Lines of Latitude and Longitude

Understanding the globe

How do we understand the globe? By drawing it. A globe is a model of the Earth. It shows the continents, oceans, and lines of latitude and longitude. The lines of latitude and longitude are imaginary lines that divide the Earth into sections. They help us find the location of any place on the globe. The lines of latitude are parallel lines that run from east to west. The lines of longitude are lines that run from the North Pole to the South Pole. They are also called meridians.
