A Sociotheological Approach to Catholic Social Teaching Vivencio O. Ballano, 2022-10-31 This book introduces Catholic social teaching CST and its teaching on the common good to the reader and applies them in the realm of public health to critically analyze the major global issues of COVID 19 that undermine public interest It uses the sociotheological approach that combines the moral principles of CST and the holistic analysis of modern sociology and also utilizes the secondary literature as the main source of textual data Specifically it investigates the corporate moral irresponsibility and some unethical business practices of Big Pharma in the sale and distribution of its anti COVID vaccines and medicines the injustice in the inequitable global vaccine distribution the weakening of the United States Congress s legislative regulation against the pharmaceutical industry s overpricing and profiteering the inadequacy of the World Health Organization s WHO law enforcement system against corruption and the lack of social monitoring in the current public health surveillance system to safeguard the public good from corporate fraud and white collar crime This book highlights the contribution of sociology in

providing the empirical foundation of CST's moral analysis and in crafting appropriate Catholic social action during the pandemic. It is hoped that through this book secular scholars, social scientists, religious leaders, moral theologians, religious educators, and Catholic lay leaders would be more appreciative of the sociotheological approach to understanding religion and COVID-19. This book brings into dialogue two bodies of literature: documents of Catholic social teaching and modern sociology and its core thinkers and texts. The author does especially well to describe how taking the sociotheological turn will benefit the credibility and dissemination of Catholic social thought. Buttress's World Guide to Abbreviations of Organizations L. Pitman, 2012-12-06

The previous edition of this directory extended its coverage of the Far East, Australasia, and Latin America areas previously under represented. For this new edition, emphasis has been given to increasing the number of entries for organizations from Britain, the United States, and Australia, and particular attention has been paid to new political organizations in Central and Eastern Europe and the former Soviet Union. The number of entries included has gone up to over 68,000, of which over 9,000 are new or amended. Cross references from defunct organizations in the previous edition have been deleted, and references indicated by ex and now added for organizations which have changed their name since the previous edition. As before, the range of organizations included is broad, and only purely local organizations have been excluded. This directory therefore lists official and unofficial organizations, national and international, on all subjects: political, economic, and social. Acronyms of parent bodies of subsidiary organizations are given where appropriate, and equivalencies are used to link acronyms in different languages for the same organization. Further information about the organizations listed can be found in the sources listed in the bibliography. I would like to thank Henry Heaney and Graeme Mackintosh for their advice, and David Grinyer for his technical support. L. M. Pitman. Bibliography. Adams, R. ed. 1993. Emerging Perspectives from Social Realism on Knowledge and Education Graham McPhail, Richard Pountney, Leesa Wheelahan, 2024-10-28

This book brings the key ideas and concepts of social realism to bear on current debates in the fields of knowledge and curriculum. The key concern of this collection is to highlight matters related to knowledge and the influence these dimensions have on the formation of curricula, pedagogy, identity, and equity in educational contexts. Presenting new perspectives on the place of various types and forms of knowledge in contemporary education, this book explores two central questions: what type of knowledge is most important to include in a curriculum, and what is meant by disciplinary knowledge? The chapters use empirical examples to illustrate how the issues play out on a global stage, interweaving the social justice concern of equitable access to disciplinary knowledge throughout. In particular,

the authors address the emerging theorisation of issues related to the decolonisation of curricula the recontextualisation of non traditional knowledge into the curriculum and teacher education Offering new philosophical and theoretical perspectives this book will be of interest to researchers scholars and students examining the fields of knowledge and curriculum and the sociology of education more broadly
