Integrated Molecular and Cellular Biophysics Valerica Raicu,Aurel Popescu,2008-06-17 Biophysics represents perhaps one of the best examples of interdisciplinary research areas where concepts and methods from disciplines such as physics biology b chemistry colloid chemistry and physiology are integrated It is by no means a new eld of study and has actually been around initially as quantitative physiology and partly as colloid science for over a hundred years For a long time biophysics has been taught and practiced as a research discipline mostly in medical schools and life sciences departments and excellent biophysics textbooks have been published that are targeted at a biologically literate audience With a few exceptions it is only relatively recently that biophysics has started to be recognized as a physical science and integrated into physics departments curr ula sometimes under the new name of biological physics In this period of cryst lization and possible rede nition of biophysics there still exists some uncertainty as to what biophysics might actually represent A particular tendency among phy cists is to associate biophysics research with the development of powerful new te niques that should eventually be used not by physicists to study physical processes in living matter but by biologists in their biological investigations There is value in that judgment and excellent books have been published that introduce the int ested reader to the use of physical principles for the development of new methods of investigation in life sciences

Data Assimilation for Atmospheric, Oceanic and Hydrologic Applications SEON KI PARK, Liang Xu, 2009-02-08 Data assimilation (DA) has been recognized as one of the core techniques for modern forecasting in various earth science disciplines including meteorology, oceanography and hydrology. Since early 1990s, DA has been an important session topic in many academic meetings organized by leading societies such as the American Meteorological Society, American Geophysical Union, European Geophysical Union, World Meteorological Organization, etc. Recently, the 2 Annual Meeting of the Asia-Oceania Geosciences Society (AOGS) held in Singapore in June 2005 conducted a session on DA under the title of Data Assimilation for Atmospheric, Oceanic and Hydrologic Applications. This first DA session in the 2 AOGS was a great success with more than 30 papers presented and many great ideas exchanged among scientists from the three different disciplines. The scientists who participated in the meeting suggested making the DA session a biennial event. Two years later, at the 4 AOGS Annual Meeting in Bangkok, Thailand, the DA session was officially named Sasaki Symposium on Data Assimilation for Atmospheric, Oceanic and Hydrologic Applications to honor Prof. Yoshi K. Sasaki of the University of Oklahoma for his life-long contributions to DA in geosciences.

Inorganic Chemistry James E. House, 2025-01-27 Inorganic Chemistry, Fourth Edition, provides essential information for students of inorganic chemistry and is updated throughout. The presentation of topics is made with an effort to be clear and concise so that the book is portable and user-friendly. The text emphasizes fundamental principles including molecular structure, acid-base chemistry, coordination chemistry, ligand field theory, and solid-state chemistry. It is organized into five major themes: structure, condensed phases, solution chemistry, main group, and coordination compounds, with several chapters in each.
