The Structure of Scientific Revolutions Thomas S. Kuhn, 2012-04-18 One of the most influential books of the 20th century the landmark study in the history of science with a new introduction by philosopher Ian Hacking Guardian UK First published in 1962 Thomas Kuhn's *The Structure of Scientific Revolutions* reshaped our understanding of the scientific enterprise and human inquiry in general In it he challenged long standing assumptions about scientific progress arguing that transformative ideas don't arise from the gradual process of experimentation and data accumulation but instead occur outside of normal science Though Kuhn was writing when physics ruled the sciences his ideas on how scientific revolutions bring order to the anomalies that amass over time in research experiments are still instructive in today's biotech age Science This new edition of Kuhn's essential work includes an insightful introduction by Ian Hacking which clarifies terms popularized by Kuhn including paradigm and incommensurability and applies Kuhn's ideas to the science of today Usefully keyed to the separate sections of the book Hacking's introduction provides important background information as well as a contemporary context This newly designed edition also includes an expanded and updated index

Scientific Realism N. Rescher, 2012-12-06 The increasingly lively controversy over scientific realism has become one of the principal themes of recent philosophy 1 In watching this controversy unfold in the rather technical way currently in vogue it has seemed to me that it would be useful to view these contemporary disputes against the background of such older epistemological issues as fallibilism scepticism relativism and the traditional realism idealism debate This then is the object of the present book which will reconsider the newer concerns about scientific realism in the context of these older philosophical themes Historically realism concerns itself with the real existence of things that do not meet the eye with suprasensible entities that lie beyond the reach of human perception In medieval times discussions about realism focused upon universals Recognizing that there are physical objects such as cats and triangular objects and red tomatoes the medievals debated whether such abstract objects as cat-hood and triangularity and redness also exist by way of having a reality independent of the concretely real things that exhibit them Three fundamentally different positions were defended 1 Nominalism Abstracta have no independent existence as such they only exist in and through the objects that exhibit them Only particulars individual substances exist Abstract objects are existents in name only mere thought fictions by whose means we address concrete particular things 2 Realism Abstracta have an independent existence as such
