The Criminology of Carlo Morselli - Part II David Décary-Héту, Rémi Boivin, 2023-09-12 The second of two volumes this book about the criminology of Carlo Morselli includes a diversity of contributions that study the social inter dependence of criminal phenomena It presents various studies on the importance and impact of social ties on offenders victims and the social response to crime The idea that social relationships are central to the understanding of human phenomena draws its roots from Jacob Moreno s work in 1934 whose contribution among others made at about the same time paved the way for social network analysis SNA a set of methods and approaches that study dyadic relationships and their connections to other dyads in the same network Surprisingly SNA was not widely adopted in criminology until the end of the 20th century It took researchers like Carlo Morselli to apply the principles of SNA and graph theory to criminological objects As a researcher Morselli embodied SNA he was a so called broker in his network of social scientists linking dozens of excellent researchers that he collaborated with directly or not Granovetter showed that weak ties or acquaintances were important in the diffusion of new ideas and Morselli put that insight to practice in criminology While it is impossible to summarise Carlo Morselli s work in a single paper or book the breadth of his contributions to criminology are highlighted in the six chapters of this volume which all draw from a specific area of interest of Carlo Morselli The Criminology of Carlo Morselli Part II will be a key resource for academics researchers and advanced students of Criminology and Criminal Justice Sociology Social Sciences The chapters included in this book were originally published as a special issue of *Global Crime* *Environmental Crime and Social Conflict* Avi Brisman, Nigel South, Rob White, 2016-03-09 This impressive collection of original essays explores the relationship between social conflict and the environment a topic that has received little attention within criminology The chapters provide a systematic and comprehensive introduction and overview of conflict situations stemming from human exploitation of environments as well as the impact of social conflicts on the wellbeing and health of specific species and ecosystems Largely informed by green criminology perspectives the chapters in the book are intended to stimulate new understandings of the relationships between humans and nature through critical evaluation of environmental destruction and degradation associated with social conflicts occurring around the world With a goal of creating a typology of environment social conflict relationships useful for green criminological research this study is essential reading for scholars and academics in criminology as well as those interested in crime law and justice *Prison Workers' Perception of Self-legitimacy, Relations, and Professional Competencies* Rok Hacin, Gorazd Meško, 2025-05-23 This book dives deep into the intricate realm of prison workers self legitimacy within Slovenia s non Western prison system It uncovers how their perceptions of authority significantly influence their interactions with prisoners especially regarding different approaches to treatment of prisoners including the use of force Unlike traditional Western models this study adapts to the unique challenges present in Slovenian prisons offering fresh insights and approaches Through a longitudinal study comparing data
