation tells us as much about the multifarious and changing ideas of nature and culture as about the framing of those ideas in geographic temporal and national terms Tilting at Mountains Pasaban Edurne,2014-05-21 The author reveals the demons that drove her to extreme physical accomplishments at the cost of great suffering story of adventure and personal growth Pasaban is one of the best high altitude climbers in the world today br On May 17 2010 a 37 year old Spaniard named Edurne Pasaban became the first woman to climb all fourteen peaks higher than 8 000 meters This record breaking accomplishment put the Basque woman on National Geographic s 2010 Adventurers of the Year list The next year both The Alpinist and Outside magazines placed her on their Adventurers of the Year lists too Pasaban s accomplishment did not come without controversy Another woman Korean climber Oh Eun Sun claimed to have completed the peaks a few weeks earlier Later inquiries revealed that Oh Eun Sun had failed to summit Kangchenjunga in 2009 and her claim was eventually withdrawn leaving Edurne as the clear victor But how did she get there Published for the first time in English Tilting at Mountains tells Edurne s heartfelt and deeply personal story She details not only how she came to climb the 8 000 meter peaks the competitive nature of her Basque heritage played a role as did admittedly an interest in handsome climbing guides but also how her love for the mountains pulled her from a deep soul crushing depression The book covers her climbs on all the 8 000 meter peaks some of which were almost cakewalks while others were climbed at great cost including the loss of close friends *Fallen Giants* Maurice Isserman,Stewart Angus Weaver,Dee Molenaar,2010-01-01 In the first comprehensive history of Himalayan mountaineering in 50 years the authors offer detailed original accounts of the most significant climbs since the 1890s and they compellingly evoke the social and cultural worlds that gave rise to those expeditions *Sherman Exposed* John Sherman,2012-10-09 Both brilliant and funny John Sherman has a loyal following Features the best of Climbing magazine s Verm s World Insightful and often irreverent profiles of some of North America s best climbers Outrageous talented and a force to be reckoned with John Sherman is always willing to spout an opinion that s sure to raise eyebrows This rowdy collection of biting satire parody profiles barely restrained rants and genuine reflections on climbing s unsung heroes is no different Blending his juiciest Verm s World columns from Climbing magazine with previously unpublished or perhaps unpublishable stories Sherman pulls no punches even on himself From his college exploits in building on the Berkeley campus to his quest for the Fab 50 to his years as a nomadic boulderer Sherman shares the best and the worst he has found in the people and places he encountered along the way Climbers will discover valuable excuse making techniques in The Dog Ate My Belay Plate they will aspire to the very un PC All Vermin Team and they will challenge themselves with The Verm s World History Aptitude Test Who could ask for more *Everest* Peter Potterfield,Tom
