Informatics in Schools. New Ideas in School Informatics Sergei N. Pozdniakov, Valentina Dagienė, 2019-11-11 This book constitutes the proceedings of the 12th International Conference on Informatics in Schools Situation Evolution and Perspectives ISSEP 2019 held in Larnaca Cyprus in November 2019 The 23 revised full papers presented were carefully reviewed and selected from 55 submissions They are organized in topical sections named teacher education in informatics primary education in informatics contemporary computer science ideas in school informatics teaching informatics from highschool to university levels contests competitions and games in informatics Streaming and Copyright Law Lasantha Ariyaratna, 2022-09-05 This book examines the challenges posed to Australian copyright law by streaming from the end user perspective It compares the Australian position with the European Union and United States to draw lessons from them regarding how they have dealt with streaming and copyright By critically examining the technological functionality of streaming and the failure of copyright enforcement against the masses it argues for strengthening end user rights The rising popularity of streaming has resulted in a revolutionary change to how digital content such as sound recordings cinematographic films and radio and television broadcasts is used on the internet Superseding the conventional method of downloading using streaming to access digital content has challenged copyright law because it is not clear whether end user acts of streaming constitute copyright infringement These prevailing grey areas between copyright and streaming often make end users feel doubtful about accessing digital content through streaming It is uncertain whether exercising the right

of reproduction is appropriately suited for streaming given the ambiguities of embodiment and scope of substantial part. Conversely the fair dealing defence in Australia cannot be used aptly to defend end users acts of streaming digital content because end users who use streaming to access digital content can rarely rely on the defence of fair dealing for the purposes of criticism or review news reporting parody or satire or research or study. When considering a temporary copy exception end users are at risk of being held liable for infringement when using streaming to access a website that contains infringing digital content even if they lack any knowledge about the content's infringing nature. Moreover the grey areas in circumventing geo blocking have made end users hesitant to access websites through streaming because it is not clear whether technological protection measures apply to geo blocking. End users have a severe lack of knowledge about whether they can use circumvention methods such as virtual private networks to access streaming websites without being held liable for copyright infringement. Despite the intricacies between copyright and access to digital content the recently implemented website blocking laws have emboldened copyright owners while suppressing end users access to digital content. This is because the principles of proportionality and public interest have been given less attention when determining website blocking injunctions.

Nocturne Hélène Valance, 2018-01-01 A beautifully illustrated look at the vogue for night landscapes amid the social political and technological changes of modern America. The turn of the 20th century witnessed a surge in the creation and popularity of nocturnes and night landscapes in American art. In this original and thought provoking book H l ne Valance investigates why artists and viewers of the era were so captivated by the night. *Nocturne* examines works by artists such as James McNeill Whistler Childe Hassam Winslow Homer Frederic Remington Edward Steichen and Henry Ossawa Tanner through the lens of the scientific developments and social issues that dominated the period. Valance argues that the success of the genre is connected to the resonance between the night and the many forces that affected the era including technological advances that expanded the realm of the visible such as electric lighting and photography Jim Crow era race relations America's closing frontier and imperialism abroad and growing anxiety about identity and social values amid rapid urbanization. This absorbing study features 150 illustrations encompassing paintings photographs prints scientific illustration advertising and popular media to explore the predilection for night imagery as a sign of the times.

Speaking Beyond Earth Paul E. Quast, David Dunér, 2024-04-03 Since the dawn of the Space Age small cohorts of humanity have broadcast signals towards other stars fabricated space time capsules to speak for Earth aboard interstellar probes deposited collections of space oddities on other astronomical bodies and permanently incised the memory of our species across the deep time legacy of the Sol System. Many of these purposeful messages are the consequence of age old behaviors traditions and material

practices using modern aerospace technologies Most attempt to preserve narratives of human experience in social exchange devices for imagined exotic audiences Looking back upon this accumulative history of messaging from Earth how do we begin to interpret such an eclectic portrait of Earth for ourselves Surveying and cataloguing the variety of these artifacts through a series of interdisciplinary essays and visual documentation this volume chronicles our changing relationships customs and assumptions made within this material culture for our own eyes What do these autobiographical accounts tell us about Terrans and our minds set against the backdrop of our planetary history

Emerging Technologies to Promote and Evaluate Physical Activity Dan J Graham, James Aaron Hipp, Simon Marshall, Jacqueline Kerr, 2014-10-23 Increasingly efforts to promote and measure physical activity are achieving greater precision greater ease of use and or greater scope by incorporating emerging technologies This is significant for physical activity promotion because more precise measurement will allow investigators to better understand where when and how physical activity is and is not occurring thus enabling more effective targeting of particular behavior settings Emerging technologies associated with the measurement and evaluation of physical activity are noteworthy because 1 Their ease of use and transferability can greatly increase external validity of measures and findings 2 Technologies can significantly increase the ability to analyze patterns 3 They can improve the ongoing systematic collection and analysis of public health surveillance due to real time capabilities associated with many emerging technologies 4 There is a need for research and papers about the

cyberinfrastructure required to cope with big data multiple streams processing aggregation visualization etc and 5

Increasingly blurred boundaries between measurement and intervention activity e g the quantified self self tracking movement may necessitate a reevaluation of the conventional scientific model for designing and evaluating these sorts of studies There have been many recent disparate advances related to this topic Advances such as crowdsourcing allow for input from large diverse audiences that can help to identify and improve infrastructure for activity e g large group identification of environmental features that are conducive or inhibiting to physical activity on a national and even global scale Technologies such as Global Positioning Systems GPS and accelerometry are now available in many mobile phones and can be used for identifying and promoting activity and also understanding naturalistically occurring activity SenseCam and other personal visual devices and mobile apps provide person point of view context to physical activity lifestyle and timing Further multiple sensor systems are enabling better identification of types of activities like stair climbing and jumping that could not previously be identified readily using objective measures like pedometers or accelerometers in isolation The ability of activity sensors to send data to remote servers allows for the incorporation of online technology e g employing an online social network as a source of inspiration or accountability to achieve physical activity goals and websites such as Stickk com enable individuals to make public contracts visible to other users and also incorporates financial incentives and disincentives in order to promote behaviors including physical activity In addition the increasing use of active gaming e g Wii XBox Kinect in homes schools and other venues further underscores the growing link between technology and physical activity

Improvements in mathematical models and computer algorithms also allow greater capacity for classifying and evaluating physical activity improving consistency across research studies Emerging technologies in the promotion and evaluation of physical activity is a significant area of interest because of its ability to greatly increase the amount and quality of global recorded measurements of PA patterns and its potential to more effectively promote PA Emerging technologies related to physical activity build on our own and others interdisciplinary collaborations in employing technology to address public health challenges This research area is innovative in that it uses emerging resources including social media crowdsourcing and online gaming to better understand patterns of physical activity

Atlas of Knowledge Katy Borner, 2015-03-20 The power of mapping principles for visualizing knowledge illustrated by many stunning large scale full color maps Maps of physical spaces locate us in the world and help us navigate unfamiliar routes Maps of topical spaces help us visualize the extent and structure of our collective knowledge they reveal bursts of activity pathways of ideas and borders that beg to be crossed This book from the author of *Atlas of Science* describes the power of topical maps providing readers with principles for visualizing knowledge and offering as examples forty large scale and more than 100 small scale full color maps Today data literacy is becoming as important as language literacy Well designed visualizations can rescue us from a sea of data helping us to make sense of information connect ideas and make better decisions in real time In *Atlas of Knowledge* leading

visualization expert Katy Brner makes the case for a systems science approach to science and technology studies and explains different types and levels of analysis Drawing on fifteen years of teaching and tool development she introduces a theoretical framework meant to guide readers through user and task analysis data preparation analysis and visualization visualization deployment and the interpretation of science maps To exemplify the framework the Atlas features striking and enlightening new maps from the popular Places Spaces Mapping Science exhibit that range from Key Events in the Development of the Video Tape Recorder to Mobile Landscapes Location Data from Cell Phones for Urban Analysis to Literary Empires Mapping Temporal and Spatial Settings of Victorian Poetry to Seeing Standards A Visualization of the Metadata Universe She also discusses the possible effect of science maps on the practice of science
