Reframing Deforestation James Fairhead, Melissa Leach, 2003-09-02 This study reviews how West African deforestation is represented and the evidence which informs deforestation orthodoxy On a country by country basis covering Sierra Leone Liberia Cote D Ivoire Ghana Togo and Benin and using historical and social anthropological evidence the authors evaluate this orthodox critically Reframing Deforestation suggests that the scale of deforestation wrought by West African farmers during the twentieth century has been vastly exaggerated The authors argue that global analyses have unfairly stigmatised West Africa and obscured its more sustainable even landscape enriching practices Stressing that dominant policy approaches in forestry and conservation require major rethinking worldwide Reframing Deforestation illustrates that more realistic assessments of forest cover change and more respectful attention to local knowledge and practices are necessary bases for effective and appropriate environmental policies

to the Bibliography on Land Settlement issued in 1934 by the United States Department of Agriculture as Miscellaneous Publication 172 It contains selected references to the literature on the economic aspects of land utilization and land policy in the United States and in foreign countries published for the most part during the period 1918-36 *Recent Accomplishments in Applied Forest Economics Research* F. Helles, N. Strange, Lars Wichmann, 2013-03-14 The papers in this book were in a preliminary version presented at an international conference May 21-25 2002 in Gilleleje Denmark It was a joint event namely the biennial meeting of the Scandinavian Society of Forest Economics and the 3rd Berkeley KVL Conference The Scandinavian Society of Forest Economics SSFE was established in 1958 as a forum for forest economists in the Nordic countries to meet and exchange ideas on research and education Alternating between Denmark Finland Norway and Sweden biennial ordinary meetings have taken place ever since The number of participants has increased from 10-15 in the first decade to more than 80 in 2002 In the last two decades prominent researchers from outside Scandinavia have been invited to present papers at the biennial meetings and also to participate in ad hoc working groups The Berkeley KVL part of the conference is based on a research collaboration between The Royal Veterinary and Agricultural University KVL Copenhagen University of California at Berkeley and Oregon State University It was initiated in 1993 within the framework of a research programme at KVL Stochastic Decision Analysis in Forest Management and since 1996 extended to the programme Economic Optimisation of Multiple Use Forestry and Other Natural Resources **Policy That Works for Forests and People** Stephen Bass, James Mayers, 2013-06-17 1 Introduction 2 Forests people and power the scene the players and the drama 3 Policy that works for forests and people a collaborative project approach 4 Policy in the real world themes in failure and success 5 International policy trends and initiatives their implications for forests and people 6 Conclusions **Forest Hydrology** Mingteh Chang, 2006-05-25 Although a few texts on forest hydrology are available they cover very little if any background on water resources On the other hand books dealing with water resources do not cover topics on forest water relations The one exception to this is *Forest Hydrology An Introduction to Water and Forests* Now with the publication of a revised edition this volume adds information from recent studies to go even further in providing an introduction to forest hydrology that brings water resources and forest water relations into a single practical and comprehensive volume Focusing on processes and general principles the first six chapters provide an introduction and basic background in water and water resources while the last seven chapters look at the impact of forests on water Between these two groupings is a chapter that serves as an entry to the study of forest impacts on water resources describing forests and forest characteristics important to water circulation sediment movement and stream habitat This second edition also features new information on forests and flooding forest and stream habitat snow vaporization processes and GIS methods in hydrology research examples on evaporation estimates and a new appendix on forest interception measurements Employing examples and case studies the book provides tools to help natural resource managers play an active role in policymaking and land use

planning and in developing partnerships with stakeholders It also offers unique perspectives for addressing urban sprawl
