Globalisation and Education Policy Reform in Botswana Richard Tabulawa, 2023-07-21 This book uses the global local dialect approach to explicate education policy reform in Botswana and interrogates the practical effects of the various education policies on curriculum pedagogy and governance of the Botswana General Education system Considering the effect of three reform policies since Botswana's Independence in 1966 the book evaluates the performance of each of the policies and examines their consequences in terms of the interplay of global forces and domestic pressures The result of this interplay has been an education landscape that while reflecting globally circulating education discourses markedly differs from those same discourses The book argues that the State in Botswana has appropriated education policy to legitimate itself in times of crisis and that each policy has improved access to general education but collectively have failed to improve its quality making suggestions for how this can be improved in the future As the first book of its kind to delve into education in Botswana from a single authored critical lens the book will be a highly relevant reading for academics researchers and post graduate students of African education comparative education education policy and curriculum studies

Laurie,2015-10-20 One woman s determination to educate Malawian girls and change the future of a nation **Current Challenges in Cardiovascular Molecular Diagnostics** Matteo Vatta,Valeria Novelli,Luisa Mestroni,Jeffrey A.

Towbin,Carlo Napolitano,Guia Guffanti,2017-09-12 The field of cardiovascular genetics has tremendously benefited from the recent application of massive parallel sequencing technology also referred to as next generation sequencing NGS However along with the discovery of additional genes associated with human cardiac diseases the analysis of large dataset of genetic information uncovered a much more complex and variegated landscape which often departs from the comfort zone of the monogenic Mendelian diseases image that clinical molecular geneticists have been well acquainted with for many decades It is now clear that in addition to highly penetrant genetic variants which in isolation are able to recapitulate the full clinical presentation when expressed in animal models we are now aware that a small but significant fraction of subjects presenting with cardiac muscle diseases such as cardiomyopathies or primary arrhythmias such as long QT syndrome LQTS may harbor at least two deleterious variants in the same gene compound heterozygous or in different gene double heterozygous Although the clinical presentation in subjects with more than one deleterious variant appears to be more severe and with an earlier disease onset it somehow changes the viewpoint of clinical molecular geneticists whose aim is to identify all possible genetic contributors to a human condition In this light the employment in clinical diagnostics of the NGS technology allowing the simultaneous interrogation of a DNA target spanning from large panel of genes up to the entire genome will definitely aid at uncovering all such contributors which will have to be tested functionally to confirm their role in human cardiac conditions The uncovering of all clinically relevant deleterious changes associated with a cardiovascular disease would probably increase our understanding of the clinical variability commonly occurring among affected family relatives and potentially provide with unexpected therapeutic targets for the treatment of symptoms related to the presence of accessory deleterious

genetic variants other than the key molecular culprit The objective of this Research Topic is to explore the current challenges presenting to the cardiovascular genetics providers such as clinical geneticists genetic counselors clinical molecular geneticists and molecular pathologists involved in the diagnosis counseling testing and interpretation of genetic tests results for the comprehensive management of patients affected by cardiovascular genetic disorders *Justice in Extreme Cases* Darryl Robinson, 2020-12-17 The book shows how moral theory can challenge and improve international criminal law and how extreme cases can challenge and improve mainstream theory International Conference on Multi disciplinary Technologies and challenges in Industry 4.0 Dr. Prakash s, dr. Jarvis, 2016 Although sexual violence directed at both females and males is a reality in many on going conflicts throughout the world today accountability for the perpetrators of such violence remains the exception rather than the rule While awareness of the problem is growing more effective approaches are urgently needed for the investigation and prosecution of conflict related sexual violence crimes Upon its establishment in 1993 the Office of the Prosecutor OTP of the International Criminal Tribunal for the Former Yugoslavia ICTY began the challenging task of prosecuting the perpetrators of conflict related sexual violence crimes alongside the many other atrocities committed during the conflicts in the former Yugoslavia This book documents the experiences achievements challenges and fundamental insights of the OTP in prosecuting conflict related sexual violence crimes at the ICTY over the past two decades It draws on an extensive dossier of OTP documentation court filings trial exhibits testimony ICTY judgements and other materials as well as interviews with current and former OTP staff members The authors provide a unique analytical perspective on the obstacles faced in prioritizing investigating and prosecuting conflict related sexual violence crimes While ICTY has made great strides in developing international criminal law in this area this volume exposes the pressing need for determined and increasingly sophisticated strategies in order to overcome the ongoing obstacles in prosecuting conflict related sexual violence crimes The book presents concrete recommendations to inform future work being done at the national and international levels including that of the International Criminal Court international investigation commissions and countries developing transitional justice processes It provides an essential resource for investigators and criminal lawyers human rights fact finders policy makers rule of law experts and academics

Responsibility on Trial Liana Georgieva Minkova,2023-02-16 Establishing individual criminal responsibility for mass atrocities is the foundational principle of international criminal justice but this process is highly complex and is accompanied by political and legal dilemmas about its operation The book examines the drafting interpretation and application of the rules for assessing individual criminal responsibility as those rules emerge from the intense contestations among judges lawyers and academics within the legal field Focusing on the International Criminal Court ICC the book provides a rich analysis of the international debates around questions of criminal responsibility by interrogating formal legal documents and legal scholarship alongside more candid accounts interviews memoirs minutes These debates are of key importance for international criminal law and global justice because how criminal responsibility laws are construed in practice determines which conduct merits punishment and ultimately demarcates the boundaries of what are considered the gravest acts that shock humanity
